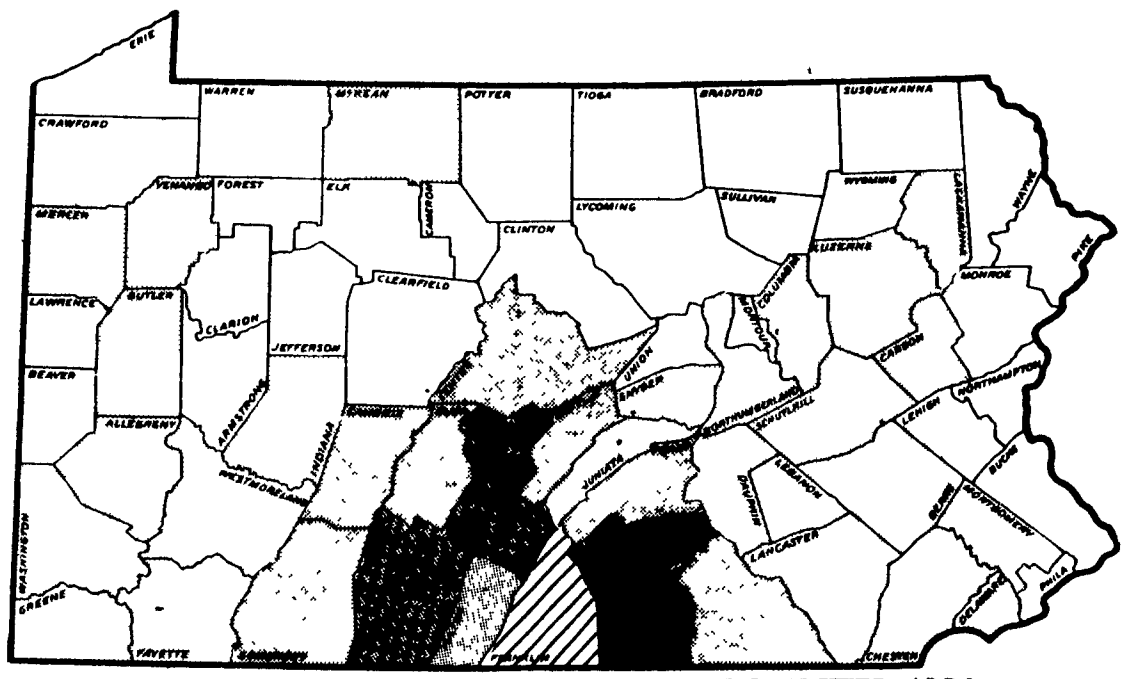
Rabies virus maintains choke-hold here



NUMBER OF RABIES CASES BY COUNTY, 1984

- More Than 100
- 51-100 Cases
- 20-50 Cases
- 5-20 Cases
- 1-4 Cases
- No Cases

BY JACK HUBLEY

HARRISBURG — Pennsylvanians should prepare for another siege of rabies this summer as wildlife activity increases with the warmer weather.

So said a panel of experts during a discussion of the deadly virus at the Penn Harris Motor Inn in Harrisburg this week.

Tuesday's panel discussion was part of a day-long "Pennsylvania State Grange Week" celebration that included a dozen workshops and an evening banquet.

And one of the workshops that generated plenty of interest among Grange members dealt with the continuing threat of rabies. Panelists present to field questions were Dr John Enck, a large animal veterinarian from Carlisle, state director of the Bureau of Dog Law Enforcement Donald Moul and Grange agricultural committee chairman Jim Aurand.

An acute disease of the central nervous system, rabies is almost always fatal to both animals and humans once symptoms appear, stated Dr. Enck.

From only 14 reported cases in 1980, rabies has swollen to epidemic proportions, with 384 cases confirmed last year. In Pennsylvania the disease is currently centered in the south-central area, with Franklin County logging 107 cases last year. And the disease is off to a running start again this year, with Adams and

Ag buys cut $8 billion in budget compromise

BY JAMES H. EVERHART

WASHINGTON — The budget compromise worked out between Senate Republicans and the White House would include $8 billion worth of cuts for agricultural commodity programs over the next three years, Senate sources say.

The plan would reduce federal deficits by nearly $300 billion through 1988. The federal deficit, which this year is expected to total $213 billion, would shrink to $175 billion in fiscal 1986, $145 billion in 1987, and $99 billion in 1988, according to the Senate Republican conference.

And while current commodity programs would result in a $38 billion outlay over the three years, the new budget proposal would allow for only $30 billion in expenditures through FY1988.

The clamor for policy reform follows a four-year period in which spending on commodity programs jumped 300 percent to $53 billion, including a $17 billion outlay in FY 1983.

The Senate compromise takes some of the bite out of the Reagan Administration's proposal, which would have carved almost $16 billion out of the ag budget over the next three years.

And though no specific measures to accomplish the budget reduction have been discussed, the Senate Ag Committee already has three types of policy changes in mind that would accomplish most of the reduction, according to the committee's press secretary, Ron Phillips.

These include:

- Reducing the payment limit from $50,000 to $25,000 (affecting only about two percent of all farmers and almost no one in Pennsylvania, said Phillips)
- Eliminating paid land diversion programs.
- Tying income and support levels to market prices

All three, said Phillips, are "good policy."

In advancing the compromise

Planting off to a great start, but a little more rain would help

BY JAMES H. EVERHART

LANCASTER — Unseasonably warm, almost balmy temperatures have helped the Northeast's farmers off to a fast start in planting, ag officials say.

However, a lack of moisture has caused some concern and a little discomfort, though the problem has not reached the serious stage by any means, they add.

In Pennsylvania, temperatures in most areas were nine to 15 degrees above normal last week, according to the state Crop Reporting Service.

At the same time, rainfall was averaging just about one-inch less than normal for the month, the agency said.

The warmer temperatures caused greater evaporation of moisture from the soil, thus compounding the moisture problem, experts said.

Thus far, however, officials report few if any problems have been caused by the dry spell.

For the most part, indicated Wally Evans, director of the state Crop Reporting Service, the lack of rainfall simply means plants aren't growing as fast as they would with the present temperatures and an ample amount of water.

"Because of the timing, I don't think we have too many crops that are in a crucial or maturing stage," Evans said.

Plants at greatest risk are the shallow-rooted small grains, said John O. Yocum, senior research associate in agronomy and superintendent at Penn State's Southeast Field Research Lab in Landisville, Lancaster County.

Growers of small fruit products may also be experiencing difficulty, as early-season fruit — like strawberries — reach maturity.

Both corn and alfalfa crops should be relatively unaffected by the dry spell, he said. However, farmers have told him they've noticed varying rates of crop maturity between different fields, or even between parts of the same

Delmarva Poultry

Thursday, April 25
Report supplied by USDA

Market Comment: Movement of ready to cook whole birds was about moderate overall, and several sellers noted inquiry as somewhat disappointing for a Thursday. Interest in parts was reported as satisfactory on all but wings which were difficult to place. Live supplies were adequate to fully adequate. Weights were mixed but mostly desirable to heavy. Slaughter schedules were moderately heavy. Undertone at least fully steady.

Today's L.T.L. asking prices were unchanged on U.S. Grade A at 44-50 cents.

Estimated slaughter of broiler fryers in Delmarva (000).

Estimated 4/25 1,978,000; Actual 4/18 2,019,000; Actual 4/23 1,712,000; Average Weights 4/23 4.41; Average Weights 4/16 4.36.

Eastern Pa. & N.J. Poultry

Wednesday, April 24
Report supplied by USDA

Market Comment: Prices continued to advance and sentiment was firm for next week's limited offerings. Processor schedules were lighter than desired at most plants.

Prices Paid at Farm:

Light Type Hens: .09½-.11, mostly .09½-10½.

F.O.B. Plant: .13-.14, mostly .13½.

New York Multiple Drop Broiler Report

Thursday, April 25
Report supplied by USDA

Current broiler-fryer negotiated prices for immediate delivery includes mostly multiple drop shipments to New York City from Delmarva.

Range: U.S. Grade A .43-.50.

Weighted AVG.: U.S. Grade A 47.51.

Premium (X) Boxes 12,018.

(X) Includes special services, selected competitive brands, etc.

Philadelphia Eggs

Thursday, April 25
Report supplied by USDA

Market Comment: Prices were unchanged. Trade sentiment improved and was mostly steady as news of the government dried egg mix procedure was circulated. Cartoned egg demand was generally disappointing and usually reported as no better than fair. Supplies varied according to size and area, adequate and building at some points, in balance to short at others. However, most dealers were able to satisfy customer needs.

Prices to retailers: sales to volume buyers, consumer grades white eggs in cartons delivered store door:

A Extra Large 57-60; A Large 56-59; A Medium 49-52.

THE OLD FARMER'S ALMANAC

April 29-May 5, 1985

A warming trend through week's end.

Divide perennials that have become too crowded Average length of days for the week 14 hours, 6 minutes Full moon May 4 (Sat.) Mary Rowlandson released from Indian captivity May 2, 1676 Department of the Navy created May 3 1798 Sen Joseph McCarthy died May 2 1957 Dedication of Empire State Building, then the world's tallest building May 1 1931 American tanker *Gulflight* sunk by German U boat, May 1 1915 *A sneer is the weapon of the weak*

Ask the Old Farmer: Could you explain the expression, He slept like a top ? G J L San Francisco

Should be "topman' In the old sailing men-of-war topmen spent all their time on watch in the top or masthead Traditionally when off watch they were very sound sleepers

Home Hints Hot nails won t crack plaster

OLD FARMER'S WEATHER FORECAST

New England: Clear and warm at weeks beginning, mid through end of week sunny and warm, sprinkles possible

Greater New York-New Jersey: Sunny unseasonably warm at week's beginning midweek cloudy and cold, end of week sunny and warm

Middle Atlantic Coastal Beginning of week clear and warm midweek mild light rain, end of week clear and hot

Kleen Leen.
We Breed Success
Success comes to those with ambition, drive and energy to keep growing and improving That's been a fundamental belief of Kleen Leen since we started in 1962.
Since that time, that belief has paid off in the development of hogs with some of the highest performance levels found anywhere. But we're never satisfied. We're continually refining and improving our breeding animals through applied genetic principles of testing and selection
You can count on Kleen Leen to help you breed success today and tomorrow

NOW IS THE TIME

By Jay Irwin

Lancaster County Agriculture Agent
Phone 717-394-6851

To Plant Corn

The dry warm weather has developed excellent conditions for planting corn. So be sure your planter is ready to go when your fields are ready to plant. If you plan to change the row width, be sure to calibrate your planter to the plant population you desire. If you need new plates–pick them up and install them. Also, your pest control programs should be worked out.

If you are on a no-till program and have a cover crop of rye, wheat or barley, then it should be sprayed when the vegetation is 18-24 inches tall. Paraquat plus a surfactant does an excellent job.

As far as control goes, research data collected from numerous sites over the past several years indicates that soil insecticide treatments for corn rootworm control have not significantly increased yields except in a small percentage of the fields. If rootworm was not a problem in the past, treatment will not be necessary. If the field was in anything but corn, there would not be a rootworm problem because they only survive on corn roots.

To Think Ryelage

Many farmers plant rye as a forage crop for their cattle. Rye can provide a lot of much needed high quality forage–if it is handled properly. For top quality feed value, rye should be cut around the boot stage of maturity, and wilted before ensiling. After this stage, feed value drops rapidly. Some of our rye fields will be heading out soon. That means we should be thinking about cutting rye, perhaps even before we finish planting corn.

To Evaluate Sewage Sludge Before Using

Many farmers are being approached to have sewage sludge applied to their land. Several things must be evaluated before considering this step. First of all, many of our farms are presently producing more animal and poultry manure than they have land to apply it on, so we just don't have the acreage. You should also be aware of potential pitfalls in sewage sludge.

Sludge is a by-product of wastewater treatment and can contain many different elements and compounds from municipal and industrial sources. The wastewater goes through several stages of treatment, but the sludge that is removed from the effluent may contain heavy metals and trace elements such as copper, zinc, lead, nickel, chromium or cadmium. These elements can be toxic to plants at low levels and some represent a hazard to the food chain.

To avoid heavy metal or other problems, sludges must be analyzed to determine their suitability. Ideally, your soil should also be tested. Sludge and soil testing is absolutely essential for the safe and beneficial use of sewage sludge on cropland. Costs of analyses are usually paid by the municipality involved.

To Develop Safety Habits

We are aware that farming is not the safest occupation. In fact the average farm worker can expect that once every four years he'll be injured so severely that medical attention is needed. We also know that farming is even more dangerous than industrial work. Farmers have a work accident rate that's two and a half times greater than the average for all industries. The problem is, that unlike industry, farmers work with a minimal amount of supervision and they may not be properly trained for the job. We urge farmers during this busy season to take time to be safe.

The Penn State Extension Service is an affirmative action, equal opportunity educational institution.

Grange outlines legislative priorities

HARRISBURG — Grange Master Charles E. Wismer outlined the Pennsylvania State Grange's legislative priorities at the Grange Week banquet Tuesday night.

Turning to members of the state legislature in attendance, Wismer praised "both sides of the isle" for working for agriculture in rural Pennsylvania.

Here's where the Grange will be concentrating its efforts:

• H.B.236 - Introduced by Rep. Carville Foster, this bill would limit foreign investors to the ownership of not more than 10 acres of land. The present limit is 100 acres.

• H.B.237 - Also introduced by Foster, this bill would prohibit all on-site farm operations from obtaining PIDA (Pa. Industrial Development Authority) loans. Previous legislation prohibited only foreign-owned operations from receiving PIDA money and required that applicants employ at least 25 people. The Grange's objection here is that this latter requirement effectively excluded small family farm operations. Agri-business concerns would still be eligible for loans. Both the above bills have received House Ag Committee approval.

• H.B.976 - A bill introduced by Rep. John Broujos, would require payment for poultry and eggs within 21 days unless otherwise stated in a contract. Producers not being paid within this time period could place a lien on the debtor's property. This bill also passed the House Ag Committee.

• H.B.479 - Introduced by Rep. Curt Bowley, the so-called "Bottle Bill" would place a five-cent deposit on all non-biodegradable beverage containers. This bill would name the Pa. Department of Agriculture as responsible for enforcement. A May 9 hearing is scheduled in the House Ag Committee.

• S.B.191 - The Senate equivalent of H.B.479 was introduced by Sen. Edward Helfrick.

•House Resolution 61 - Introduced by Rep. Ruth Rudy, this resolution requests that Congress include funding for federal meat inspection in the federal budget. The resolution takes issue with the proposed "user fee" concept that would require meat processors to absorb the cost of inspection.

OTIS, DO YOU PRACTICE NO TILL?
YUP!
DO YOU LIKE THE NO TILL PROGRAM?

Delaware farmers increase crop insurance coverage

NEWARK, DE — Delaware farmers have increased their use of crop insurance as a management tool to protect themselves against devastating income losses caused by abnormally low yields.

"We anticipate that farmers in this state will buy more than $3.5 million worth of crop insurance this year," says University of Delaware assistant extension farm management specialist Mark Kooker. "That's a 25 percent increase over 1984. Looked at another way, you could say this figure shows that Delaware farmers are sharing $3.5 million of their product risks with other producers from across the nation."

Multi-peril crop contracts insure against essentially all unavoidable production hazards such as drought, freezes, hail, excessive rain, wind damage, insects and diseases. The policies do not cover losses due to neglect, theft or failure to follow recognized farming practices.

Delaware farmers can find out about insuring their crops in several ways. They can contact an agent who sells crop insurance, a county ASCS office, or the county extension office in Newark (451-2506), Dover (736-1448) or Georgetown (856-7303).

They can also call Kooker directly at 451-2511. He has prepared a fact sheet, "Multi-Peril Crop Insurance: A Management Tool," which is available at all county extension offices.

THE BIBLE SPEAKS
BY LAWRENCE W. ALTHOUSE

EMPTY NOTHINGS
April 28, 1985

Background Scripture
Job 20 through 21.
Devotional Reading:
Job 23: 1-13.

Zophar is another of the three "friends" of Job who come to "comfort" him. But like the other two, Zophar is not much of a comfort to Job. Job sits before him in utter misery–physical, mental and spiritual–and Zophar's idea of "comfort" is to preach Job a little sermon on how the prosperity and good fortune of the wicked is brief and always certain to be punished.

Zophar has a way with words and it is a beautiful sermon:

Do you not know this from of old, since man was placed upon earth, that the exulting of the wicked is short, and the joy of the godless but for a moment? (Job 20:4,5)

THEN, MOCK ON!

There's only one problem with these noble sentiments, as far as Job is concerned–they are absolutely wrong! Just look around, challenges Job, there are lots of wicked people who live to a ripe old age and are surrounded with prosperity. Why, even "Their bull breeds without fail"! (21:10). Some of these wicked people die with a smile on their lips—what kind of justice is that anyway?

It is really God's justice, not man's that Job is questioning, "As for me, is my complaint against man?" (21:4). No, it is a complaint against God and Job's friends are aghast at the boldness of Job to say such things in God's presence.

Yet, just as the skeptical questions of the Apostle Thomas gave Jesus the occasion to utter some of his most profound sayings, so the dogged protests of Job are obviously closer to God's heart than the "empty nothings" of Eliphaz, who seems to keep his faith by pretending that evil men always get their just deserts.

When we hear Job's complaints, we cannot help agreeing that that is often the way it is in our world, too. A brutal mobster all too often dies "in full prosperity...his body full and fat" (21:23,24). Yet, although Job is absolutely right in his judgement that justice often does not prevail in this world, he is absolutely wrong in attributing that failure to God.

DOWN TO SHEOL

Justice is God's will for his children, but he does not compel us to be just, just as he does not compel us to be good. Justice and equity are not part of the "given" of human existence, they are part of that which is to be achieved. So, if the world is unjust, it is we who have to change the world.

The key to Job's frustration is found in his statement to Sheol" (21:13). In the day this book was written most people believed that there was no conscious life after death. Sheol was the end. Thus, God's justice after death was too late.

But if you believe in a life beyond this earth, then you can begin to understand that it is in that realm that justice and evil receive their ultimate rewards and punishments.

St. Louis Cattle

Thursday, April 25
Report Supplied by USDA

Receipts this week	3,500
Week Ago	4,600
Year Ago	5,200

Compared with last week's close, Slaughter Steers mostly 1.00 lower. Slaughter Heifers weak to .50 lower. Cows firm to 1.00 higher. Bulls steady. Slaughter supply mainly choice and mixed choice and prime Steers and Heifers, around 10% Cows.

*Note: A substantial increase in steers weighing over 1150 lbs and heifers over 950 lbs. was apparent this week.

SLAUGHTER STEERS: Mixed choice and prime 2-4 1050-1375 lbs. 57.00-57.50, load late 58.00; 3-4 1100-1250 lbs. 56.00-56.50. Choice 2-4 1000-1350 lbs. 56.00-57.50, closing sales 56.50-57.50. Mixed good and choice 2-3 900-1250 lbs. 55.00-56.50. Good 2-3 900-1200 lbs. 52.00-55.00. Mostly good 2-3 1050-1435 lb. holsteins 48.00-54.25. Standard to good 2-3 1050-1275 lbs. 45.00-49.00.

SLAUGHTER HEIFERS: Mixed choice and prime 2-4 900-1125 lbs. 56.00-57.00, most closing sales 57.00; 3-4 975-1100 lbs. 53.00-54.00; 4-5 950-1150 lbs. 50.00-52.00. Choice 2-4 900-1125 lbs. 55.00-57.00, closing sales 55.50-57.00. Mixed good and choice 2-3 800-1050 lbs. 53.00-55.50. Good 2-3 750-1000 lbs. 50.00-53.50.

COWS: (Closing Week Sales) Breaking Utility and Commercial 2-4 39.00-41.00. Cutter and boning utility 1-2 39.00-41.00. High-yielding utility 1-2 41.00-42.00. Canner and low cutter 1-2 34.00-39.00. Shelly canner 1-2 29.00-34.00.

BULLS: YG 1-2 1050-2200 lbs. 46.00-50.00. Few YG 1 51.00.

Wednesday's Weekly Sheep Auction. Receipts around 250 head. Compared to last week's limited test, shorn slaughter lambs 2.00-5.00 higher. Spring slaughter lambs 7.00 higher. Not enough of any other class to test market. Demand moderate for moderate supply. Consisting mostly of old crop shorn slaughter lambs and spring lambs.

SLAUGHTER LAMBS: Mixed choice and prime shorn with No. 1-2 pelts 100-125 lbs. 65.00-70.00. Wooled lambs scarce. Same grades spring 81-110 lbs. 70.50-72.50.

SLAUGHTER EWES: Few utility 17.50-18.00.

FEEDER LAMBS: Mixed choice and fancy, two lots 60-70 lbs. 63.00-68.00.

GOATS: Few 16.00 per head.

FEEDERS: (Including around 1,200 at the regular Thursday auction.) Feeder steers 1.00-2.00 higher, except 300-400 lbs. 2.00-4.00 higher. Feeder heifers steady. Demand good. Supply moderate, consisting mostly of steers under 800 lbs. and heifers under 600 lbs.

FEEDER STEERS: Medium and Large Frame 1: 300-400 lbs. 74.50-81.00; 400-600 lbs. 69.00-74.00, couple lots including some Missouri gold label steers 74.50-76.50; 600-700 lbs. 65.00-69.25, one lot 71.75. Fleshy lots 63.00-65.00; 700-900 lbs. 58.00-63.00, fleshy lots 55.00-56.50.

Large Frame No. 2 Holsteins: Few 300-500 lbs. 55.50; few 4 500-900 lbs. 47.50-51.50.

FEEDER HEIFERS: Medium and Large Frame 1: 300-400 lbs. 57.00-63.50, three lots reputation brand 63.00-65.75; 400-600 lbs. 55.00-60.00, few 600-800 lbs. 53.00-56.50.

Medium and Large Frame 1-2: 300-600 lbs. 55.00-57.00.

Small Frame 1-2: Few 300-500 lbs. 52.00-52.50.

Omaha Weekly

Thursday, April 25
Report Supplied by USDA

Slaughter steers and heifers closed this week fully 1.00 higher than last week, recovering part of that session's sharp downturn, higher dressed beef prices, prompting an improved buyer demand, was the primary reason for the upturn in prices. Those steers over 1300 lbs. still being discounted sharply this week. Buyers of steers suitable for commodity delivery played a smaller role this week. Slaughter cows steady to 1.00 higher. Slaughter bulls firm to 1.00 higher.

Estimated 5 day receipts this week 7800; actuals last week 9578 and 8023 last year. Slaughter steers made up 54 pct of this week's receipts, heifers 38 pct, cows 5 pct, feeder cattle 1 pct.

SLAUGHTER STEERS: Closing sales choice 2-4 1075-1350 lbs. 57.50-58.75. Mixed good and choice 2-3 1000-1150 lbs. 56.00-58.00. Few good 54.50-56.00. Few mixed good and choice 2-3 1200-1400 lb. holsteins 52.00-52.50.

SLAUGHTER HEIFERS: Closing sales choice 2-4 975-1150 lbs. 56.50-58.25. Mixed good and choice 2-3 900-1050 lbs. 55.00-57.00. Few good 54.00-55.00.

Average of LS-214 detailed quotations for choice 900-1100 lb. steers 57.75, 1100-1300 lbs. 58.25. Average cost all slaughter steers this week 57.44, average weight 1229 lbs. as compared to 58.05 and 1217 lbs. last week. Average cost all slaughter heifers this week 56.66, average weight 1080 lbs. as compared to 56.88 and 1065 lbs. last week.

SLAUGHTER COWS: Few breaking utility and commercial 2-3 40.00-43.75. Cutter and Boning Utility 1-2 40.00-43.00, high dressing to 43.50. Canner and low cutter 37.00-41.50, few canner 31.00-36.00.

SLAUGHTER BULLS: 1-2 1300-2000 lbs. 49.00-52.75, low dressing 42.50-48.00.

Middleburg Livestock

Middleburg, Pa.
Tuesday, April 23, 1985

Delaware crop pest hotline

NEWARK, DE – The University of Delaware Cooperative Extension Service is again using its crop pest hotline to report in-season crop pest activity, as part of its integrated pest management and entomology programs.

According to extension pest management specialist Joanne Whalen, the hotline provides farmers with information on field scouting methods, first occurrence of pests, peak pest activity, economic thresholds of infestation, and treatment guidelines for insects, weeds and diseases in corn, soybeans and other crops.

The reports are based on information collected by pest management scouts, U.S. Department of Agriculture APHIS survey personnel, extension specialists and agents, and private consultants. The hotline will be updated weekly during April and May, with new reports on the system by 10 a.m. Wednesdays. During June, July and August messages will be updated by noon on Tuesdays and Fridays.

Delaware residents can reach the hotline by dialing 1-800-345-7544. Out-of-state residents should call 1-302-451-8851.

Honey loan rates

WASHINGTON – The Agricultural Stabilization and Conservation Service will offer honey producers an average loan and purchase rate of 65.3 cents per pound on their 1985 production, 0.5 cent per pound less than in 1984.

Officials of the agency said rates for extracted honey will range between 68.5 and 53.5 cents per pound, depending on color and class. The loan level represent 60 percent of the April 1985 adjusted parity price of $1.087 cents per pound.

Farmers may obtain loans on 1985-crop honey stored in eligible containers, on or off farms. They have until January 31, 1986 to request loans that will mature April 30, 1986.

Loan and purchase rates for extracted table honey in 60-pound or larger containers are: 68.5 cents per pound for white or lighter, 64.5 cents for extra light amber, 59.5 cents for light amber, and 53.5 cents per pound for other table and non-table honey.

Producers who wish honey price support should contact the ASCS office before January 31, 1986.

Higher potassium levels help alfalfa outgrow quackgrass

ITHACA, NY — A Cornell University researcher has found a way to suppress some weed pests in alfalfa fields without using herbicides while assuring continuing, good alfalfa yields.

Rhonda Janke, a graduate student in the New York State College of Agriculture and Life Sciences at Cornell, says that the growth of quackgrass can be held in check and alflafa can flourish if the recommended level of fertilizer potassium is maintained.

"If the potassium level is adequate, the alflafa yield could double," Janke says. "When the field is low in potassium, the quackgrass takes over, thus reducing the alfalfa yield greatly."

Recognizing the importance of her work, the Charles A. Lindbergh Fund has awarded Janke a $10,580 research grant to complete her project. A Ph.D. candidate in agronomy, Janke conducts her research under the direction of Gary Fick, a professor of agronomy.

In her work, Janke found that alflafa has the "competitive advantage" over quackgrass–by far the most common weed pest affecting alfalfa–when sufficient amounts of potassium are maintained. Competitive advantage refers to the ability of alflafa to maintain yield in the presence of quackgrass and to absorb adequate amounts of available potassium.

The potassium level needed to give alfalfa an advantage against quackgrass depends on the results of soil tests and soil types making up the alfalfa field. Thus, the amount of potassium required annually could range from a minimum of 25 pounds to as much as 200 pounds per acre, Janke explains.

In her experiments over the past three years, she used 100 pounds of potassium each year, based on soil tests conducted on her experimental sites.

When less than the required amount of potassium is applied, quackgrass gains the "upper hand." In other words, the quackgrass "steals" most of the potassium, leaving little for alfalfa to use. The resulting potassium deficiency in the alfalfa field leads to reductions in alfalfa yields, according to Janke.

Janke's work showed that if farmers apply adequate amounts of potassium each year after establishing the alfalfa crop, they could realize much higher alfalfa yields.

Preliminary results of her experiments conducted over the past three years showed that the alfalfa yield could double, thus increasing the quality and the amount of total hay (a mixture of alfalfa and weedy grasses) by as much as 50 percent.

"When alfalfa is fertilized with an adequate amount of potassium, alfalfa outgrows quackgrass," Janke points out. "Thus, there is no need to use large amounts of herbicides."

Such an herbicide-free alfalfa production method is conducive to the preservation of the environment, a factor that prompted the Lindbergh Fund to recognize the importance of Janke's work.

"The use of herbicides has many undesirable side effects on the natural environment," Janke explains. "Another problem with herbicides is that they are not effective on all weeds; some weeds are actually becoming resistant to certain types of herbicides."

At present, many farmers generally use herbicides on newly established alfalfa fields. After the first summer, however, the farmers tend to apply fewer herbicides or to apply inadequate amounts of fertilizer.

Janke's method of attaining good alfalfa yields by applying potassium, rather than using herbicides, keeps growth of the quackgrass suppressed, not eradicated. In fact, weeds such as quackgrass are beneficial to the soil, says Janke.

For one thing, weeds protect the soil from erosion. Some species penetrate and loosen the subsoil, allowing the nutrients to get to the plant roots easier. Weeds also provide a home for some insects that are beneficial to the alfalfa.

Janke's work to date has been mainly with quackgrass. Preliminary findings from her experiments indicate, however, that increased alfalfa vigor resulting from high levels of potassium suppressed several other kinds of weed pests, such as dandelion, plantain, and yellow rocket, as well as quackgrass.

Janke is running her experiment for another year to confirm what she has found out thus far, as well as to see more precisely what effect potassium has on other types of weed pests, particularly dandelion.

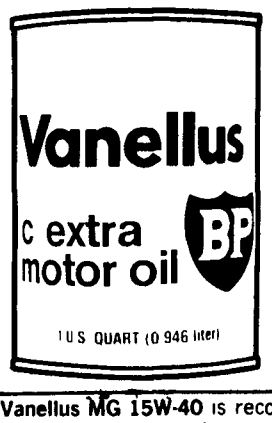
SPRING LUBRICANTS SALE

EFFECTIVE NOW THRU MAY 25, 1985



B P VANELLUS® C EXTRA 15W-40 motor oil is the result of the latest universal oil additive technology which provides the best potential for extended oil drain intervals with less wear and cleaner engines Its multi-grade 15W-40 characteristics make possible all-season use plus lower fuel and oil consumption

VANELLUS C EXTRA 15W-40 excels in API Service SF-CD and exceeds the lubrication requirements for all gasoline and diesel engines in car and truck fleets of all types, and in farm, earth moving, mining and construction equip ment

55 Gallon Drums - $172.00
24 Quart Cans - $21.48

Vanellus MG 15W-40 is recommended for diesel and gasoline engines used in cars, trucks, farm and construction equipment Meets API Service SF/CD

55 Gallon Drums - $157.00
6/1 Gal. Jugs - $19.80

BP VANELLUS® MCS-3 is a universal type motor oil for use in all gasoline and diesel engines used to power car and truck fleets of all types, and in farm, earth moving, mining and construction equipment It provides optimum engine protection for both heavy-and light-duty service **Vanellus MCS-3** excels in API Service SF-CD and is available in SAE 10W, 20W 20 30 40 and 50 single grades

55 Gallon Drums - $157.00
24 Quart Cans - $19.80

BP VANELLUS® SUPER DF provides superior lubrication protectionf or gasoline and diesel engines used to power con struction, earth-moving and farm equipment, trucks and automobiles operating in light- or medium-duty service **Vanellus Super D & F** exceeds most auto and truck makers' gasoline and diesel engine warranty requirements **Vanellus Super D & F** is recommended for API Service SF-CC and it is available in SAE 10W-30 and 10W-40 multi grades plus SAE 10W, 20W-20, 30 and 40 single grades

	Single Grade	10-30	10-40
55 Gallon Drum	$153.00	$159.00	$165.00
24 Quart Cans -	$19.38	$20.04	$20.70

*(Available in SAE 30 Only)

Eldoran UTH is a hydraulic fluid designed to function effectively in the complex lubrication systems of modern tractors In these systems the same lubricant may be called upon to serve the hydraulic system, torque converter, transmission, and differential Eldoran UTH is a virtually universal tractor hydraulic oil It can be used for makeup or refill in most tractors

55 Gallon Drums - $174.00
5 Gal. Cans - $20.00

FREE DELIVERY within 40 MILE RADIUS

Huntingdon Holstein breeders have a heart

BY BETSY STITT
Staff Correspondent

HUNTINGDON — The Huntingdon County Holstein Club members showed they have big hearts at their annual county heifer sale last Saturday. They donated proceeds from the top-selling consignment to the family of 4-H'er Tina Schultz.

Tina, who has shown Holstein cattle and been an active 4-H member, recently suffered the loss of a leg due to cancer.

As Bransdale Valiant Karlie, consigned by Terry Branstetter Jr., entered the ring, sale chairman John Foster announced that the proceeds would go to the Schultz family.

Foster purchased Karlie, a July 1984, S-W-D Valiant daughter, for $3,600. Terry Green was the contending bidder.

Karlie's dam is Bransdale Tempo Kris - ET. Scored 87 as a two-year-old, Kris is predicted to produce 26,881 pounds milk and 888 pounds fat on her second record.

Russell Kline bought the second high-selling animal. Gillbrook RH Sally - ET, a junior two-year-old sired by Brownsdale Sir Christopher, brought $2200.

Sally's dam, Flango Chief Superior, was scored 90 as a three-year-old and is projected to make 20,000 pounds of milk and 880 of fat as a five-year-old.

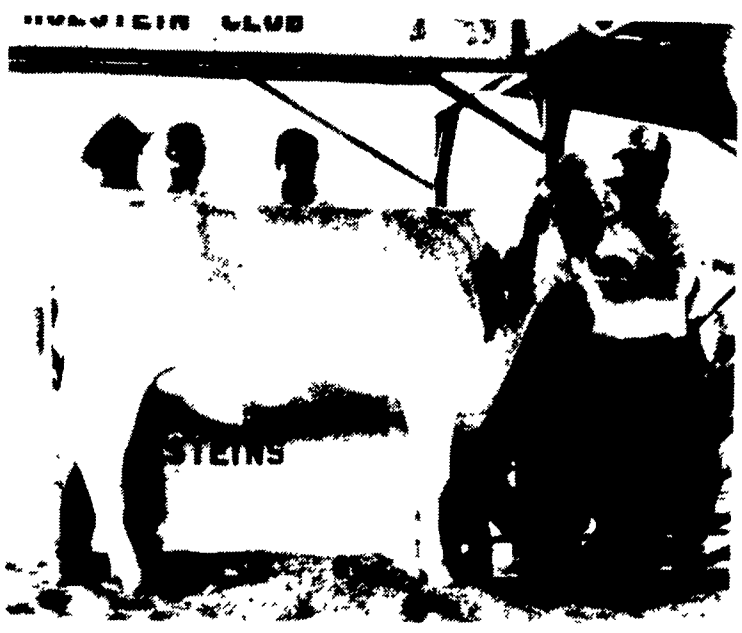
Sally was consigned by John and Karen Gilliland and is bred to Leadfield Columbus.

Globe-Run Arlinda Chief Helena, consigned by John and Annabelle Foster, was sold to Fred Strouse for $1850, making her the third high selling animal. This junior two-year-old was sired by Paymee Farms Arlinda Chief and is also bred to the Columbus bull.

The fourth high-selling animal, Harpster Chairman Boopat - Twin, was consigned by R. Wayne Harpster and purchased by Jim and Kim Grove for $1,700. The Cal-Clark Board Chairman daughter is due to Williards Valiant Charger.

Dan Snare bought the fifth high-selling animal for $1525. Tom Kelly consigned Spring-Lane Bell Blenda, a junior two-year-old Bell daughter bred to Sunny-Craft Chief Spirit.

Eighty-one fine quality animals were sold at the annual Huntingdon County Holstein Heifer Sale. With quite a few younger animals consigned, the average was $769



Russell Kline purchased the second high selling animal at the Huntingdon County sale. From left are: John Foster, sale chairman; Mark Glick, auctioneer; John Gilliland, consignor; and Paul Sybil, leadsman.

Proceeds from the top selling animal went to the Tina Schultz family. From left are: Terry Green, contender; Mrs. Branstetter, consignor; John Foster, buyer; and Jeff Metz, leadsman.

Farm Show Market to start 11th season on May 7

HARRISBURG — 1985 Farm Show Farmers Market, featuring four new vendors, opens its stands and tailgates on the parking lot of the Farm Show Complex, May 7 at noon.

In its 11th year, the Market has expanded to include 33 vendors on the sprawling 45-acre lot on North Cameron Street across from the Agriculture Building. The new additions to the market include: Leroy Funk of Washington Boro, Lancaster; Robert Dunphy of Zion Grove, Schuylkill County; Missy Murray of Middletown, Dauphin County; and Walter Barmount of McConnellsburg, Franklin County.

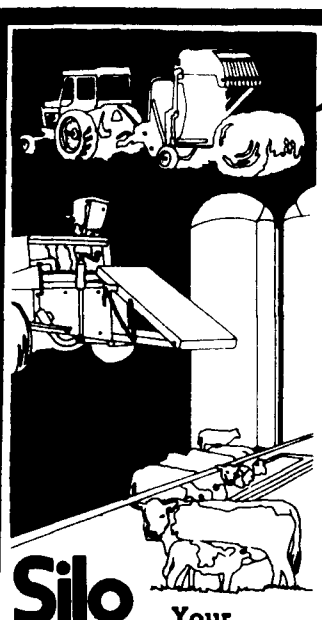
The 1985 Farm Show Market is managed by Glenn and Flo Fosselman, Linglestown, Dauphin County.

Luke Toomey, who directed the market from its infancy, retired last year after 10 years service as market manager. His tenure saw the expansion of efforts to increase direct marketing of Pennsylvania-grown fruits, vegetables and other products.

Among the goods being offered for sale on opening day are bedding plants, Mother's Day plants and flowers, baked goods, eggs, cheese, cider and apples.

As the season progresses peas, potatoes, strawberries, sweet corn, peaches, broccoli, sugar peas, cauliflower, cherries and other delicious Pennsylvania-grown items will apper in abundance at the Market.

The open air market is held each Tuesday and Friday from noon until 8 p.m. through November



Why You Should Use Silo Sym On Baled Hay:

allows you to bale tougher
a definite hedge against the weather
saves more leaves
higher protein con tent
enhances palat ability of hay
easy to apply with Gandy Applicator
less problems with Gandy Applicator
non-toxic to live stock
non corrosive to the baler
it really works on square bales round bales and stacks

Silo Sym Your Forage Guardian

Silo Sym can also be applied on haylage
SPECIAL EARLY ORDER PRICES IN EFFECT NOW.
For more information on Silo Sym and appli cators, write or call us collect

Penn State hosts Dairy Expo today

UNIVERSITY PARK – Today is Show Day for the Dairy Expo at Penn State's Ag Arena across from Beaver Stadium. The contest and its noontime special events at noon have become a popular campus event for students and for families with curious children.

Dairy Cattle fitting and showing classes will be judged from 8 a.m. to noon and will resume again at about 1:30 p.m. Penn State students in the College of Agriculture and several other colleges have been working with University dairy cattle for weeks to prepare for the competition.

During the fitting contest, students will be judged on how well they prepare their animals for show including cleaning, grooming, clipping and brushing. During the showing contest, judges will look for outstanding skill in presenting the animals for inspection. Spectators are apt to see the cleanest and best behaved dairy cattle imaginable.

At noon, students, faculty, alumni and guests will participate in the popular special events of the day, beginning with a celebrity milking contest. The sorority milking contest, milk chugging contest and calf dressing contests follow.

All awards winners and contest participants will be honored at a Dairy Expo Awards Banquet that evening in the Hetzel Union Building.

This year's Dairy Expo is dedicated to Authur W. Nesbitt, president of Nasco International of Fort Atkinson, Wisconsin.

Nesbit received a bachelor of science degree in agricultural economics from Penn State in 1950. He was an assistant county agent with the Penn State Cooperative Extension Service in Clarion County until 1952 when he became secretary-fieldman for the Pennsylvania Holstein Association. He was an active 4-H participant and serves as director of the Wisconsin 4-H Foundation. He has received both a Pennsylvania 4-H Alumni Award and the National 4-H Alumni Award.

Nesbitt was named a Pennsylvania State University Alumni Fellow in 1979 and is currently serving on the Penn State Development Council. He has served on the Ag Arena committee and last year chaired a national ad hoc committee for Pennsylvania Dairy Herd Improvement Association.

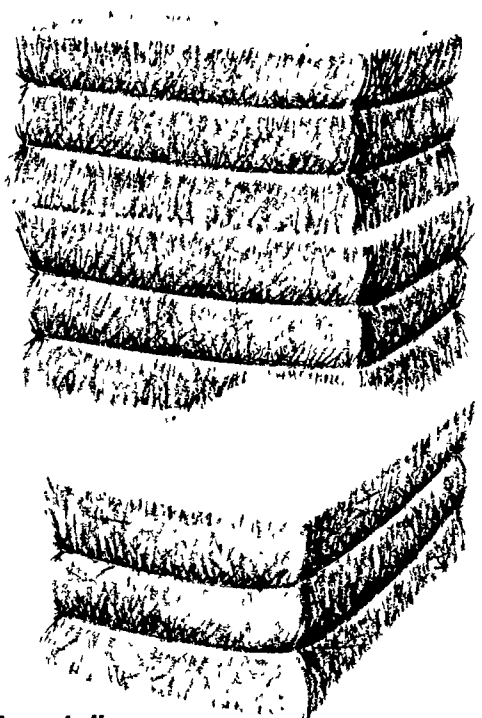
The Penn State Dairy Science Club chose to dedicate this year's Dairy Expo to Nesbitt because of his support for club activities and his many contributions to the College and to the dairy industry.

AGWAY FIELD FRESH™
High Moisture Preservative

Recovers up to 15% more feed value from your forage harvest

The longer your hay lies drying in your field, the more dry matter disappears through leaf shattering, respiration and rain loss. But with Field Fresh you can safely bale at higher moistures (25% to 30%) without risk of spoilage or fire

Field Fresh contains a high percentage of nature's strongest hay preserving agent. So it preserves your forage better, longer and at higher moistures than most other products. Best of all, university tests show that at 28% moisture, Field Fresh treated hay recovered 14.8% more dry matter, and produced more milk pound for pound of dry matter than field dried hay. And that means Field Fresh can provide up to 15% more feed of equal value from your harvest



"It's like getting three bales free in every twenty."

Effect of Field Fresh treatment on dry matter losses

	TREATED	UNTREATED
Harvest moisture %	27.2	17.9
Mowing and curing losses %	7.1	13.2
Packaging baling loss %	2.6	3.5
Storage loss %	4.8	7.8
Feeding loss %	0.4	5.2
Total losses %	14.9	29.7

Source Penn State research

Easy application
Spraying equipment applies Field Fresh safely and accurately to hay at the baler, or to high moisture corn at the auger. Equipment is highly corrosion resistant. Available through Agway.

Joint promotions help

WILLIAMSPORT – During the year, the American Dairy Association and Dairy Council participates in a number of joint promotions with manufacturers of foods that are natural go-togethers with dairy products. These joint promotions offer incentives to consumers such as free dairy products and money back refunds.

The promotion began in January with a butter offer from the Quaker Oats Company. Quaker sent a $1 refund to consumers who mailed in one proof of purchase each for butter, Aunt Jemima syrup and Aunt Jemima pancake mix. ADA promoted the offer in supermarket displays, and Quaker placed an advertisement in a national newspaper insert.

Early in spring, ADA cooperated with Mars, Inc., in offering a free ½ gallon of milk in return for the purchase of Twix and Summit cookie bars. Nabisco ran a similar promotion for Oreo Cookies and Honey Made graham crackers.

Another dairy oriented promotion from the Quaker Oats Company began April 14th with a newspaper advertisement offering free milk to promote the purchase of Quaker Chewy Granola Bars, Granola Dipps, and Cap'n Crunch cereal. The promotion uses an instant coupon for a free ½ gallon of milk for consumers who purchase the three Quaker products. ADA is supporting the promotion through milk carton side panels and dairy displays in 17,000 supermarkets nationwide.

The latest joint promotion arrives just in time for the bathing suit season. It offers consumers a free carton of cottage cheese in return for purchasing Libby Lite fruit products. Libby will run a newspaper insert the week of April 28th to announce the promotion. ADA will, in turn, place an announcement on milk carton side panels nationwide throughout the spring and summer The offer ends July 31st.

The American Dairy Association and Dairy Council is a producer funded and directed milk promotion organization serving Pennsylvania, New York and New Jersey. For further information contact the American Dairy Association and Dairy Council's Williamsport office at (717) 323-2552 or dial tollfree 1-800-HOT-MILK

50th anniversary celebration:

SCS becomes reality after Dust Bowl shocks nation

WASHINGTON – Fifty years ago, the U.S. Congress watched as the nation endured two mammoth dust storms that seemed to confirm the dire predictions of a dedicated conservationist.

The storms were no mere local disturbances. For three days in May 1934, topsoil blew from the vast area between the Mexican border and the Canadian border and carried it thousands of miles east over the Atlantic Ocean and onto ships at sea.

"This spectacular dust cloud was the first one in history big enough to retain its identity as it swept across the country from the Great Plains to beyond the Atlantic Coast," said Hugh Hammond Bennett, the conservationist who had first warned congress. It blotted out the sun over a large part of the Nation and sifted through the windows of New York's skyscrapers. When that happened, it began to dawn on the public that something had gone wrong with the land resources of this Nation."

Bennett had first mounted his campaign in the 1920s, warning the nation about the danger of soil erosion Slowly his message was heard, as first a Soil Erosion Service was established in 1933, and Bennett was named its director.

The second great dust storm in March 1935 proved to be all the stimulus Congress needed. The storm blew soil particles from Kansas, Colorado, Texas and Oklahoma over Washington and other eastern cities. And Congress responded by passing the Soil Conservation Act of 1935 fifty years ago today.

Over the years, the Soil Conservation Service has enjoyed the good will of both Congress and the public. The current national program for soil and water conservation adopted by USDA gives priority to reducing excessive soil erosion on crop, pasture, and forest lands; conserving water used in agriculture; reducing upstream flood damages; and improving water quality. These priorities were developed in response to the Soil and Water Conservation Act of 1977.

Compared to the poor conservation record of the 1930s, current programs are indeed encouraging.

Conservation Tillage: Under the 327 million acres planted to crops in 1984, farmers used conservation tillage on nearly 97 million acres. This is tillage that retains at least 30 percent residue cover on the surface soil. Farmers use the no-till method in which only a narrow seedbed is disturbed for planting on 14 million acres. Pennsylvania farmers were quick to adopt conservation tillage, using it on 1.36 million acres or 44% of the State's cropland.

Targeting: By targeting funds and technical staff to the Nation's most serious natural resource problems, SCS, the Agricultural Stabilization and Conservation Service (ASCS), and other USDA agencies helped reduce soil erosion and save water in 44 states. During the past year, farmers and ranchers reduced soil erosion in targeted areas by nearly 7 ton per acre, and water losses by 540,000 acre-feet through increased application of soil conservation and water management practices. Fourteen counties in southeastern Pennsylvania are in the targeted Mason-Dixon Erosion Control Area.

Small Watershed Projects: SCS began construction on 20 new Public Law 83-566 Small Watershed Projects in 1984; approved planning for 34 projects; authorized installation of 19 projects; and completed construction on or closed out 11 projects. This State has 31 approved watershed projects–5 in the planning stage and 26 in operation.

Mine Reclamation: SCS assists landowners in reclaiming abandoned coal mine land under the Rural Abandoned Mine Program (RAMP). Pennsylvania leads with the largest amount of abandoned strip mine land in the Nation. By the end of 1984, SCS in Pennsylvania had eliminated 162 health and safety hazards, carried out 722 acres of erosion control, and 680 acres of visual improvement, and improved water quality in over 83 miles of streams and 9,725 acres of lakes. A total of 78 RAMP projects completed in the six-year history of the program had a total cost of $10.8 million in the Keystone State. One-fourth of the RAMP work in the Nation was completed in Pennsylvania.

Rural Development: In fiscal year 1984, SCS assisted over 29,000 units of government in rural communities to control flooding, reduce roadside erosion, improve the landscape, and preserve historical and cultural resources. Much of this work was accomplished through multicounty resource conservation and development projects which operate with SCS guidance. RC&D areas cover 35 counties in the Keystone State.

With other USDA agencies and Rural Development Committees, SCS conducted rural development workshops for locally elected officials across the State.

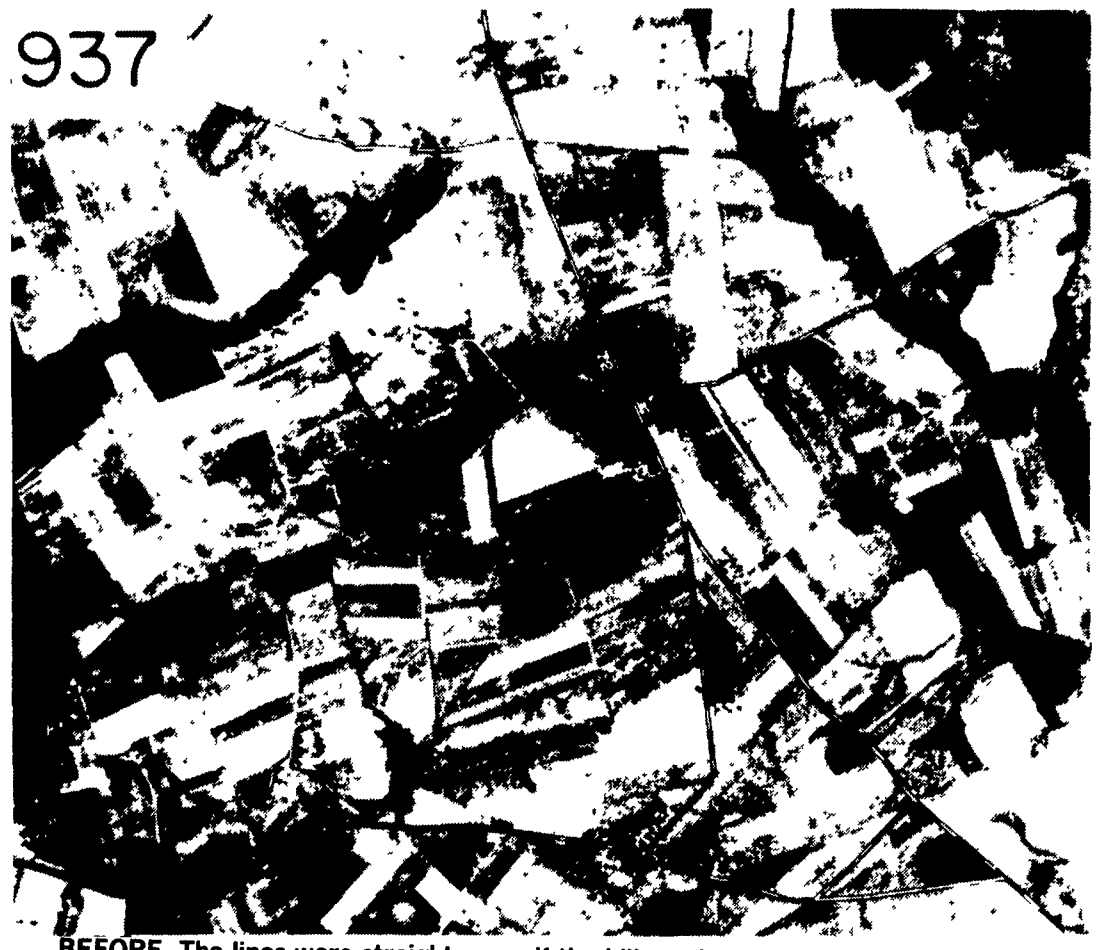
Water Quality Program: SCS provided technical assistance in developing 1,532 water quality plans. By the end of fiscal year 1984, SCS had signed contracts with over 1,200 individuals to protect water quality by applying conservation on over 170,000 acres in areas such as the Conestoga River Rural Clean Water Project in Lancaster County. The Service is also accelerating help in farm waste management as a part of the Chesapeake Bay cleanup.

Emergency Assistance: Under Section 403 of the Agricultural Credit Act of 1978, SCS obligated an estimated $2.8 million in watershed emergency assistance to help Pennsylvania. Other funds from this authority were being used in Mississippi, California, Arkansas, Utah, Connecticut and other states to repair damage caused by floods and other natural disasters.

Farmland Inventory: SCS leads USDA efforts for inventorying the Nation's Important Farmlands. SCS has published Important Farmland Maps which located Prime and Unique Lands for 911 counties, 15 of which are in Pennsylvania. Another 374 maps are nearly completed. In cooperation with other Federal agencies, SCS has acquired infrared and black and white aerial photographs covering 94 percent of the continental United States.

Fish and Wildlife: SCS helped land users improve wildlife habitat on one-half million acres of wetland and 10 million acres of upland areas. They also assisted with water facilities benefitting wildlife on 50,000 acres.

Plant Materials: SCS Plant Materials Centers released 14 conservation plants in 1984. The release includes nine grasses for forage adapted to different parts of the country, a legume for forage, wildlife food and erosion control, and four shrubs–one for stabilizing streambanks, one for providing ground cover, and two for providing food and cover for wildlife.



BEFORE--The lines were straight, even if the hills and valleys weren't. No one could say farmers in Lancaster County's Chestnut Level area couldn't plow a straight line, especially after looking at this 1937 aerial photo. Unfortunately, the tillage pattern didn't do much to conserve soil.

AFTER--Today's practices result in a crazy quilt pattern that not only looks colorful from the air, but also reduces soil erosion significantly.

Honey Hollow was first 'total' upland site

DOYLESTOWN – The Honey Hollow Watershed conservation site is the first small upland watershed to be brought totally under water, soil, and wildlife conservation practices in the United States. It was established in 1939 by six farmers living on William Penn Lands in southeastern Pennsylvania who invited the then newly formed USDA Soil Conservation Service to counsel them in controlling erosion.

The Honey Hollow Watershed comprises some 500 acres of farmland with fields, forests, ponds, and streams on which colonial farmers built their substantial and beautiful field stone houses which stand today as testimony to the worth of this soil.

Dr. Hugh Bennett, first Chief of SCS, took great interest of the work of these Honey Hollow farmers and often said to them, "Poor land makes poor farmers; good soils make substantial farmers."

In the spring of 1939, some of the farmers living in this area realized that they had an erosion problem and sought help from the regional office of SCS in Philadelphia. SCS assisted the farmers in developing a plan of soil and water conservation practices for each landowner. Practices were agreed upon and thus the Honey Hollow project took shape and transformed the land during the next two years.

The conservation program has continued ever since by the six farmers each doing his own work but all following the plans and layouts as developed with SCS.

Today, the contour strips lay across all the fields. Sound forestry practices have been observed. Wildlife hedges are lush, full grown, and have produced food and cover for many generations of birds and animals. Five ponds were built and stocked with fish.

In broad terms, the land in Honey Hollow lies secure against the elements and works in harmony with nature.

Dr. Bennett made this statement regarding the historic watershed, "We owe these farmers a debt of gratitude for what they have done. Not only for the soil they have protected, but also for showing us that it can be done as they have done it. In spite of many handicaps and with only limited help, they have put a big program into effect all over their watershed."

This farming area in southeastern Pennsylvania was among the very earliest settled lands in our country. There are three early 18th Century houses in Honey Hollow today. They are presently owned by the Crooks, the

SCS and the budget

Will federal cutbacks hamstring conservation efforts?

BY JACK HUBLEY

HARRISBURG -- Though Pennsylvania remains a an agricultural heavyweight", her weight loss program continues, as more than 100 million tons of soil finds its way to the Commonwealth's waterways each year.

And if the administration has its way, loss of these "liquid assets" may well increase in 1986, says the Soil Conservation Service's state conservationist Jim Olson.

The White House's budget cutting knife proposes to whittle $150 million from the federal agency's current $603 million budget. And of the $453 million remaining, $253 million would be set aside for phasing out SCS programs and personnel, leaving only $200 million for implementing soil saving practices.

Programs to be terminated include the Small Watershed Program, Resource Conservation and Development, Rural Abandoned Mine Program and the River Basin Program.

Programs to be reduced would include technical assistance to landowners (down 40 percent), soil surveys (down 33 percent), and plant materials centers (down 2 percent).

And with these cuts will go a corresponding reduction in conservation on the land, says Olson, noting that the nationwide SCS workforce would be pared from 14,300 to about 5,000 by the end of 1986. Here in Pennsylvania, SCS employees would number 91, down from a current staff of 270.

And Olson points out that such a proposal could have a crippling effect on efforts to clean up the Chesapeake Bay at a time when the need for conservation measures has never been greater.

Jim Olson

In Lancaster County, for example, where mountains of livestock manure play a major role in contaminating both ground water and runoff, personnel at the Lancaster field office would dwindle from seven to a possible one or two, says Olson. And though $395,000 has been earmarked for soil conservation practices in Lancaster County, (practices include construction of manure structures, contour strips, waterways, terraces and others) there won't be sufficient hands on deck to put the money to good use.

Someone's going to have to make a decision about what's not going to get done," says Lancaster's district conservationist Warren Archibald. He notes that his office has received 50 requests for planning manure holding structures since October, and 83 requests for laying out terraces. During the same period a year earlier, the office logged only about one-half this number of requests for each of these services.

To me, this shows an increase in interest, adds Archibald.

Winstead Burdette, the area conservationist for Pennsylvania's 13 southeastern counties, agrees that this is no time to thin the ranks. We're going backward when we should be going forward, he says. He surmises that the state Bureau of Soil and Water Conservation might be expected to pick up some of the slack if federal cutbacks become a reality, "but you just can't train people overnight to apply practices and work with landowners," he emphasizes.

If Congress were to approve the proposal in its present form, says Jim Olson, Americans could expect soil conservation measures to be reduced by three-quarters. Olson places no bets on the outcome.

Most congressmen feel that the cuts are excessive," he notes, "but we all realize that the federal deficit is a tremendous handicap to economic growth. Congress is faced with the almost insurmountable task of providing services while reducing the budget," he concludes.

Penn State soil conservation scientists in on the ground floor of U.S. efforts

STATE COLLEGE – For centuries, American farmers have been plagued with soil losses and resulting lowered crop production due to erosion. In the 1930s, surveys indicated that millions of tons of valuable topsoil continued to be lost through erosion in spite of conservation practices such as contour planting, crop rotations, sod waterways, and reforestation.

In 1935, the U.S. Department of Interior authorized the establishment of 40 erosion control projects throughout the United States. One of these projects, a soil erosion survey, was initiated on land near the Pennsylvania State University campus.

Dr. Austin Patrick, a Penn State graduate employed by the U.S. Soil Erosion Service, now the Soil Conservation Service, worked with Penn State soil and plant scientists in developing a system to measure the severity of erosion on different types of ground cover.

Dr. Patrick and Penn State scientists Dr. Frank Gardner, Dr. Howard Higbee, Dr. Chester Ritcher, Frank Bamer, and J.B.R. Dickey, selected several sites at Penn State which had varying degrees of slope. On these, they seeded numerous species of cover crops in measured strips. Also, selected areas were left free of ground cover for use as a control. A collecting basin was constructed at the base of the plots to hold soil and water runoff. Each basin was designed to collect only the runoff from a particular strip.

The scientists made measurements on the amounts of rainfall and volume of sediment and water collected in the holding basins. From these data, they were able to make accurate comparisons of what cover crops were best or least suited for erosion control.

This early basic research helped develop new concepts in fighting farmland erosion. Researchers used the soil erosion survey plots to study what effects varying amounts of fertilizer would have in developing plants with the root strength to reduce erosion. Other experiments determined what species of cover crops would best withstand rigorous grazing without injury to the plant's capability to maintain a strong root system.

Improved Plant Varieties

As data from these and other experiments were collected and analyzed, it became apparent that improved plant species needed to be developed that had the ability to hold the soil and also yield at acceptable levels. In the succeeding years, scientists developed new and improved varieties of alfalfa, birdsfoot trefoil, and Kentucky 31 tall fescue. Before widespread use, however, all varieties were field tested by Extension agents and cooperating farmers to determine those best suited for different soil types.

Several decades after the erosion survey plots were established, they continued to serve a valuable research function. As newer herbicides were developed, data were collected to measure weed control and its relationship to erosion. Also, one site was used to calculate the

Improved Udder Health

"NuPulse has helped improve our average from 16,000 lbs to 21,500 lbs at 3.6 test in a home bred herd. We've never lost any cows due to mastitis. Our top producer has 29,413 lbs milk, 992 lbs. fat in 365 days. Our udder health is 95% better with NuPulse than ever before. The NuPulse is simple to maintain with no problems."

Harold W Fabian Bethlehem PA
Using NuPulse since 1978

Less Cup Fall-Off and Less Mastitis

"We replaced our old milker with NuPulse MLX. We're not having any fall off problems now. The MLX milks our cows out clean without machine stripping. Udders are more even now. We have not had to buy mastitis medication except to dry treat. We are very happy with NuPulse."

R C Schoemaker Chambersburg PA
48 cows NuPulse MLX since January 1984
herd average 17 000 milk 650 fat

Faster Milking

"We replaced DV300's with NuPulse. I have not had any fall off since. Our cows accepted NuPulse easily. Milking alone I get 1,000 lbs. per hour with 4 units."

Philip L Hege Shippensburg PA

Ease of Maintenance

"Our cows udder health is the best ever. The only mastitis we have is when a cow gets injured. We do our own maintenance. We have been very pleased with NuPulse."

Roe Russell Rome PA
NuPulse since 1979
130 cows herd average 17 000 milk 710 fat

"You can spend more money, but you can't get a better milker."

Donald G Heller Canton PA
60 cows herd average 17 800 milk 613 fat

Dairy Council scores with nutrition education

TIMONIUM, Md. – Dairy farmer funding of nutrition education programs is a case of money being well-spent, according to Gloria Kinney, Ph.D., National Dairy Council.

"Nutrition education is effective," says Dr. Kinney, featured speaker at the annual meeting of Dairy Council of the Upper Chesapeake Bay, held last week at the Timonium Plaza Holiday Inn.

A recent research project, funded by National Dairy Council and conducted by Dr. David W. Johnson of the University of Minnesota, gathered and compared data in a meta-analysis of nutrition education programs and their effectiveness.

Summary of those findings confirms that people who participate in nutrition education know more about nutrition, have a more positive attitude toward eating nutritiously, choose more nutitious foods and show a marked improvement in knowledge of calcium needs, and attitude towards and consumption of dairy products.

National Dairy Council plans a conference in the fall of 1985 to gather top nutrition researchers from across the country, aimed at developing long-term plans for a systematic nutrition education program. The program is to be part of Dairy Councils' expansion from their highly-successful "Food....Your Choice" school nutrition curriculum into more widespread adult consumer education.

Calcium needs, both of women and the general population, continues to command increasing interest among health professionals, according to Dr. Kinney. Recent studies suggest that calcium deficiencies may play a part in hypertension, or high blood pressure, a leading cause of health problems in the adult population.

A Chicago-based teleconference, sponsored in February by NDC, took the latest findings on calcium's relationship to hypertension and osteoporosis to over 5600 health professionals in over 50 locations across the country, via satellite communications.

Dr. Kinney also showed highlights of "Are You At Risk for Bone Disease?", a film on calcium and osteoporosis, developed by Dairy Council and funded through the National Dairy Board and milk promotion checkoff monies. The film, available through local Dairy Council offices, is aimed at women, who have an eight- times-greater- than- men chance of suffering skeletal weaknesses and bone brittleness from osteoporosis.

"Chances are, if you're a woman, you're not getting enough calcium," warns Dr. Kinney, "Just lifting a grandhchild, or opening a window could fracture a vertebrae in an individual suffering from osteoporosis."

Age-related, the brittle-bone disease most critically affects the area of the spine or hip. While there is no way for health professionals to pinpoint at age 30 or 40 the individuals with the greatest risk, certain health factors and lifestyles do point toward greater likelihood of developing osteoporosis.

Women who have their ovaries removed prior to menopause, or who undergo early menopause, are at a higher risk. Alcohol consumption, smoking, low calcium intake diets, and lack of physical activity are tied to the disease risk as well.

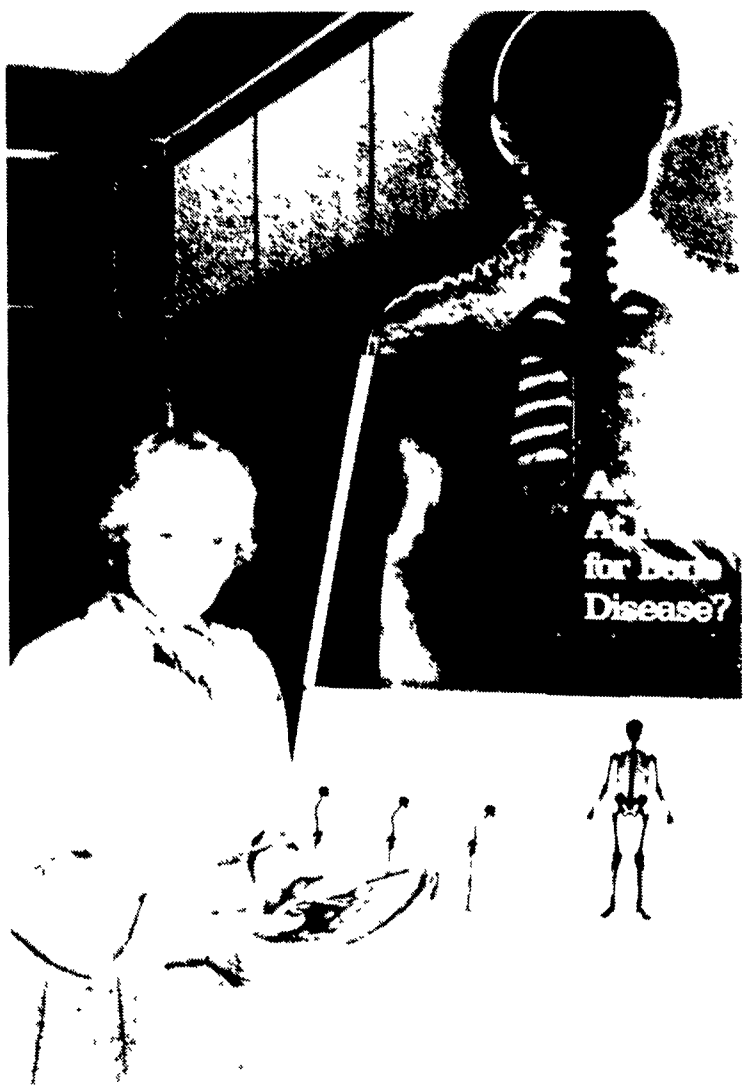
Introduction of a workplace nutrition program, "Life Steps," stirred questions from health professionals in the audience.

Life Steps is designed to combine a health problem detection program, via screenings and tests, with education on preventing problems through proper food choices and physical fitness. It's geared to education people at work, a potential audience of 91 million employees, or 70 percent of all adults between the ages of 18 and 65.

An estimated 33 million Americans are obese, and NDC plans to use their Life Steps weight control program for the initial entry into workplace nutrition education. The weight control program is individualized, using behavior modification and emphasizing physical activity.

During the annual meeting, a presentation of appreciation was made to LeRoy Norfolk, former treasurer of the Baltimore-based Dairy Council. Awards also went to director Carolyn Thompson, for ten years with the agency, and to secretary Ann Spraker, for five years of service.

Dairy Council of the Upper Chesapeake Bay, Inc., is an affiliate of the Southeast United Dairy Industry Association, Inc., and National Dairy Council.



With National Dairy Council's Dr. Gloria Kinney is one of the nutrition organization's educational displays on calcium and bone health.

LeRoy Norfolk, right, was honored by Dairy Council of the Upper Chesapeake Bay for his past service as treasurer of the nutrition agency. Presenting the miniature hand-made milk stool award were director Carolyn Thompson and president Jesse Burall.

Berks wool sales

READING – Berks County's sheep growers received about $13,780.00 for their 1984 sales of shorn and unshorn lambs. In 1983, wool incentive payments totaled $17,876.91.

ASCS issued wool checks to 115 local farmers on April 10, 1985.

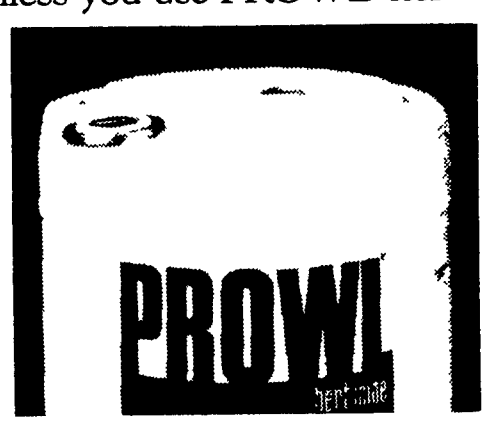
FACT

PROWL® effectively controls triazine-resistant weeds.

Triazine-resistant pigweed and lambsquarters can pose a severe threat to your crop—unless you use PROWL® herbicide. PROWL gives you effective control of these resistant weeds, plus velvetleaf, fall panicum, and giant foxtail and 19 other grasses and broadleaves. Do NOT incorporate PROWL on corn.



CYANAMID
Agricultural Division

PROWL. YOUR BEST HERBICIDE VALUE.

Always read and follow label directions carefully

Farmers should be careful to maintain ACR eligibility

WASHINGTON — The 1985 acreage reduction and land diversion programs have been designed to remove a certain percentage of cropland from production to conservation practices.

By diverting crop acres, the programs are expected to control excess wheat, feed grain, cotton and rice supplies and maintain a better balance between supply and demand.

The Agricultural Stabilization and Conservation Service has established rules to determine the eligibility of cropland taken out of production to meet the acreage reduction requirements.

First, ACR land must have been devoted to row crops or small grains in two of the past three years. Farmers need to be sure that their ACR land has actually been planted within the specified time frame. The land can also be acres designated to ACR under the previous year's acreage reduction program.

After meeting their acreage reduction requirement, program participants are required to establish and maintain approved conservation practices on their ACR to protect the land from wind and water erosion.

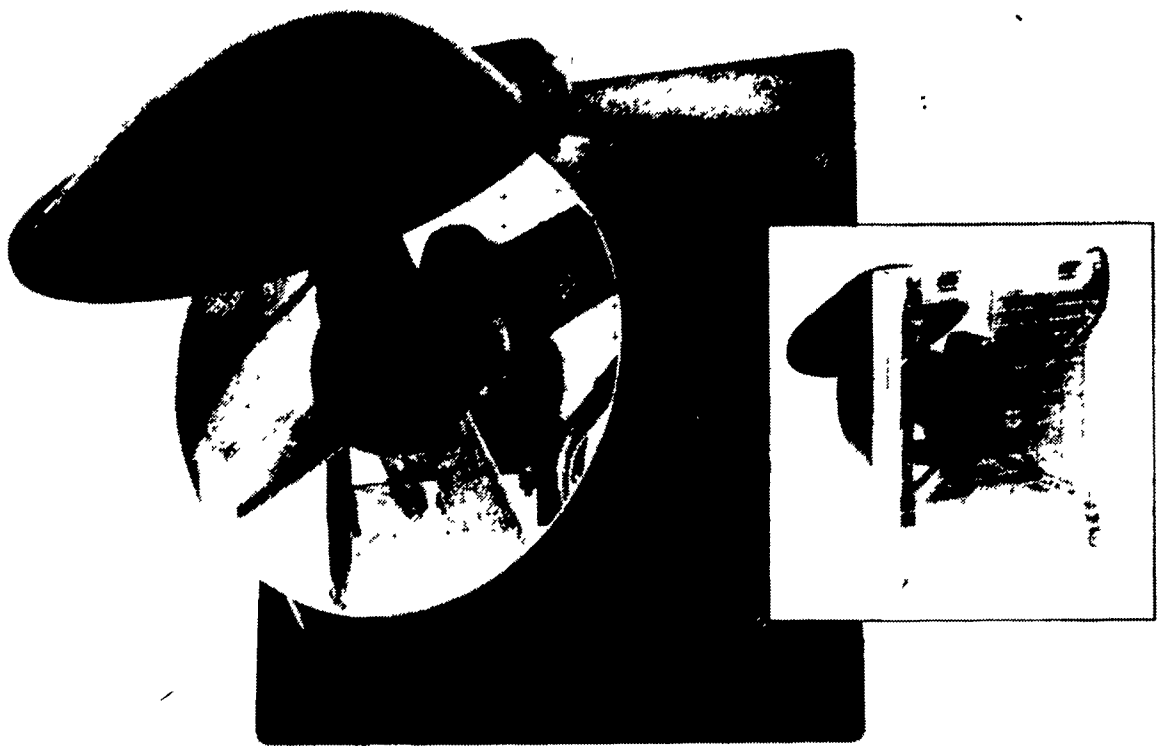
Approved conservation practices include annual, biennial, or perennial grasses and legumes, volunteer stands other than weeds, small grains and crop residue use of no till, or minimum till practices.

These acres also may be devoted to a permanent vegetation cover such as trees, sod waterways, filter strips and other conservation measures. Additional cover or plantings, such as those benefiting wildlife, may be developed as long as the practice meets approved erosion control standards.

Under the 1985 farm program contract, approved cover crops or conservation practices must be established on ACR land as soon as possible after the normal planting period for spring crops but not later than June 20, 1985. The ASCS official said progam participants who do not meet their ACR obligations will be out of compliance and could lose program benefits.

CHORE-TIME SPECIALIZES IN COMPLETE VENTILATION SYSTEMS

Featuring The Corrosion-Resistant RLX Fans



MODEL	CATALOG NUMER	SIZE	RPM (1)	MOTOR HP	MOTOR VOLTS	MOTOR AMPS	PERFORMANCE (cfm) (2) .0" SP	.05" SP	.10" SP
14RLX	7020	14"	1750	¼	230	.75	1750	1660	1590
18RLX	6600	18"	1710	⅓	220	1.30	2975	2780	2600
24RLX	6291	24"	1625	⅓	220	1.90	5450	5100	4750

(1) Typical RPM as observed under "normal" operating conditions. (2) Air deliveries are for unit with all fixtures in place.

Chore-Time's 14" RLX Fan for the sidewall or the pit...

Chore-Time's 14-inch RLX Fan is ideal for use in smaller confinement areas such as farrowing and nursery chambers for hogs, and smaller veal calf barns To provide the delicate air control required by these smaller areas, the variable speed fan offers a cfm range of from 150 to 1660, both measured at 05 inches static pressure The 14RLX also saves energy by holding its operating efficiency as its cfm is reduced And, the fan offers all the corrosion resistance, strength, and durability of Chore-Time's famous RLX fan family

Chore-Time's 18" & 24" RLX Fans For the sidewall or the pit...

Chore-Time's 18-and 24-inch RLX Fans establish new standards in corrosion resistance The strong, dense RLX housing is made of the same durable material used for truck body parts and canoes It simply will not corrode And it won't splinter like fiberglass, even in cold weather The streamlined, vacuum-formed housing completely eliminates corners which might collect dirt and produce eddy currents, both restricting air flow The smooth surface cleans easily

MORE FEATURES:

Die-cast Aluminum Blade gives long use with proven efficiency. **Blowout Hood** does not restrict air movement like louvers do; also have longer life, lower maintenance. **Stainless Steel Motor Mounts** give additional insurance against corrosion. These features combine for an efficient, long-life unit.

3 YEAR WARRANTY ON ALL RLX MODELS

Soil Conservation

(Continued from Page A21)

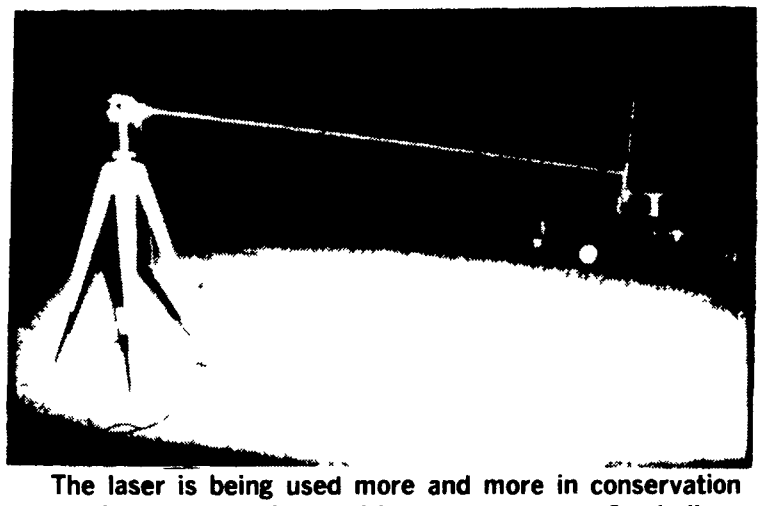
amounts of herbicide residue and fertilizer elements that were washed from the strips due to rainfall.

This work conducted by Dr. Patrick and associates, coupled with additional research in soil and plant science, changed farming practices and significantly reduced soil erosion. Newer and improved legume and grass varieties replaced the traditional red clover as a cover crop. These stands survived much longer which resulted in a change in crop rotation practices. Farmers were tilling less and at the same time improving crop production. This also lowered soil erosion.

Crownvetch Discovered

At about the same time Dr. Patrick was developing erosion control research, a former Penn State agronomist, Fred Grau, discovered a little "flowering weed" growing wild on a Lancaster County farm. This "weed," called crownvetch, has saved taxpayers more than $40 million in erosion control during the last 30 years.

Grau brought crownvetch seeds to Penn State, and, through breeding, developed Penngift crownvetch, an attractive roadside conservation plant. Used on more than 1,500 miles of highways throughout the Commonwealth, the plant has received worldwide attention in reducing bank erosion, stream sedimentation, weed control, and maintenance costs by highway transportation officials.



The laser is being used more and more in conservation work, both to save time and improve accuracy. Grade lines can be set by laser, permitting earthmoving equipment operators to quickly establish construction grades. This extemely efficient technology is important in soil conservation practices which use very low grades, such as inches per 100 feet, as in drainage and terrace work.

Continued Research

Although farming practices have changed drastically during the last 50 years, agricultural scientists continued to seek new ways to control erosion while developing systems to improve farm income.

Penn State agronomists, working cooperatively with Soil Conservation Service personnel, Extension staff, and farmers, are measuring soil losses under no-tillage conditions.

Extensive work is being carried out using crownvetch to control erosion and improve soil structure in no-till crop production. Scientists are also studying ways to reduce the runoff of fertilizers and pesticides that are contributing to the pollution of many streams and rivers.

The pioneerings efforts of Patrick and other soil and plant scientists have made their mark on today's erosion control programs. The more sophisticated basic and applied research now being carried out also will be termed pioneering efforts 50 or 100 years from now. Without progress, we lose our capacity to produce food at the least possible cost to the consumer.

This Hellam Township, York County, farm is laid out in proper contour strips in 1941, with the cooperation of SCS agents. The farm, though now terraced, is still laid out along the same lines.

Honey Hollow Farms

(Continued from Page A20)

August 8, 1969, the U.S. Department of Interior declared the Honey Hollow Watershed a National Historic Landmark. To this day, this remains the only agriculture watershed in the Nation declared a National Historic Landmark.

Another important aspect of this watershed is the establishment and operation of a historic nature and conservation education center. This center has a permanent staff and provides educational training to school children on the value of agriculture and conservation to their lives. The Honey Hollow Watershed is within one-half day's drive of over 30 million people. Thus, the educational potential of this small wateshed is limitless. The watershed area also houses the Northeast regional office of the National Association of Conservation Districts.

To the farmers who live in the valley, their desire to keep it in agriculture has been met. They are proud of their valley. It has beauty, it has the potential for educating countless of children and adults about agriculture and conservation of natural resources. The farmers are dedicated to preserving this heritage forever.

Phillips, and the Fittings. The lands on which the three houses are located are watered by Honey Hollow Creek and are lands which have been in use as farms from the earliest years of the 18th Century.

During the 35 years since the creation of the Honey Hollow Watershed, the farmers in the valley have faithfully followed the conservation practices.

However, with the swift growth of population and the resulting encroachment by development of farmlands of the Northeast, the Honey Hollow Watershed is threatened by urbanization.

Its lands could have been sold for housing and the outstanding conservation wowrk would have been destroyed for now and forever. The lands were also threatened by a proposed limited access highway and a 500 KV high voltage powerline.

To combat these continued threats, the farmers of the valley banded together vowing that the land would remain in agriculture. In order to assure that action, they again sought advice from USDA. The result was that on August 8, 1969, the Honey Hollow Watershed was placed on the National Register of Historic Places and on

FmHA reforms proposed

WALTHILL, NE — A comprehensive proposal to restore the Farmers Home Administration (FmHA) to its original mission of providing modest loans to efficient family-size farms was recently released by the Center For Rural Affairs, a farm policy analysis group located here.

"The FmHA Family Farm Reform Proposal" is the result of several years of monitoring FmHA's policies and helping FmHA applicants and borrowers, according to Center spokesperson Gene Severens.

The plan has three parts, Severens said: strengthening FmHa's traditional family farm programs and reducing those that are open to bigger farms, giving efficient beginning farmers first crack at buying land FmHA has taken over from its borrowers, and improving FmHA procedures for loan servicing, processing, and appeals.

The reforms would save money, Severens said, and although they are long-term, many would help family farmers survive the current credit crisis.

The plan's biggest budget savings involve measures to scale down FmHA's emergency lending. Reforms include limiting Disaster Emergency (EM) loans to family-size and reducing the EM loan ceiling from $500,000 to $200,000 per disaster.

"Our large federal deficit means we must overlook at the purposes and costs of FmHA's programs," Severens said. "FmHA can't be the 'lender of last resort' for every farm in America. A $500,000 federally subsidized loan is simply too generous and should be cut back."

"We also need to limit loans to family-size farms," Severens said, "I don't see the public interest in providing subsidized loans to some of the country's biggest farm operations."

The plan also calls for bolstering those FmHA programs which are already limited to family-size farms–the Farm Ownership (FO), Operating Loan (OL), and Limited Resource (LR) programs, The LR program provides modest interest sibsidies for beginning FO and OL borrowers.

The Center's plan differs sharply with the current administration's emphasis on guaranteed loans, Severens said. We want to limit guaranteed loans to 10 percent of all FO and OL lending, he said. Guaranteed loans are usually about three times larger than average direct loans and thus the same amount of money benefits only one-third as many borrowers, Severens explained.

"In the heat of the crisis, policy-makers are planning to permanently replace direct FmHA lending with lender-oriented loan guarantees, and in the process they're dismantling decades of carefully thought out programs.

"Guaranteed loans are being praised as the best answer to the credit crisis, but they turn over public purposes to private banks and PCAs," he said.

Another part of the reform plan would make FmHA favor family-size farms in selling land acquired by the agency. Those provisions include limiting the lease or sale of FmHA farmland inventory to those eligible for FO and OL loans, with priority given to LR borrowers, and authorizing a separate, temporary use of LR/FO funds for LR borrowers to buy FmHA land, Severens said.

The reform plan also addresses FmHA procedures such as loan servicing, processing, and appeals, he said.

Loan servicing changes include setting minimum standards for the release of living and operating expenses for distressed borrowers and temporarily exempting from foreclosure minimal farm assets during certain emergencies.

FmHA appeal reforms include greater use of informal meetings to settle disputes coupled with formal hearings with independent administrative law judges when informal hearings don't work, Severens said.

The "FmHA Family Farm FmHA Reform Proposal" is available from the Center For Rural Affairs.

BEST IN DESIGN, PRICE AND EXPERIENCE

State DHIA adds two managers ... will add two more in June

UNIVERSITY PARK — The Pennsylvania Dairy Herd Improvement Association is trying a new management concept — and will add four new "region managers" over the next few weeks to implement the new approach.

Previously, the state DHIA had two "fieldmen" who served as a "liaison" between the local DHIA supervisor and the state DHIA office.

The two men who filled those positions — Jay Wilson and John Kline — have been reassigned as region managers in charge of the Northwest and Northeast regions of the state.

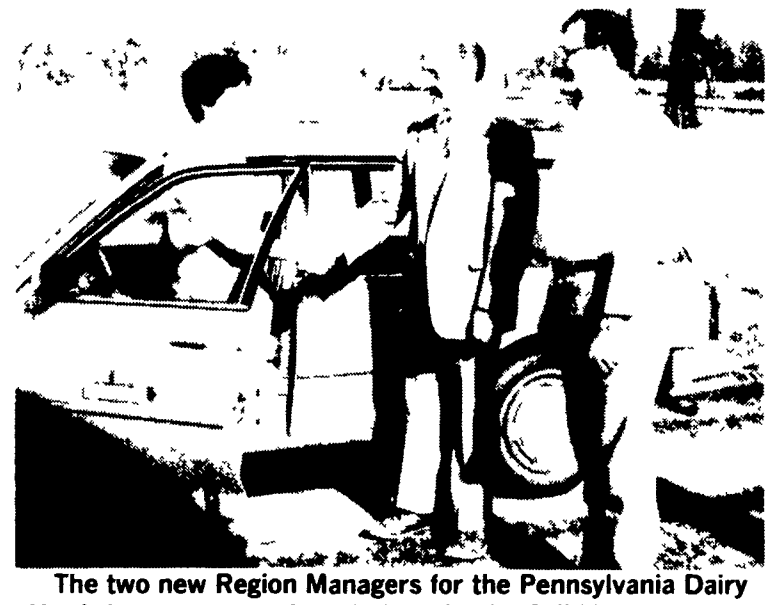
Filling two new positions are Linda Scibilia, who will handle the Southeast region, and Robert Baxter, who is in charge of the Southwest. Two additional staffers will be added by June 1 to make a total of six region managers throughout the state.

The new region managers are to:

- Conduct field training of DHIA supervisors before the supervisor tests his first herd.
- Instruct supervisors in correct reporting procedures.
- Provide advice to local DHIA directors.
- Attend all local board meetings in their region.
- Develop and implement programs to increase total DHIA enrollment.
- Carry out DHIA verfication tests.
- Conduct on-farm consultation with DHIA members.
- Design and conduct one-day workshops for dairymen.
- Contact each DHIA supervisor in the region by phone or personal visit every two weeks.
- Develop and implement a program so that every DHIA herd is tested every month.

"With six managers, we'll be able to spend a little time in developing new training programs," said Raymond K. Pruss, DHIA Administrative Assistant. "In the future, we should see a better trained and educated supervisor."

The increased contact, he added, should improve communications, and help solve herd problems more quickly.



The two new Region Managers for the Pennsylvania Dairy Herd Improvement Association, Linda Scibilia, left, and Robert Baxter, right, get a word of encouragement from DHIA Administrative Assistant Ray Pruss, before beginning their duties.

There's nary a hair out of place at

Penn State's Little International

BY DONNA McCONAUGHEY
Staff Correspondent

STATE COLLEGE — The Ag Arena at the Penn State University served as the site of the 1985 Little International sponsored by the college's Block and Bridle Club. Complete with white picket fence and gold backdrop for picture taking, this year's "Little I" took on a Louisville look.

The hard work of the college students was evident in both the excellently presented animals and the neat, bright appearance of the Ag Arena. Many hours of effort were invested by all of the students of the Block and Bridle Club (B&B), the largest club on Ag Hill.

The winner of the coveted grand champion overall showman honor was Lisa Dobrosky of York county. Lisa exhibited her Dorset ewe to claim the championship in the sheep division. She went on to show a hog, horse, and beef cattle with expertise to place her ahead of the more than 120 other exhibitors.

Lisa is the daughter of Mr. and Mrs. Tony Dobrosky and has been involved in nearly all of the B & B activities. She was also very active in 4-H and won the 1981 National 4-H Meats Judging Contest. An English major, Lisa is copy editor for the "Ag Activator" and hopes to pursue a career in ag journalism after graduation this year.

Reserve champion overall showman honors went to Brian Patz of Greensburg, Westmoreland county. Brian's performance was outstanding as he participated in his first Little I. The son of Don and Mary Bowman, the freshman animal production major was very active in 4-H and showing beef cattle.

Another freshman captured champion showman honors in the swine division. Dave Blank of Chester county showed a hog for the first time and swept the show. Dave's background prior to coming to Penn State is in the dairy field.

The champion horse showman hailed from western Pennsylvania. Chris Grant of Dubois had experience in showing horses prior to Little I. He has been active in the 4-H horse program and has exhibited quarterhorses. Chris also captured the champion horse fitter award for the show.

In the sheep show Darlene McConaughey of Indiana county claimed the top fitter honors with her Suffolk ewe. She had won reserve champion sheep fitter honors in the 1982 Little I.

Mitch Funk won the champion swine fitter award for his efforts with a Yorkshire. Judge, Ray Meyer of York County commented on the extreme cleanness of the animals exhibited, particularly the Yorkshires.

Senior, Blaine Clowser of Armstrong county was named the champion beef fitter for his efforts on a Polled Hereford. Blaine was also named champion hereford showman.

The judges for the 1985 Little International commented several times on the difficult job in placing the students because of their high levels of expertise. Occasionally a class would seem to "last forever" as the judge waited for one of the students to make a mistake because the placings were so close.

This year's judges were: Alleghany county agricultural agent, Ann M. Swinker to place the horse exhibitors, Robert E. Calvert as sheep judge, Mercer county agricultural agent, Ray Meyer of Pennfield Corporation who judged the swine show and Mallory M. Mort from Gallagher's Farm who placed the beef classes.

With white picket fences and colorful banners, Penn State's Ag Arena was dressed in her holiday best for this year's Little International Livestock Show.

In each of the four species, recognition is also given to a "hard working individual". These awards are selected by the show superintendents and are designed to recognize students who may not have won a top award but have invested much time and effort.

This year's winners were: Sheep - Nancy Diehl; Swine - Darryl Reiner; Beef - Ronald Seils; Horse - Matt Schnader.

One of the highlights of the banquet which follows the Little I is the presentation of the Glenn R. Kean Award. This award is presented to the student who exemplifies the professor in both attitude and action. The winner is selected by the seniors of the club. This year's recipient was Robert Livingston of York county. Bob was the 1985 Little I assistant show manager. An active 4-H'er, Bob has exhibited beef cattle and claimed awards such as the reserve champion market steer honors at the 1979 Pennsylvania Farm Show. He has participated in the National 4-H Commodity Marketing Symposium and has attained the Keystone Farmer Degree.

The 1985 Little I was dedicated to Susan Riglin, a secretary in the Department of Dairy and Animal Science. Admired and loved by the Ag Hill students, Sue is noted for taking the time to help them solve problems. "She's always around when you need her", stated show manager, Keith Bryan at the banquet.

Also honored at the banquet was the distinguished Alumnus, Louis (Mick) Colvin. Mick is very involved in the Certified Angus Beef marketing program and currently serves as its director.

Mick shared some encouraging comments with the students and their families who attended the banquet. "Let's face it, parents are concerned about sending their kids into the agricultural field," said Colvin. "However, with people like these students addressing the problems with their intensity and go-get'um attitude I am confident that we will move forward." He emphasized the importance of preparing future leaders to address the industry's problems.

Following are complete "Little I" results:

HORSE AWARDS

Champion Horse Showman Chris Grant Reserve Champion Horse Showman Leslie Weikert Champion Horse Fitter Chris Grant Reserve Champion Horse Fitter Laura Reed

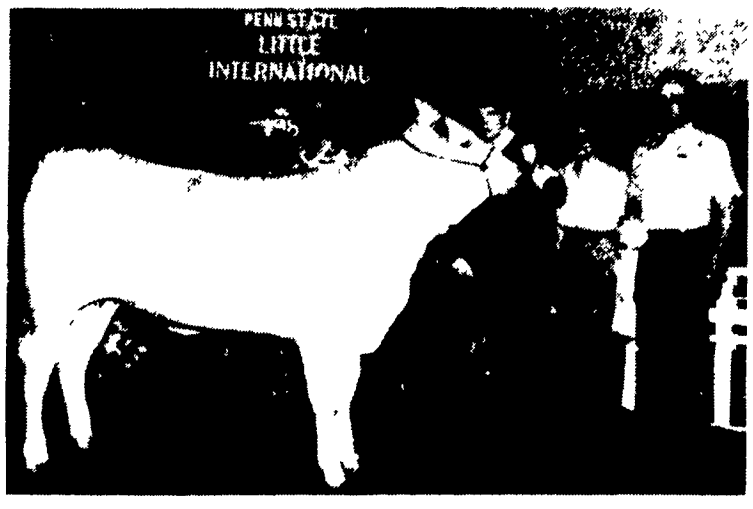
Star of the show was York County's Lisa Dobrosky, named grand champion overall showman. Presenting the award is Sue Riglin.

The championhorse showman award went to Chris Grant of Dubois.



Reserve champion overall was Brian Patz of Greensburg. Also pictured are show manager Keith Bryan, and Brian's parents, Donald and Mary Bowman.

David Blank of Chester County took champion swine showman honors.

Maryland sheep and wool festival set for May 4-5

WEST FRIENDSHIP, MD – Mention of the 12th annual sheep and wool festival immediately conjures up sheep shows and craft people. But, according to Mary E. F. Streaker, general chairman, this is only the beginning of the image.

."Actually," she says, "the festival is an extension of the philosophy of the Maryland Sheep Breeders Assoc.–to provide an opportunity for the sheep producer to market his wares and for the consumer to purchase such commodities in a convenient manner."

Dates for the festival are May 4 and 5. Location is the Howard County Fairgrounds, West Friendship, Md., just I-70. This unique festival is believed to be the largest such event in the country, hosting more than 10,000 last year.

Maryland Sheep Breeders Assoc. was formed many years ago as a non-profit organization. Aside from the fellowship of those engaged in a similar agricultural pursuit, perhaps the foremost purposes were to operate a wool pool and hold a spring market lamb sale.

The wool pool, held each June in Timonium, collects, grades and sells the annual clip to one mill, thus affording the producer a market for his wool. Traditionally, the organization held a market lamb sale each spring, again to provide a market, this time for meat animals. This since has evolved into a feeder lamb sale and a carcass contest.

Under sponsorship of the Maryland Sheep Breeders Assoc., the festival began 12 years ago at Carroll County Fairgrounds. Many of the participants have been, and are, both producers and crafts people.

Hand spinners had for some years haunted the wool pool for fleeces, especially naturally colored ones, which, incidentally, are treated as 'reject' at the pool since colored wool is unacceptable to the manufacturer. The practice resulted in so much confusion that the wool pool authorities 'invited' the spinners to go 'elsewhere'. The 'elsewhere' became the festival, where both white and colored fleeces were offered. This still is the custom, but a fleece competition has now been added. Hand spinners now buy their fleeces at the festival, or make arrangements with producers to visit their farms to obtain wool.

As the festival grew, a larger location was sought and the Howard County Fairgrounds, West Friendship, became home. A huge building houses more than 100 crafts, but competitions such as fine arts, garment and skein and fleeces. The availability of so many buildings guarantees both participant and spectator an 'under-roof' situation.

Activities include shows for white wool sheep, natural colored sheep, purebred Romneys and feeder lambs. An auction of breeding sheep was included last year and will be a featured attraction in 1985. More than 500 sheep and lambs were penned at the fairgrounds last year.

In addition to the sheep brought to the festival to compete in the shows, representatives of more than 30 different breeds of sheep will be displayed in one barn. An effort is made to exhibit so-called "exotic" breeds not normally shown at county and state fairs.

A welcome addition last year, according to Mrs. Streaker, was the lamb cook-off contest, to be repeated this year.

Other activities include a shearing contest, working sheep dog demonstrations, lamb cutting demonstrations, fashion show, king and queen contest, spinning contest, sheep to shawl contest, 4-H and FFA sheep judging contest.

"If it has to do with sheep or wool, we will cover the subject," promises Mrs. Streaker. "There truly is something for everyone."

Admission and parking are free. Grounds will be open from 9 a.m. until 6 p.m. both days.

Breeder benefits from Jersey genetic recovery program

COLUMBUS, Ohio – When Tom Cooperrider was about to graduate from Ohio State University, he was pretty sure he wanted to return to his father's Jersey dairy farm. "But I didn't want to do it unless they were registered," he said.

At the same time, Dick Kellogg, a Genetic Recovery agent for The American Jersey Cattle Club, was visiting unregistered Jersey herds in Ohio's Licking County and stopped in at the Cooperrider dairy near Croton.

Tom's father, Theron, had always milked Jerseys, but registration papers were never important to him. When Tom met Dick Kellogg, he enrolled in the Genetic Recovery program without a second thought.

Genetic Recovery identifies and records unregistered purebred Jerseys. Since its adoption in 1975, over 75,000 Registered Jerseys have resulted.

"We had records going back I don't know how many years," explained Tom. "Dick came by in 1978, sorted it all out and got us organized."

The result was Tom's dream: his Buttercrest Registered Jersey herd. Milk production has increased dramatically, the herd has gone from Owner-Sampler to official DHIR testing, all cows are scored under the AJCC's Type Traits Appraisal Program and Buttercrest Jerseys are promoted in each month's issue of the Jersey journal.

Where surplus heifers used to be sold at common market prices, promotion and top genetics have encouraged buyers to look for Buttercrest consignments at top state, regional and national Jersey sales.

In addition, having well bred and well managed Registered Jereseys has captured the attention of several national artificial insemination organizations. Cooperrider has contracted for the sale of young bulls with Select Sires in Ohio, American Breeders Service in Wisconsin and Carnation Genetics in California.

Top genetics and top management have combined to produce the top Jersey herd in Ohio for milk production. The most recent rolling herd average on the 123 cows was 14,445 lbs. milk, 5.1% fat, 729 lbs. fat, 3.8% protein and 553 lbs. protein.

All animals, including heifers, are bred AI, using only the top high PD bulls and selected young sires. An agressive feeding program is followed which includes alfalfa hay, corn silage, wet brewers grain and a pelleted grain. The milking cows are fed 8 times a day.

"Everything is going quicker and better than I thought it would," mused Tom. "It's hard to understand why everyone with unregistered Jerseys doesn't jump on the Genetic Recovery bandwagon."

York wool sales

YORK – York County's sheep growers received about $19,559.50 for their 1984 sales of shorn wool and unshorn lambs, according to Harry Wolf, chairman of the Agricultural Stabilization and Conservation Service. In 1983, wool incentive payments totaled $14,254.

ASCS began issuing wool payment checks to 118 local farmers on April 9, 1985.

Everything's running smoothly on RiceCrest Farms

WENDY WEHR

CHAMBERSBURG — Did you spend your morning fixing that broken-down gutter cleaner?

Your lunch hour trying to corral that sick cow for the vet?

Your afternoon struggling with that heifer who calved in the free-stall pen?

Your suppertime hurrying through the milking, skimping as you wash off the cows because you're working by yourself tonight, even though it's a two-person job?

And your evening worrying about your cash flow problems and wondering why you never got to any of those jobs on your "to do" list today?

Think about it a minute. Are you running your dairy farm, or is your dairy farm running you?

Fred and Dale Rice, operators of RiceCrest Farms, Chambersburg, have taken this question to heart. As they've established their Franklin County dairy operation over the past five years, they've made sure that their farm isn't running them ragged.

Since they formed their partnership in 1980, the Rice brothers have built up a 150-cow registered Holstein herd.

And as they built up that herd they literally did a lot of building, constructing dairy facilities that could give them what they wanted — smoother management and maintenance, profitability with low capital investment and free-time they could count on.

Three of their building projects in particular — the gravity manure system, a maternity/sick cow area, and a drive-through feeding building — have pleased Fred and Dale and have also received a lot of favorable attention from fellow dairy farmers and Extension personnel.

"Dale and Fred Rice are top-notch fellows who plan everything out," says Franklin County Extension agent Philip Wagner. "They gather a lot of advice and information before making a move, and they cost it out beforehand, too."

The Rice brothers are much more modest about their approach to dairying, but they do agree that they have created an operation that works for them. "It's definitely an efficient operation," admits Fred "We don't spend all our time working."

Self-locking stanchions

The drive-through feeding building with 104 self-locking stanchions was one of the first major building projects that the two undertook.

In this feeding building, the high cows in the herd are top-dressed in addition to their total mixed ration, so the drive-through feeding saves time and labor.

And the self-locking stanchions and gate design enable one person to corral a group of cows, simplifying reproductive and veterinary work on the herd. Every morning, for instance, Dale goes through and chalks tailheads for heat detection.

The Rice brothers included a sprinkling system in the building, too. Water from small spray nozzles keeps the cows cool. "It helps keep the cows eating over the hot spells," says Fred.

Before completing their design, though, they did look at a lot of other buildings, say Fred and Dale. And they talked over options with an Agway engineer and used a lot of Extension information, both from the local county agent and from the Penn State ag engineers.

"I'm on a campaign to have farmers thinking of restraint and handling facilities as something that will help them improve productivity without increasing their costs," says Penn State Extension ag engineer Bob Graves. Graves has worked often with the Rice brothers and uses their feeding area as an example of "how to do it right."

If you want a 14,000-pound cow to become an 18,000-pound producer, says Graves, you've got to take more care with maternity and treatment.

Maternity pens

Graves also likes the maternity/treatment area that Fred and Dale have created in the bottom of the old bank barn on the farm.

"They started with some pretty old facilities there," says Graves. "What they've done is a good example of modifying an existing facility and making additions that will give them immediate payback."

During the winter and spring of 1984, the Rice brothers gutted the lower part of the bank barn and built five box stalls. They both say the pens are a big benefit.

"If a cow gets a sore foot, we can get her off the concrete," comments Fred. "Or if a cow goes off feed or milk, she gets pulled in here so we can watch her a little closer."

Cows and heifers are also put into the pens before they're ready to calve, although in the summertime they're allowed to freshen out in pasture.

Fred and Dale say the maternity pens and the other building projects on the farm were made possible in part by a seven-year farm employee who was a terrific welder, mechanic and carpenter. Using their ideas, he built all the gates and headlocks in the maternity area.

RiceCrest Farms is a successful dairy venture in the midst of Franklin County dairy country.

Gravity-flow manure handling

Another low-investment, high-return project for the Rice brothers was the installation of a gravity-flow manure system. This, like many of the other additions to the dairy operation, was undertaken with the help and advice of a variety of people.

Fred says they looked at a step-gutter system on a Lancaster County farm for some ideas, had the local conservation district design the manure storage, and gathered information about gravity manure handling from Graves at Penn State as they attempted to devise something to meet their needs in 1983.

"We wanted to design a system for all the buildings," says Fred, but they didn't want to spend the money on or put up with the mechanical breakdowns of ram pumps.

In their system the manure flows by gravity through long, level, four-foot-wide by four-foot-deep gutters. At points along the system an 8-inch block, or step, holds back the liquids and pushes out the solids.

"The level floor is hard for people to understand," says Fred, but the system does work. From the zero-slope channel, the manure flows into the storage, at a point six feet from the bottom.

The manure pit has a concrete bottom and sides and holds about half a million gallons, or five-month's storage for the RiceCrest operation.

"Their manure system is an innovative application of the gravity-flow channel concept," says Graves. Because the buildings on the farm are on such a level site, he explains, their only other alternative would have been a mechanical system, with all the other problems associated with it.

He adds that they took a little bit of risk in putting it in, because of cold weather and freezing, but the Rice brothers say it's worked well so far.

"If we have an extended period of cold weather, say, below 10 degrees for four or five days, we have a little problem with discharge into the storage," comments Fred. But as a general rule, they never have to use a conventional spreader more than 12 or 15 days out of the year.

Fred and Dale agree that the manure system has made life a whole lot easier, freeing up some of their time. And with only $5,000 spent on the step gutter system and $10,000 on the manure storage, they're well-satisfied.

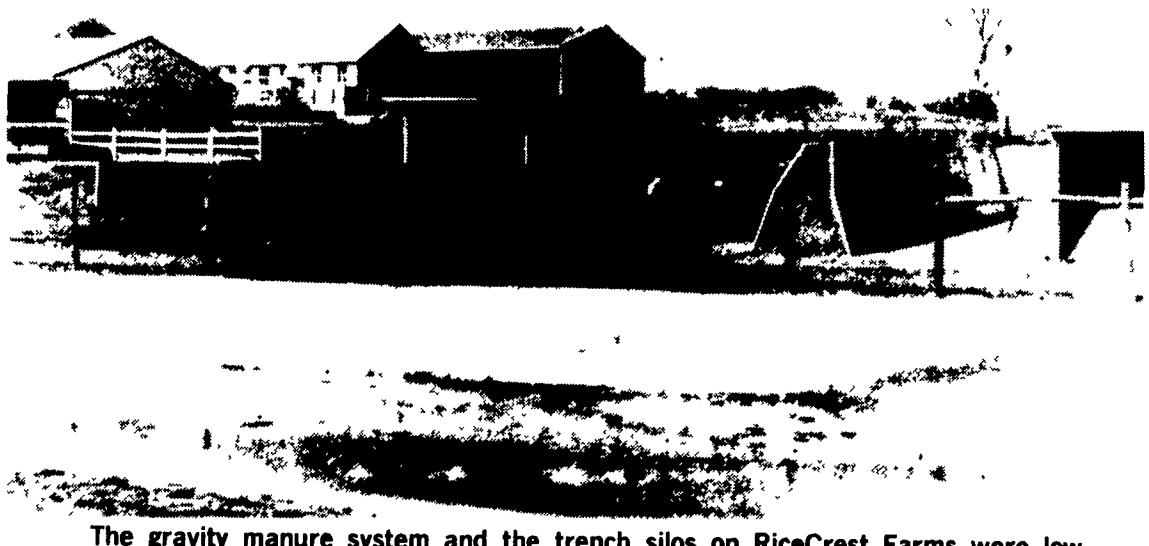
That's a pretty low investment, they say, for something that offers low maintenance as well.

"One of their main goals is to keep things as labor efficient as possible and not have money tied up in machinery," Franklin County Agent Philip Wagner says about the RiceCrest operation.

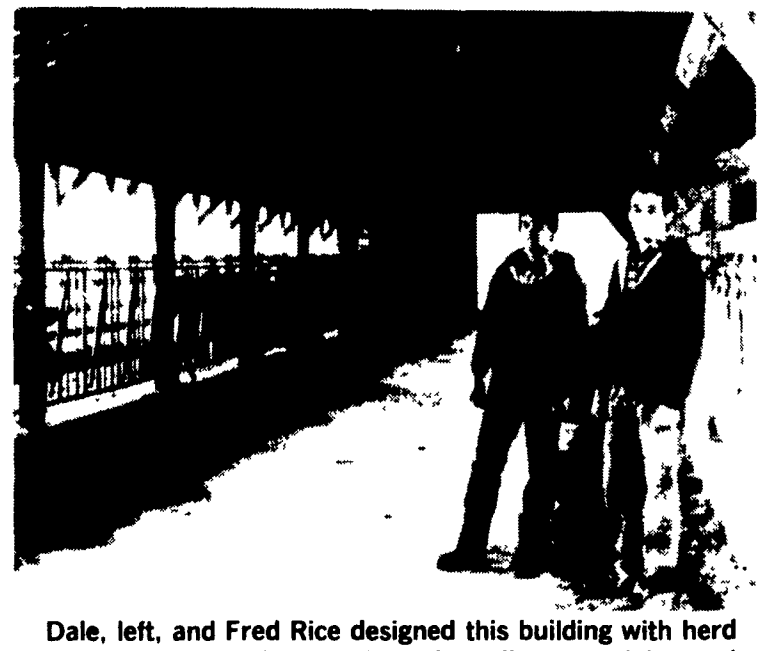
And nearly every aspect of their operation does seem to conform to this philosophy. Their decision to utilize trench silos, which offered them minimal investment for maximum storage capacity, as well as avoiding the hassles of silo-

(Turn to Page A32)

The bottom of the old bank barn on the farm was converted into maternity-sick cow box stalls.



The gravity manure system and the trench silos on RiceCrest Farms were low-investment projects that are giving Fred and Dale Rice high returns with better management and time savings.



Dale, left, and Fred Rice designed this building with herd management in mind. Drive-through feeding saves labor and time, and the self-locking headgates aid in reproductive and health work.

Northwest Guernsey Breeders meet

BY NANCY KUNICK
Staff Correspondent

SANDY LAKE — The Mercer/Northwest Guernsey Breeders Association held its annual meeting recently at the New Vernon Grange Hall. Show and production awards were given out to Guernsey breeders and junior members.

Thirteen 4-H members were recognized for showing Guernseys last year.

Cindi Kunz presented trophies to the juniors who showed grand champions in their county 4-H shows, including: Kellie Kunz, Crawford; Scott Kaveney, Erie, Elaine Hill, Mercer; Nancy Wilcox, Venango; and Jolynne Brown, Warren.

Each Guernsey exhibitor received a "Golden Guernsey" shirt and a milk jug pin.

Elaine Hill was honored for her 1984 junior production record. She received a plaque from the Pennsylvania Guernsey Breeders' Association.

Three breeders were recognized for herd production: Harold Ealy, 13,531 milk, 630 fat on 51 cows; Dolly Run Farm, 12,775 milk, 595 fat on 82 cows; and Joe W. Ferris, 11,871 milk, 530 fat on 53 cows.

During the meeting American Guernsey Cattle Club director Janet Harding urged the breeders to vote against the amendment to prohibit the Guernsey Genetic Growth program Harding said that voting for the amendment would undermine the board of directors' decision to let the program survive or fail on its own merit.

Harding is also up for re-election to the AGCC board of directors this spring.

Ruth Ann John, Pennsylvania Guernsey Breeders' Association assistant business manager gave a detailed report on 1984 activities of the state association and urged greater participation in these programs.

PGBA vice-president Bill Cannon recommended to everyone to go to the state annual meeting and "be a part of the Guernsey family."

Guest speaker for the evening was Bernie Heisner, executive secretary-treasurer of the AGCC in Columbus, Ohio. He addressed the major problems of the club, such as identification and registration, Guernsey Genetic Growth, young sire sampling and disease.

"We want Guernseys better and more valuable than they are," said Heisner. He also praised the AGCC board of directors for always gathering all the information before making decisions.

Also attending the meeting were: Lynette Loper, state dairy princess; Nancy Mitrich, alternate state dairy princess; Elaine Hill, Mercer County dairy princess; and Pennsylvania Guernsey Queen Cindy Fisher.

John Kunz, president of the Mercer/Northwest GBA conducted the business meeting and all directors and the auditor were re-elected for another term.

The Mercer/Northwest Guernsey Breeders' Association will hold their annual Guernsey ice-cream social the second Friday in July at the Mercer 4-H Park. Everyone is invited to attend and have their fill of Golden Guernsey homemade ice cream

RiceCrest Farms

(Continued from Page A30)

unloaders, is just one more example

Family effort

Of course, Fred and Dale are quick to give other people credit for assisting in the creation and smooth day-to-day running of the dairy operation.

Just as they gathered a lot of information and technical assistance in designing their dairy facilities, they have gotten continual support from their family.

It was their father, J. Fred, who gave them the chance to farm, explains Fred. Both the brothers took time away from the farm -- Fred while working at the USDA research center at Beltsville, and Dale while studying animal science at Penn State — before deciding to return and purchase the farm and form their partnership in 1980.

From J. Fred's original set-up with 25 cows and 85 acres, his sons have expanded to the current 150-cow, 17,000 pound herd and 310 tillable acres.

Now J. Fred is semi-retired, but he is still a real help, says Fred, especially on all the carpentry projects around the farm.

And their mother, Dorothy, assists Dale, who is the herdsman and nutritionist, by feeding calves and cleaning the milkhouse.

But with the smoothly run RiceCrest dairy operation, everyone has free time, too, something that's important to the Rice brothers.

Dale pursues his interest in sports. Fred is active in DHIA, the Holstein club, and the Extension executive committee And Fred's wife, Doreen, can take time to teach nursing at the vo-tech school and volunteer for the Red Cross.

And they all have time for their church and family, too.

Fred and Dale credit their family with their success, too. From left are J. Fred and Dorothy, their parents; Dale; and Fred with his wife, Doreen, and their youngest son David.

Block reappoints National Dairy Board members

WASHINGTON — Secretary of Agriculture John R. Block has reappointed 12 members to the National Dairy Promotion and Research Board for a three-year term beginning May 1 and ending April 30, 1988.

The reappointed members are serving initial one-year terms that expire April 30.

Those reappointed are Region 2, Louis Calcagno, Moss Landing, Calif ; region 3, Don Lynn Meikle, Smithfield, Utah; region 5, Robert L Gee, Moorhead, Minn , and George Rydeen, Stillwater, Minn ; region 6, Donald R. Haldeman, Madison, Wis., and John A. Malcheski, Pulaski, Wis.; region 7, Ardath DeWall, Shannon, Ill.; region 8, Harry E. Pickering, Taylorsville, Miss.; region 9, Glenn E. Johnson, Hartford City, Ind.; region 10, W. Charles McGinnis, Kinards, S.C.; region 11, Earl F Forwood, Hop Bottom, Pa , region 12, John Widger, Ellicottville, N Y.

No terms are expiring in regions 1, 4 or 13.

Tha National Dairy Promotion and Research Board was established by the Dairy and Toabcco Adjustment Act of 1983 to develop and administer a coordinated program of promotion, research and nutrition education. The board is authorized to design programs to strengthen the dairy industry's position in domestic and foreign markets.

The national program is financed by a mandatory 15-cent per hundreweight assessment on all milk produced in the contiguous 48 states and marketed commercially by dairy farmers. The secretary of agriculture must conduct a referendum of dairy farmers in August-September 1985 to determine if they approve continuation of the program after Sept 30, 1985

Farm Talk

by

Jerry Webb

Who really owns your land?

When it gets right down to ownership rights, the farmer is in a strange position. If he owns a piece of land, he probably figures he has the right to do just about anything he wants with it. He also figures that he controls all the rights associated with that land. The fact of the matter is he's probably wrong on both counts.

Maybe in the early days of American agriculture farmers did have the right to do just about what they wanted. But as our country has become more civilized and sophisticated, we've all given up some of those early rights and in their place have accepted laws and rules and regulations that appear to be in the public good.

Land rights have always been a matter of great concern in this country. Many of our early settlers came here because they didn't like European land rights. And then they found some of those same kinds of laws governing them in this country. And so they moved west for new kinds of land rights.

Homesteaders were given land providing they followed certain rules. The sheep men and the cattlemen waged wars over land rights, and farmers and ranchers battled one another over boundary lines, access to water, and other issues that dealt with an individual's right to do what he wanted with his land.

Some of our earlier farmers solved their land right problems by just moving farther west anytime things got a little restrictive. There was a time when as one writer put it, "If you could see the smoke from your neighbor's chimney, he was too close and it was time to move west."

Those days are gone with the settlement of the last good government land and so now farmers must adjust to their neighbors and to the rules and regulations of the society where they live. There is still some shifting around as farmers try to make the best of the situation. Here in the East, farmers have been known to trade a small farm in the midst of a subdivision for a larger one farther west. But you can't go far enough west anymore to avoid the rules and regulations and the rights of others.

The whole question of land rights poses some great philosophical problems and puts farmers and their city cousins on different sides of an issue. Most farmers feel they do have the right to do almost anything on their own land and they get fighting mad when the government, in its many forms, tells them that in fact they don't. For instance, they don't have the right to pollute the air, to allow runoff to pollute other peoples' water, to farm in such a way that it creates health and safety hazards or causes an unnecessary nuisance.

At the same time, these governmental units are telling farmers that other people have certain rights also. Through its laws of eminent domain the government is saying to farmers that it has a right to build roads wherever needed in the public good and that farmers have little choice in the matter. That same law also covers other non-agricultural uses of farmland, including power lines, landfills, flood control, and so on. And through zoning ordinances, the government is telling farmers how many houses can be built on their farms, where they can be builit, and who can build them.

So to argue that farmers have the ultimate control of their acres just because they own them is pointless. They obviously have more control than some people who don't own those acres, but thev really don't have the ultimate control. And that's a very important point. They can decide what crops to plant, the tillage methods to be used, and for the most part who can physically be present on their property. But when it comes right down to it, some agency of the government tells them who owns the rabbits that feed on their gardens and the birds that nest in their barns. Other agencies tell them when their hogs need a deodorant, or when their barn lot runoff needs cleaning up.

If this sounds a little depressing, consider the fact that most of these agencies aren't that involved in the day-to-day operation of a typical farm. They usually get involved under extreme circumstances and their actions can be quite devastating.

Recently, some farmers have decided that they should have more rights than the government has been willing to give them. This is a reversal of a trend that has, in general, restricted their rights. Now farmers are raising strong questions about highway location, landfill selection and flood control projects that don't seem to consider the farmers' point of view. Examples abound where farmers, through group effort, have forced abandonment, postponement, and rethinking of projects that seem to run counter to good agricultural policy.

Some states are starting to realize the important and fragile nature of their farming sector and are beginning to back away from some of their governmental rights. In other instances, agencies are sitting down with farmers to plan for the overall good of as many people as possible. And sometimes when this kind of planning and thinking is done, everyone benefits.

Farmers can get downright unreasonable when told by someone else what they must do with their land. On the other hand, when they understand that they, in fact, are causing a problem or are hurting other people, they can be most cooperative and understanding.

NH MODEL 489 HAYBINE®

Cut fast, avoid damage

The Sperry New Holland Model 489 Haybine® mower-conditioner makes a nine-foot cut, fast. The rolls on the "489" are in the main frame, not in the header. So the header is light, to glide over rocks and obstructions with less chance of damage. Stop in and see one today.

NH L-455 SKID LOADER

Performance ... plus

Sperry New Holland L-450 Super Boom loaders outperform the competition:

- Faster cycle time — finish jobs fast
- A longer wheelbase — more stability and safety
- More forward reach — load center of large spreaders
- Level bucket lift — less spillback
- Easy maneuverability — get in and out of tight places.

Models from 18-hp to 75-hp, gas or diesel. Stop in and run one today.

Local dairy promotion funds approved

HARRISBURG — The Pennsylvania Dairy Promotion Advisory Board approved more than $33,000 in additional local promotion funding and elected a chairman and vice-chairman at its April 10 meeting.

Those groups receiving additional funding were: Adams County Holstein Club, $100; Bedford County Dairy Princess and Promotion Committee, $518; Berks County Dairy Farmers, $2900; Blair County Dairy Promotion, $1364; Bradford County Dairy Promotion Association, $1225; Butler County Milk Promotion Committee, $184; Central Region Young Dairymen, $765; Centre County Dairy Promotion Committee, $600; Chester County Milk Promotion Committee, $504; Clarion County Holstein Club, $700; Clarion County 4-H Dairy Club, $190; Clarion-Venango Milk Promotion Committee, $292; Clearfield County Dairy Program, $250; Columbia-Luzerne Dairy Princess Committee, $300; Crawford County Dairy Promotion and Advertising Committee, $2600; Cumberland County Milk Promotion Committee, $180; Cumberland County Dairy Princess Committee, $755; Eastern Milk Producers, Dairy Product Division, $450; and Erie County Farmers Association, $1000.

Also receiving funding were: Erie County Dairy Princess Program, $90; Fayette County Dairy Promotion Committee, $125; Franklin County Dairy Promotion, $508; Hi-Protein Breeders, $75; Huntingdon County Dairy Promotion, $1882; Interstate Milk Producers Cooperative, $2100; Jefferson County Dairy Promotion Committee, $200; Juniata County Dairy Promotion Committee, $725; Lancaster County Dairy Promotion Committee, $554; Lebanon County Dairy Promotion, $275; Lycoming County Dairy Association, $750; McKean County Dairy Promotion Committee, $250; Mercer County Dairy Promotion Committee, $1200; Montgomery County Dairy Princess Committee, $200; Perry County Milk Promotion Committee, $210; Potter County M & M Company 4-H Club, $79; Carol Sanders (radio advertising), $559; Schuylkill County Dairy Committee, $1935; Somerset County Dairy Promotion Committee, $750; Southwest Dairy Promotion, $643; SUN Area Dairy Princess Committee, $335; Tioga County Dairy Promotion, $1310; Union County Holstein Club, $200; Washington-Greene County Dairy Princess Committee, $278; Wayne County Dairy Princess Committee, $675; Wyoming-Lackawanna Dairy Princess Committee, $450; Mifflin County Dairy Promotion Council, $1520; York County Dairy Promotion Committee, $450; and Sullivan County June Dairy Festival Committee, $200; Crawford County Dairy Princess Committee, $387

In other business, board member Donald Duncan of Robesonia, Berks County, was elected to serve as chairman. Himself as a dairyman, Duncan ha served as former president of the Keystone Milk Marketing Council. He is also president of the Berks County Dairy Farmers Association.

Thad Woodward of Canton, Bradford County, was selected as the vice-chairman. He is manager of Eastern Milk Producers' Dairy Products Division.

The two will direct the business of the 16-member panel created to oversee the dispersal of promotion funds and other transactions of the program.

The Pennsylvania Dairy Promotion is a voluntary program funded by dairy producers and designed to increase consumption and marketing of Pennsylvania dairy products.

USDA orders dairy promotion referendum

WASHINGTON — The U.S. Department of Agriculture has issued an order to hold a referendum among dairy farmers in the 60-day period beginning Aug. 1 on whether the Dairy Promotion and Research program should be continued after Sept. 30, according to Secretary of Agriculture John R. Block.

Block said he is required to conduct the referendum under the provisions of the Dairy and Tobacco Adjustment Act of 1983, which authorized the program.

All dairy farmers who were engaged during April 1985 in the production of milk for commercial use will be eligible to vote. A majority of the dairy farmers voting must favor continuation of the program for it to remain in effect.

The Dairy Promotion and Research Program is financed by a 15-cent per hundredweight assessment on all milk produced in the contiguous 48 states and marketed commercially by dairy farmers. The program is administered by a board of 36 dairy farmers appointed by the secretary of agriculture wtih representation based on area milk production.

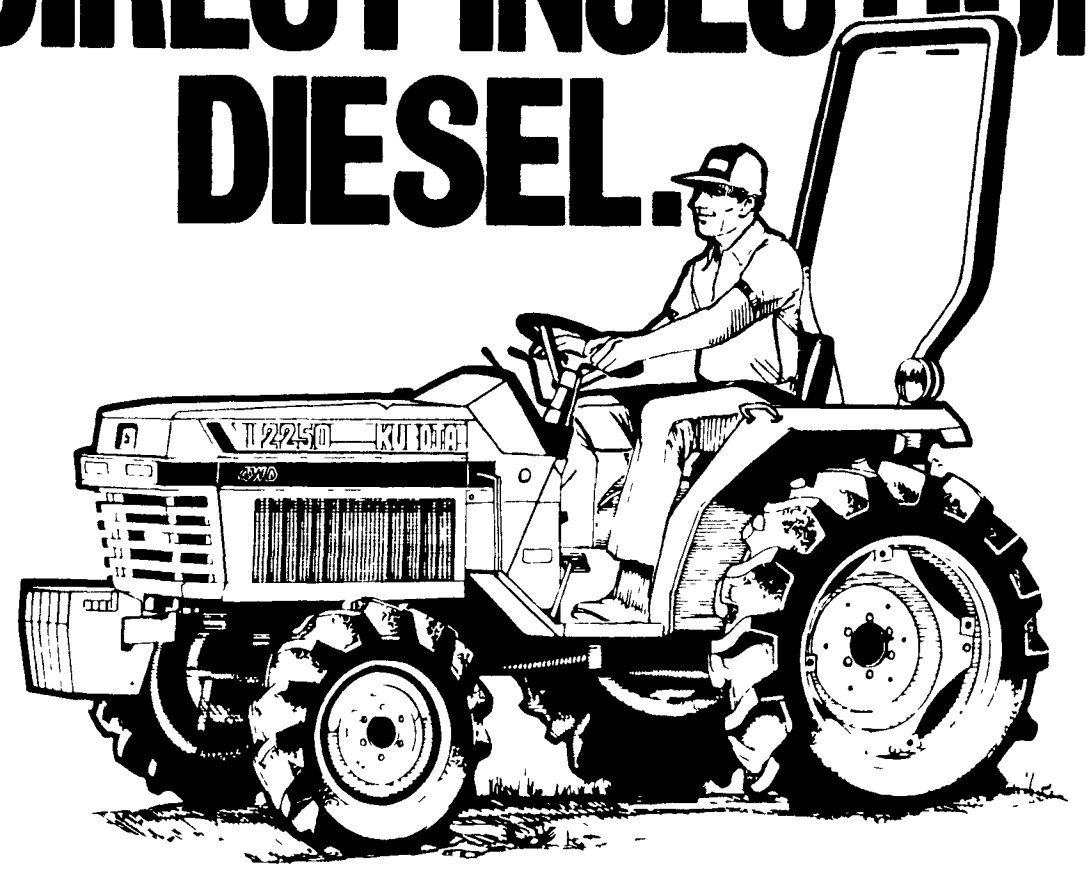
The All New L-Series Is Ready For You To Test Drive

DIRECT INJECTION DIESEL.



Kubota introduces a compact tractor with direct fuel injection. The new L2250 has a 3-cylinder diesel engine with 21 PTO horsepower. Plus it has direct injection for improved starts in cold weather and better fuel economy, too.

Other standard features, not so standard on most tractors of this size, include rear- and mid-mount PTO for maximum versatility when it comes to attaching implements. Surprising, wet disc brakes are standard, too. Power steering is standard on the deluxe model.

Our operator platform is designed for increased comfort, with all the important controls at your fingertips. Not underfoot.

To find out more about the Kubota L2250, please direct your questions to us.

Spring planting

(Continued from Page A1)

field, according to the moisture-holding characteristics of the soil.

Ironically, added Yocum, no-till crops are doing much better this year, because of the moisture-retaining qualities of limited cultivation practices. Last year, however, heavy rains gave problems to no-till farmers, he said.

Planting is still significantly ahead of schedule, the crop reporting service said. In the week ending last Sunday, it said, six days were rated suitable for plowing.

The meant that 43 percent of spring plowing was complete by week's end, while last year, only five percent was reported done. The five-year average for this date is 29 percent, the agency said.

Statewide, topsoil moisture was rated inadequate by 38 percent of those reporting to the state service, while 56 percent said it was adequate and 6 percent indicated a surplus. In the northern regions, 42 percent found too little moisture, while in the south, the figure reached 50 percent.

So though the lack of rainfall isn't as critical now as it might be in the crop-maturing months of June, July and August, it clearly is a growing consideration.

"We need at least a half inch of rainfall over the next two weeks to bring us up to where we should be," added Yocum.

Wood lot planning seminar scheduled

CREAMERY – A meeting to acquaint woodlot owners with the ways of measuring and evaluating their woodland will be held on Thursday, at the Montgomery County 4-H Center located at Creamery, one mile south of Skippack on Route 113.

There will be two sessions, the first starting at 9:30 a.m. as a discussion period to cover forest growth and tree quality, timber sales, tree planting and use of instruments to measure and analyze tree quality.

The 1:30 p.m. afternoon field session will be held at a woodlot near Creamery and provide "hands-on" experience using the information gained from the morning session.

Dairy Policy Options for 1985

Voluntary Production Controls: Continue Current Program

EDITOR'S NOTE: This is the fifth in a series of nine articles about dairy policy options for 1985. Compiled by Jack Kirkland and Blair Smith, Extension ag economists at Penn State, the articles are written by a variety of national authorities on dairy policy issues.

We are printing these articles to help you better understand and evaluate the policies and programs the dairy industry faces, and to help you take a more effective stand for the program you choose to support as the 1985 Farm Bill is formulated.

For further information about these articles or about dairy policy, contact your Extension agent.

BY ROBERT CROPP
UNIVERSITY OF
WISCONSIN, PLATTEVILLE

For many dairymen the favored dairy policy option is to simply continue the current program. That is logical because new programs foster uncertainties.

The known is frequently viewed as a better alternative than the unknown.

What Is a Voluntary Controls Policy?

A voluntary controls policy provides economic incentives to dairymen who agree either to reduce or not increase their marketings.

This differs from mandatory programs where dairymen who do not cooperate are penalized. Voluntary programs with incentives have been more politically acceptable than mandatory programs with penalties.

When a program is voluntary, participation depends upon the size of the economic incentive relative to the requirements for compliance. Voluntary programs, like mandatory programs, use bases to measure compliance of individual dairymen.

Legislative action could either mandate the program on some well defined, automatic basis or provide discretionary authority to the secretary of agriculture for its implementation.

Voluntary supply control policies in agriculture have been used extensively since the 1960s. For example, to qualify for deficiency payments, loan rates, or the farmer-owned grain reserve, grain farmers have been required to set aside or retire land from production in most years since 1978.

For dairy, a voluntary supply control program was authorized by the controversial Omnibus Budget Reconciliation Act of 1982. Producers could receive a refund of the second 50 cent assessment if they reduced their milk marketings by a specified amount below their base.

The milk diversion program of the Dairy Production Stabilization Act of 1983 provided payments for a 15-month period (January 1, 1984 through March 31, 1985) to those producers who contracted with USDA to reduce their marketings from five to 30 percent below their base.

In any case, production controls, whether voluntary or mandatory, make sense only when supplies exceed commercial demand by a sizable amount. Moreover, they are most likely to be preferred when dairy policy is more strongly guided by farm income support objectives than a strictly market oriented objective.

Alternative Mechanisms for Implementing Voluntary Controls

The alternative mechanisms for providing some type of economic incentive to dairymen to reduce their supply include incentives to cull cows, market less milk, or retire whole farms.

Cull Cow Programs: Milk production may be reduced through incentive payments to producers to cull more cows than they would normally. For example, dairymen could be paid $300 by the USDA for each additional cull.

To eliminate the 16 billion pounds of milk surplus (12 percent of farm marketings) that existed in 1983 would have required a drop in the nation's dairy herd of almost two million head. An even greater number of additional cows may need to be culled to reduce the herd by this amount if one takes into account the record level of replacement heifers.

Two major concerns have been expressed about a cull cow program. First, are producers reporting the culling of beef cows as well as dairy cows or are the cows culled in addition to normal culling? A large-scale cull program could be difficult to monitor and verify.

Second, will additional culling depress market prices for beef and hog producers?

About 25 percent of the beef supply comes from dairy cattle and about 35 top 37 million head of beef are slaughtered annually. Two or three million more cull dairy cows added to this total could depress beef prices in the short run.

However, in the long run a reduced dairy herd eventually leads to fewer culled dairy cows and dairy bull calves to be fed out as dairy beef.

Another factor to consider is that cow cull programs do not guarantee that milk production will be reduced, nor do they measure producer performance relative to milk production. It is simply assumed that greater culling will lead to lower production.

Milk Diversion Program: Milk diversion programs use incentive payments to encourage dairymen to reduce or not increase their milk marketings. Reduction can be achieved through cow culling, lower production per cow or increased farm use of milk. Reductions are measured from a historical base such as the past two or three years.

The current milk diversion program is an example of this type of program, although it is not the only example when one considers all the specific variations that could be made.

Under this type of program producers would be paid so much per hundredweight for reducing their marketings. With the current milk diversion program, producers who agreed to reduce marketings from five to 30 percent below their base receive $10 per hundredweight for the difference.

To encourage producer participation, diversion payments need to be sufficiently high – more than the net return from producing milk. Even then, producers who purchase most of their feed and use hired help, for example, will typically find it to be more profitable to participate in a diversion program than producers who raise most of their feed and provide their own labor.

Whole Farm Retirement: A voluntary supply control program could also provide payments for the complete retirement of milk producing farms, particularly for farmers close to retirement or those in severe financial stress.

One advantage of whole farm retirement is that the entire dairy production unit is eliminated. Moreover, one likely condition for whole farm retirement would obligate the retired unit to remain out of dairy production for a given number of years.

Conditions Fostering Need for Voluntary Controls

Many different factors affect the supply and demand for milk. For example, unemployment and lower real disposable income reduce demand.

Relatively cheap feed, low cull cow prices, lack of other profitable alternative enterprises, and an excessive support price are factors that may encourage milk production above consumer demand. A voluntary supply control policy could be used during these periods to bring supply back into balance.

If the objective of a dairy price support policy is one income enhancement (maintaining support prices above the market clearing level), then supply control is necessary.

With a voluntary supply control program, incentives should be large enough to encourage the kind of producer participation that will avoid milk surpluses. A mandatory supply control may be more effective in controlling surpluses under an income enhancement price support objective. (See next week's article.)

Consequences of Voluntary Controls

Voluntary supply control programs can be devised to achieve significant reductions in total milk marketings in times of surpluses. This would result in higher prices to dairymen as well as reduced costs to the government.

A drawback to voluntary programs is the cost of buying reduced production. Yet it may be less expensive for the government to pay dairymen not to market surplus milk than to purchase and store surplus dairy products.

For example, compare the $10 per hundredweight diversion payment for reduced marketing under the current milk diversion program to a government cost that may run as high as $16 to $17 per hundredweight of milk equivalent for the actual purchase and storage of milk surpluses.

One problem with the milk diversion program, however, is that some dairymen who participated had already reduced their marketings and in these instances the $10 per hundredweight was paid but no net reduction in marketings or reduced government costs were realized.

Although voluntary supply control programs can help maintain stable prices they would not be economically effective in maintaining higher than market clearing prices over the long run.

To the extent that producer prices may be held above market clearing levels, consumer prices for milk and dairy products would also be higher and more stable.

Government costs of voluntary supply control programs depend upon the type of producer incentives or payments and the extent of producer participation. If incentives or diversion payments are too attractive, producer participation may be larger than desirable.

A provision giving the secretary of agriculture the authority to tailor the size of incentives to control the level of participation would seem to be a necessary component of a milk diversion program. For example, if marketings were reduced more than necessary under the current diversion program, the secretary was given the authority to lower, across the board, the contracted percentage reductions by dairymen.

Problems of geographic milk shortages can also occur with voluntary supply controls. For example, producer participation in the current milk diversion program was greatest in the South. Producers in this area have a higher variable cost of production relative to price, thus participation was attractive. As a result, a very tight fluid milk supply developed in the South and Southeast during the summer and fall.

Fluid milk from outside the area was purchased at relatively higher prices to meet the needs of fluid milk processors. Thus, a voluntary supply reduction program, particularly a milk diversion program, could misallocate resources in milk production making it difficult for some high fluid milk utilization markets to obtain sufficient supplies of Grade A milk for beverage needs. Higher consumer prices for beverage milk in these markets would also result.

There is another problem to consider. Frequent use of diversion programs could encourage the inclusion of program benefits in the price of dairy cows. See next week's article on mandatory controls for analysis of this problem.

Spring Highlight Sale draws buyers from near and far

LANCASTER – Holstein breeders from more than 10 states made purchases at last Saturday's Spring Highlight Sale, held at the Guernsey Sales Pavilion, Lancaster.

The highest bid of the day was placed on an Ivanhoe daughter by investor G.T. Bolton, Owings Mills, Md. Bolton paid $17,000 for Hart-Lyn Ivanhoe Margaret-ET, consigned by Hartmann Farms, Dundee, Ill.

The Ivanhoe heifer is out of the Ex-92, 2E Ecraso Elevation Greta, who boasts a top milk record of 27,850 pounds milk, 964 pounds fat.

Greta stood as the first dry aged cow at the Illinois Championship Show in 1982.

The second high selling animal went to Nebraska Holstein breeder Robert Schultz. He purchased Marlu Bell Rose - ET for $12,500 from Daniel E. Welk, Strasburg.

Fresh in February, the Bell daughter is out of Marlu Elevation Rosita. Rosita is scored Ex-90, 2E and produced 29,140 pounds milk and 1135 pounds fat at six years and four months.

Bolton also picked up the third high selling consignment, a two-year-old Pete daughter, for $11,500. Dreamstreet Pete Little Gem - ET was consigned by Dreamstreet Holsteins, Inc., Walton, N.Y.

Little Gem is out of Lady Gaydale-S Matt Croquet, an Ex-90 Fond Matt daughter with a top milk record over 24,000 pounds.

A male brought $10,000, fourth highest price of the day, from the Esquire Syndicate. Marlu Esquire - ET is a bull from an Ella Marlu Sugar and Mars-Tony mating. He was consigned by Marlu Farm, Lincroft, N.J.

The Spring Highlight Sale averaged $4305 on 30 head. Sale manager John Merryman remarked afterward that it was a "good sale considering the market."

Breeders and investors from California, North Carolina, Michigan and most of the Middle Atlantic states made purchases at the sale.

The Spring Highlight Sale was held in conjunction with the Lancaster Opportunity Sale, and was managed by The Merryman Company and DeBlock Sale Service.

Farm Bureau's proposal introduced in Senate

WASHINGTON – Senator Mitch McConnell, (R-Ky.), introduced the American Farm Bureau Federation's proposal for the 1985 farm bill in the Senate this week.

"Congress must act aggressively to give American farmers the tools they need to be competitive in the world marketplace and this farm bill provides those tools," McConnell asserted. An identical bill (H.R. 1965) was introduced in the House two weeks ago by Rep. Bill Emerson (R-Mo.) and 14 other congressmen.

McConnell, a member of the Senate Agriculture Committee, said the chief attraction of his bill is its commodity bonus program, which would provide foreign purchasers extra commodities to offset the strength of the dollar and other nations' export subsidies.

Comparing his bill with other meaures that have been introduced, McConnell said the bill's export section is "vastly superior" to those in other proposals.

The commodity bonus provision, he said, would help reduce crop surpluses and make U.S. exports competitive again. Other features of the bill's export title include mandated use of the export credit revolving fund, expanded use of existing credit programs and an exemption from cargo preference requirements for all farm exports.

Noting that the Farm Bureau plan fits within the spending constraints contained in the budget compromise agreed to by the White House, McConnell said his farm measure has a good chance of being supported by the administration and adopted by the Senate.

The Kentucky senator emphasized that action to reduce the federal deficit went hand-in-hand with the farm bill in assuring agricultural prosperity. If the deficit were cut, he said, interest rates would fall, which would greatly help farmers.

Other provisions of the farm bill introduced by McConnell include: elimination of the farmer-owned reserve, loan rates based on recent average market prices, target prices frozen next year at this year's levels and then set at 110 percent of the loan rate, a long-term conservation reserve program, and a dairy program that would set supports according to the level of government purchases of dairy products.

Warwick Township considers ag preserve ordinance

by Bonnie Szymanski

LITITZ — As the Manheim Township Board of Commissioners listened stoically during a public meeting Monday evening, residents of two abutting townships voiced their feelings about the rezoning of a northeastern quadrant of Manheim Township land from residential to agricultural.

Proponents of two forms of preservation found two hours-worth of ways to tell the commissioners what they wanted as well as what they didn't want.

One faction favored preservation of agricultural land by rezoning. Others wanted to preserve the right of individuals to sell their land on the open market, even if it means selling to developers.

Alan Musselman, director of the Lancaster County Agricultural Preserve Board, told the gathering of about 70 people that before the county can designate an agricultural preserve, the township must rezone an area agricultural.

At present, the northeastern 1,117-acre section of Manheim Township, which borders the Lancaster Airport, is zoned predominently residential. It is contiguous with rural-zoned Warwick Township land which some residents of that township, as well as the county Ag Preserve Board, see as a prime candidate for agricultural zoning.

Opposition to the rezoning came early in the meeting when Charles Grove, a Lancaster attorney, spoke for the families of Dale Landis, Samuel Keens and Martin Zimmerman.

Grove told commissioners that, though the three families did not oppose the concept of agricultural zoning or of the ag preserve, they wished to have the right to maintain residential zoning for their own land.

"These families have geared their lives to the fact that their land would remain residential," he said, noting that they wanted to leave to their children land free of restrictions.

Grove maintained that the land owned by these families was bordered by sewered land ready for development. They do not want to watch that land "increase in value at others expense," he said.

"They're only asking for freedom of choice," Grove declared, adding that their desire is to leave the land as a legacy to their children and to maintain them in their old age."

Mrs. Kenns reminded the non-farming township residents in favor of agricultural zoning that "they're living on farm land destroyed to build the houses they're living in."

Marty Wenrich, who stated he farms 55 acres along Creek Road in the northeastern quadrant, was one of the first to speak in favor of the preservation of the agricultural nature of the land there. He was apparently acting as spokesman for his own as well as the views of a small group of Amish men who sat with him.

Wenrich told commissioners that he and his neighbors want to see their area zoned agricultural.

"We're concerned about the traffic," said the farmer, noting that as nearby developments grow up in the area, traffic is increasing.

Manheim Township resident Howard Shearer followed Wenrich's plainly stated request with and eloquent plea for farmland preservation that won him the first round of applause in an evening of ovations from both sides.

Shearer spoke of "the profit of the few," of "developments springing up like mushrooms," of "horrendous traffic on the Fruitville Pike" that rivals Philadelphia's Schuylkill Expressway. "We're looking at a future Route 30 East there," he concluded.

"Enough is enough," resolved Shearer, quoting the once-popular song lyrics, "They paved Paradise and put up a parking lot."

"We don't need anymore parking lots," declared Shearer.

Michael Kelly, a resident of Ashford Drive in the township, said he has been plagued by water pressure problems and felt that more development would only aggravate such problems.

He complained that the water pressure in his home is so bad that he is thinking of "spending $4-500 just so I can take a shower."

Larry Skromme, a one-time cattle farmer along Landis Valley Road in the township, and a member of the Ag Preserve Board, said he learned early about the problem of trying to farm in a developing area.

The complaints of neighbors forced his eventual decision to quit farming and sell much of his land, he said.

"In order to preserve farmland," said Skromme, "we have to do it on the basis of letting development take place where it should and keep a contiguous area for farming; and we must do it with the cooperation of the community," he contended.

Skromme, who has traveled around the world on agriculture-related excursions, told the audience, "In places like Holland, the land is allocated and controlled to the very inch."

He concluded, "Here we have a chance to preserve a way of life."

A man who identified himself as Don Ranck, dairy farmer from Paradise Township, and vice-president of the Lancaster County Farmers Association, acknowledged the value of preservation but cautioned the group, "There are better ways (than opting for deed rerstrictions)."

Ranck explained that he was referring to a statewide program which "allows deed restrictions to be sold by farmers to the highest bidder."

"I don't understand why people think farmers should not be allowed to sell (for the best market price)," argued Ranck.

Referring to farmers who agree to deed restrictions closing their land to development, he charged, "They may be convinced to give that right away, but the next generation may not appreciate the loss of that right."

The Board of Commissioners announced that a public hearing on any proposed zoning ordinances would be advertised. They added that any zoning proposal for the northeastern quadrant of Manheim Township would probably not be ready by the next meeting of the board

Samuel Keens asks the Warwick Township board of commissioners to exclude his farm from a proposed agricultural preservation area in the township.

York tops membership record

YORK — The York County Farmers' Association has recently reached a record family membership of 754, according to an announcement by association president Ellis Crowl.

"We surpassed our goal by 8 member families," said Ellis.

The York Farmers' Association is a general farm organization and is affiliated with the Pennsylvania Farmers' Association.

A victory party was held at Rutter's to recognize the membership chairman, Sandra Dehoff, members of her committee and others who worked in the membership drive.

Forwood retains National Dairy Board seat

SYRACUSE, N.Y. – Earl R. Forwood, president of Eastern Milk Producers Cooperative Association, Inc., has been re-appointed to the National Dairy Promotion and Research Board for a three-year term. The announcement of re-appointment came from USDA on Tuesday, April 16.

Established by a provision in the Dairy and Tobacco Adjustment Act of 1983, the 36-member Board consists entirely of dairy farmers nominated through certified dairy and farm organizations.

The board works to increase dairy product sales through a national advertising and promotion program, as well as supporting research projects in the development of new dairy products and the documentation of the necessity of dairy calcium for good health.

The program is funded entirely by dairy farmers, through a 15-cent per hundredweight assessment on all milk produced nationally.

Forwood, who operates a dairy farm in Hop Bottom, PA, with the help of his wife, Frances, represents Region 11, an area encompassing Pennsylvania, Delaware, Maryland and New Jerey.

When reached at his home, Forwood expressed his appreciation at being re-appointed. "It's an important step that dairy farmers have taken with this program," said Forwood. "We are the first commodity group to actually fund a program to solve our own problems, instead of waiting for Washington to solve them for us. I am going to work to the best of my ability to insure its continued success."

Forwood, a member of Eastern's Board of Directors since 1980, was elected President of the Cooperative in October 1983. An active member of Eastern Milk Producers, he has served as Secretary of the Association as well as a member of the Executive, Sales, Legislative, Milk Price Regulation and Unit by Unit committees.

He is also active in the Pennsylvania Farmers Association, serves as a Director of the National Milk Producers Federation and is a member of the Executive Committee of the Northeast Dairy Conference. In his last term on the National Dairy Board, Forwood served on the Finance and Audit Committee.

Eastern Milk Producers Cooperative Association, Inc., is the largest milk marketing and bargaining cooperative in the Northeast, with a 62-year tradition of serving the needs of member dairy farmers. The cooperative, headquartered in Syracuse, New York, has over 4,200 members throughout Pennsylvania, New York, Vermont, New Hampshire, New Jersey, Delaware, and Maryland.

Soybean exec named top agribusiness pro

MINNEAPOLIS, MN – Dr. Kenneth L. Bader, chief executive officer of the American Soybean Association (ASA), has been named the nation's top agribusiness professional by the National Agri-Marketing Association (NAMA).

Bader received the 1985 Robert S. Kunkel Award for Excellence in Agricultural Marketing for active support of improved marketing and promotion of agricultural products, a role that has brought the ASA recognition as one of the nation's most effective commodity associations.

ASA is a national, voluntary commodity association organized to build and maintain profits for soybean farmers through worldwide programs in market development, resarch, government relations and education.

Bader was involved in the U.S. Department of Agriculture's first efforts to open the People's Republic of China to agricultural trade and was one of 25 national leaders selected to participate with Agriculture Secretary Block and Commerce Secretary Baldrige on a U.S. Trade Investment Mission to Africa. He also serves on the U.S. Chamber of Commerce Food and Agriculture Committee.

Innovative Pricing on Innovative Dairy Equipment

Your local Chore-Boy dealer has a full line of innovative dairy equipment at very innovative prices. Prices that are outstanding each and every day.

*Part #55423 GL-50 Vacuum Pump & Deck Assembly Less Motor For use with the 5 H.P. motor. Delivers 64 cfm at 13" of vacuum.	$1,070.00
*Part #55424 GL-750 Vacuum Pump & Deck Assembly Less Motor Delivers 92 cfm at 13" of vacuum.	$1,230.00
*Part #55600 2" Oil Reclaimer Extends pump life while saving oil.	$ 295.95
*Part #58602 Wall Mount Receiver Glass receiver, milk pump with motor, moisture trap and Chore-Boy's "Black Magic" liquid level control, all mounted on a stainless steel panel.	$1,562.00
*Part #61620 Stanchion Master I This balanced organizer features the "Pulse-Pro" pulsator and comes with complete milking unit.	$ 435.00
*Part #51800 Mark I Automatic Take-Off Sensor automatically monitors the milking process, shuts off the vacuum, detaches and retracts the milker.	$ 826.00
*Part #56700 High Volume Automatic Washer Built with large valves for fast fill to help retain temperature during the fill cycle.	$ 595.00

Two-day Bio Ag Seminar

LANCASTER The Natural Ag Technology Association is sponsoring a two-day Bio-Ag Seminar Friday and Saturday, May 3-4, at the Farm and Home Center

Topics to be discussed include safe handling of manure, reduction of water pollution from agricultural sources, animal feeding without antibiotics, and decreasing use of chemicals without production losses

Speakers include

• Dr John Whittaker of Springfield, MO, a consultant to the poultry and turkey industry and a leading advocate of biological, preventative approaches to animal health problems

• Thomas Harding Jr of Stockertown, the president of Progressive Ag Systems, a consulting firm working with conventional and organic farmers

• Jerry J Brunetti, president of Agri-Dynamics, Inc., a firm engaged in on-farm consulting as well as marketing of specialty commodities for agricultural clients

• John Albright of Lancaster, president of New Environmental Technology, Inc , who will talk about the electro-magnetic spectrum and its effect on people and animals

Dr John Whittaker

• George Wolf of Myerstown, an employee of the Dauphin County Soil Conservation Service and a member of the board of the Chesapeake Bay Foundation

• Leonard Redzon of Youngstown, Ohio, operator of an experimental farm

For more information, contact the Natural Ag Technology Association, P O Box 1214, Lebanon, PA 17042

Soybean group attacks cargo preference ruling

WASHINGTON, DC Soybean prices will plunge even lower and struggling U S farmers will see export markets shrink unless Congress acts quickly to exempt blended credit export programs and other export expansion efforts from costly cargo preference requirements, says American Soybean Association (ASA) President Roger Asendorf

According to Asendorf, the recent court ruling requiring application of the Cargo Preference Act to agricultural commodities has forced Secretary of Agriculture John Block to suspend the sale of over $500 million of farm commodities

"The government is already causing farmers enough problems without adding outrageous cargo preference demands," said Asendorf He explains that under the ruling half the cargoes shipped under the blended credit program must travel on U S falg vessels at an average added cost of $40 per metric ton

"That's enough to make blended credit completely unattractive to any customer," says the St James, Minnesota soybean farmer "In the last three years costs associated with cargo preference have eaten up nearly $100 million in food aid monies per year It simply doesn't make sense "

Asendorf urges farmers to write or call their Congressmen and Senators immediately and ask their support of recently introduced legislation that would reverse the court decision on cargo preference and exempt all farm exports from cargo preference

Asendorf emphasizes that farmers should also encourage their legislators to support legislation to exempt all agricultural exports from cargo preference

It is almost certain that this court ruling will result in application of cargo preference to any future attempt to promote U S farm exports," he explains "One casualty would be an innovative idea of providing bonus commodities' to foreign buyers out of surplus federal stocks "

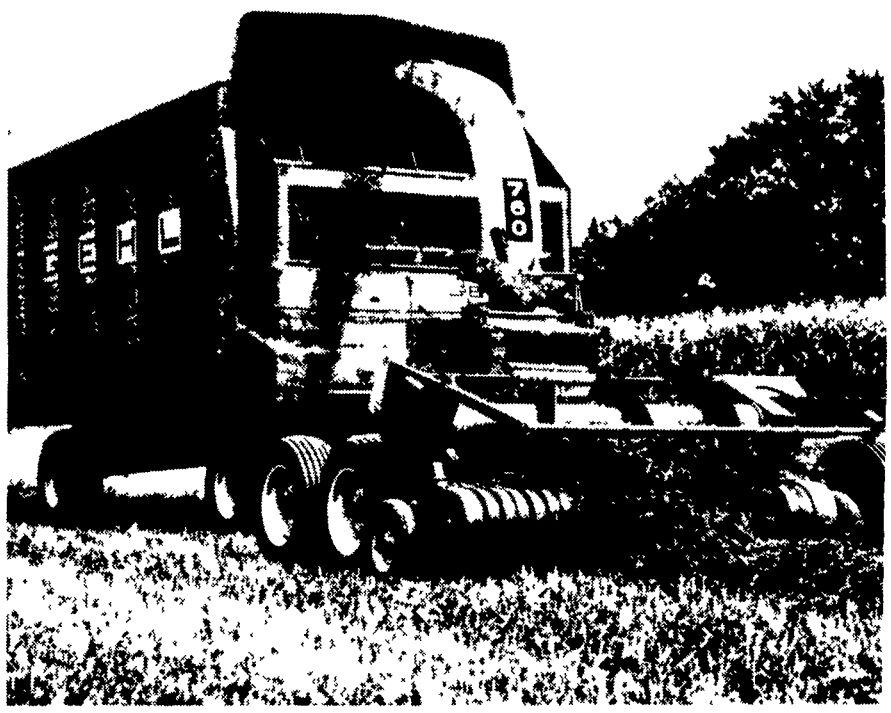
"A plan of this kind could help the U S compete in world markets, but it certainly would not find any takers if shipping costs are unaffordably high," says Asendorf

He notes that cargo preference currently applies to Food for Peace shipments to needy countries as well as to the blended credit shipments. But, because of the high cost of shipping on U S vessels, (generally $30-$40 per ton higher than foreign vessels) much of the funding designated for feeding hungry people ends up in the hands of a few U S ship owners

Asendorf says powerful maritime interests are already at work to defeat legislation designed to overturn the court ruling on cargo preference

"Three maritime unions contributed over $2 5 million to national political candidates during the last election cycle," says Asendorf "Farmers are working against a formidable lobbying force More exports are vital if U S agriculture is to return to profitability and if the costs of farm programs are to be brought under control But until the Congress exempts agricultural exports from cargo preference, it's pointless to talk about new federal export sales programs "

Solid. Reliable. Efficient.



Gehl's new 760 forage harvester is more machine for your dollars.

Put it up against all other forage harvesters of its size and you'll say it's the best buy on the market.

This versatile model roars along with tractors as high as 150 hp, and purrs along with tractors as low as 60 hp (Gehl also has two other models the 1260, which can be used with tractors up to 300 hp, and the 1060, with a new horsepower rating for maximum 200 hp)

At Gehl, durability is a *must* And you can see it in the 21" cylinder of the 760 Eight tungsten-carbide-faced knives mounted on a hefty almost three-inch shaft help give the 760 a reputation for ruggedness.

The 760 features a close-coupled cylinder and blower with part of the cylinder knives actually running in the blower compartment. This increases the efficiency of the harvester by eliminating any dead spots in material flow through the unit

The 760 can be fitted with an in-head hydraulic knife sharpener allowing the cylinder knives to be sharpened right in the field, using tractor hydraulics The knife sharpener system can also be used to reface the cutterbar for better cutting and reduced horsepower requirements

In-head hydraulic knife sharpener

Two adjustment bolts (A, B) for single-station cutterbar adjustment

Simplicity of design is a virtue in the 760 And it's a time saver For example, with the simplified single-station cutterbar adjustment system, you can reset the cutterbar from one point on the harvester with a single wrench

A new option for the 760 and 1060 are the bevel extenders for the cylinders These extenders bolt onto the knives and give a longer cutting bevel, improving uniformity of cut in dry corn silage without power-consuming screens Row attachments for the 760 include the one-row, and wide or narrow two-row

There you have it Some of the reasons why Gehl's 760 is cost-efficient as well as low-cost But it's only part of the story You can't fully appreciate this machine until you see it for yourself Ask your dealer to demonstrate and price one out for you And discover its full worth

Carlisle veterinarian Dr. John Enck (left) discusses the state's rabies problem with Grange members at the Penn Harris Motor Inn on Tuesday. Other panelists include state director of the Bureau of Dog Law Enforcement Donald Moul (center) and Grange Ag Committee chairman Jim Aurand.

Rabies

(Continued from Page A1)

Cumberland Counties taking the lead, reporting 24 and 19 cases, respectively, between Jan. 1, and April 19.

Though rabies is primarily a wildlife disease, (raccoons led the way last year with 281 cases) cats, dogs, livestock and humans--in fact all warm-blooded animals are susceptible. The primary method of infection is saliva from an infected animal coming in contact with an open wound, Enck said.

Symptoms are highly variable, but often include lack of normal caution in wildlife. Normally nocturnal animals, for example, may become active during daylight hours and may approach humans and appear unafraid, according to Moul.

Infected cattle may begin to circle or choke, says Dr. Enck, who cautions farmers to keep their hands out of any animal's mouth that exhibits this type of behavior. Once an infected cow is diagnosed, the veterinarian recommends vaccinating the entire herd. He urges all farmers to consult a veterinarian rather than relying on "over-the-counter" vaccines. Farmers using vaccines containing live virus run the risk of exposure, and some products may have lost potency through improper handling, he points out.

Vaccination usually costs $2.50 to $4 per animal, Enck said.

Enck emphasized that, due to their rural location and frequent contact with animals, farmers run a greater risk of exposure. "Vaccinating your dogs and cats is the best way to protect you," he stressed.

Animals to be submitted for testing should be dispatched by means other than shooting in the head, and specimens should be refrigerated until submission.

When human exposure is involved, specimens will be tested at the Department of Health's laboratory in Lionville, Chester County. Animals to be tested in cases of nonhuman exposure should be submitted to the Department of Agriculture's lab in Summerdale, near Harrisburg.

Due to the volume of test requests, not all animals submitted can be tested, said Donald Moul, noting that Pennsylvania averages 25,000 dog bites a year.

"We do not become involved with animals that people only think might have rabies," Moul said, "but whenever an animal bites a human or domesticated animal we do test."

Moul noted that legislation recently sent to the House of Representatives for consideration would require all persons residing in so-called "high risk" areas to innoculate their cats and dogs. The state Department of Health would have the authority to designate such areas. The Department would also set up low-cost rabies innoculation clinics in these areas.

Grange Ag Committee chairman Jim Aurand pointed out that the Grange has had experience in implementing such a clinic and could it to be very successful. The Grange provides clerical services and involves local veterinarians to provide innoculation services.

Other topics discussed in afternoon sessions included soil conservation, Johne's disease research, rural health care, ag in the classroom, computer technology, quilting and microwave cooking.

About 440 Grangers from across the state converged on Harrisburg for the event to celebrate "Grange Week", officially proclaimed by Governor Thornburgh earlier this week.

In designating the observance, Thornburgh noted that, "Since the Grange was founded (in Pennsylvania) in 1873, its members have dedicated themselves to improving farming and rural life in the interest of all Pennsylvanians."

Since its founding more than a century ago, the Pennsylvania Grange has grown to an organization representing 42,000 members in 66 counties. Nationwide, the family farm organization claims 450,000 members in 37 states.

Washrooms not required for farmworkers

WASHINGTON – The refusal by the Occupational Safety and Health Administration to issue a federal regulation requiring sanitation facilities in fields for farmworkers is "well-reasoned and logical," according to the American Farm Bureau Federation.

C.H. Fields, assistant director of AFBF's national affairs division, praised the agency's decision to avoid federal intervention. "There are already 13 states with regulations concerning field sanitation in agriculture. OSHA officials decided there is no compelling need for federal regulations with three-fourths or more of all farm workers already protected by state statutes. A federal preemption in this area of regulation would likely reduce the number of farm workers that would have access to toilets and handwashing facilities in the fields. Since federal manpower is already spread thin, enforcement would suffer," he said.

The farm labor specialist said most farm workers are already provided with reasonable access to toilets and handwashing facilities. "No farm worker is asked to work without access to clean drinking water," he said. "A great many agricultural employers voluntarily provide toilet and handwashing facilities, even in states without regulatory requirements. On most smaller farms, central facilities are located within a reasonable distance to the fields."

Fields also praised Assistant Secretary of Labor Robert Rowland for issuing the decision "based on facts rather than political pressure."

Budget proposal

(Continued from Page A1)

proposal, the Senate Republican Conference quoted Federal Reserve Board Chairman Paul Volcker as saying the $50 billion deficit reduction "will reduce interest rates by three to four percent, which translates into an increase of $6 to $8 billion in income to farmers.

The budget discussion, for the moment, has leaped ahead of the policy considerations addressed by the 1985 Farm Bill. The Farm Bill, clearly had to await the outcome of the budget process before proceeding any further, Capital insiders said.

Phillips said the Senate Agriculture Committee will resume consideration of agricultural policy in early May – either to flesh out the details on the budget or to plunge ahead with the policy changes being proposed in the Farm Bill.

Farm crisis could worsen if U.S. aid levels are reduced

DENVER, Colo. – The financial stress in agriculture is not shared equally by all farmers and could worsen over the next couple of years, according to a recent report prepared by the Farmbank Research Service in Denver, Colorado.

The report describes three classes of farms–small farms with annual sales of less than $40,000, medium sized farms with between $40,000 and $500,000 in annual sales and large farms with over $500,000 in annual sales.

"As a group, the large farms account for one percent of all operators, control ten percent of all farm assets, earn 29 percent of the gross farm income and receive 48 percent of the net farm income," noted David Reinders, Senior Economist at Farmbank Research Service. "These farms are in good financial condition," he adds, "despite their relatively high debt-to-asset ratios."

At the other end of the scale, operators of small farms also appear to be in good financial condition, controlling 39 percent of all farm assets. Non-farm income is the reason, accroding to Reinders. Although 73 percent of all farm operators are in this category, they earn only 13 percent of the gross income and receive a mere one percent of the net farm income.

"However," Reinders adds, "they receive 80 percent of the non-farm income, and it's this income that pays interest and principal on farm income, and it's this income that pays interest and principal on farm debts."

The report illustrates that farmers experiencing the most severe financial stress are those operators in the middle category with debt-to-asset ratios of more than 40 percent About 9 percent of the nation's operators fall into this category. They control about 14 percent of assets but are responsible for almost 40 percent of the debt, according to the report.

"This doesn't mean that there aren't very large, highly-leveraged operators going out of business due to financial stress," explained Reinders. "There are, and the same is true with operators of small farms. But as a general rule, the financial stress in concentrated in those 210,000 farmers with annual sales between $40,000 and $500,000 and debt-to-asset ratios above 40 percent," he added.

According to Robert Jensen, Director of Farmbank Research Service, "We wanted to find a way to estimate the overall financial condition of production agriculture and what affect, if any, we can expect from changes in government support programs stemming from the 1985 farm bill." To do this, the research service applied a method developed in cooperation with Iowa State University in early 1984.

The method measures financial stress by estimating the amount of interest and principal that can't be repaid when due. In estimating these amounts, estimates of cash flow were used for a given rate of return on assets, interest rates on debts, and repayment rates for principal.

The method assumes that farm operators will use cash receipts to pay cash operating expenses first, then interest obligations, and finally principal payments.

"We set up our base analysis to reflect, as best we could, the current economic situation," explained Jensen. "We used a 6 percent rate of cash return on the current value of assets (comparable to the average return over the 1980-1984 period); an 11 percent average rate of interest on total debts (comparable to the rate paid by Iowa farmers in early 1984); and a 5 pecent rate of principal repayment which implies an average term of 20 years on total debts."

Under this scenario, the analysis concluded that a total of $2.22 billion in interest and $6.24 billion in principal will go unpaid nationally. According to the report, $4.33 billion in late interest and principal can be attributed to the middle sized farms with debt-to-asset ratios over 40 percent.

According to Jensen, these figures presume government support to agriculture will continue basically unchanged. "If the 1985 farm bill lowers government support to agriculture significantly," he added, "these estimates are understated."

The report also illustrates a less favorable scenario in which government support is significantly curtailed, yielding a 4 percent rate of cash return on total assets, a 13 percent average rate of interest on all debts; and a 5 percent rate of principal repayment. Under this scenario, 33 percent of the interest owed and 81 percent of the principal due goes unpaid. For 1985, this suggests $9.24 billion in interest and $8.6 billion in principal payments will not be paid on time.

On the other hand, an increase in government support with a Federal Reserve policy to reduce interest rates could decrease financial stress. If the cash rate of return on assets increases to 10 percent while the average interest rate declines to 10 percent, no interest would go unpaid and only 11 percent, or $1.2 billion, of the principal owed would go unpaid nationally.

"How severe financial stress becomes this year and next depends a good deal on government support to agriculture," notes Jensen. "Our figures indicate that should Congress, the Administration and the Federal Reserve continue supporting agriculture at current levels, financial stress could be lessened significantly over what it might otherwise be and unpaid interest and principal could be $8 billion or less."

The Farmbank Research Service is part of Farmbank Services--the central service organization for the nationwide Farm Credit System, providing joint services to Farm Credit banks in the areas of research, communications, risk management, human resource development and joint purchasing. In turn, the cooperatively owned banks and associations that make up the Farm Credit System provide more than one-third the total credit used by American agriculture.

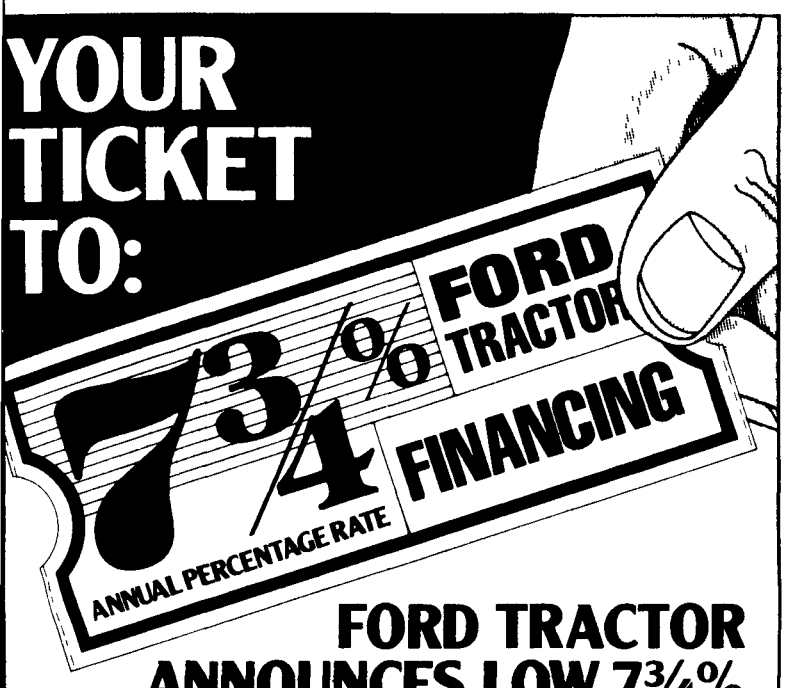
CPR course offered

LANCASTER – The Lancaster Council of the American Heart Association is offering a cardiopulmonary resuscitation (CPR) course for the public May 6, 8 and 10 from 7 to 10 p.m. at the council office, 610 Community Way.

The course costs $3.50 a person and is limited to 20 people. For more information and to register, call 393-0725.

LANCASTER FORD TRACTOR HAS

YOUR TICKET TO:



FORD TRACTOR ANNOUNCES LOW 7¾% FIXED ANNUAL PERCENTAGE RATE FINANCING FOR UP TO 60 MONTHS

Buy and take delivery of any new Ford industrial tractor, tractor-loader or backhoe-loader by June 30, 1985

We'll help qualified buyers arrange low 7¾% FIXED ANNUAL PERCENTAGE RATE financing for up to five years through Ford Motor Credit Company

And, you get the security of fixed rate financing Your payments remain the same for the entire term of the finance period even if other interest rates skyrocket

OR DELAY YOUR PAYMENTS UNTIL OCTOBER 1, 1985

We can help arrange a waiver of finance charges and deferral of payments until October 1 for qualified buyers, followed by up to five years of 10¾% FIXED ANNUAL PERCENTAGE RATE financing through Ford Motor Credit Company You'll make no payments and finance charges will not begin to accrue until October 1, 1985 Matching attachments purchased with your tractor or rig may also be financed under these special rates You must take delivery by June 30, 1985

Aim for lower unit costs of production, exec says

ATLANTA, Ga. — Reducing crop yields or emphasizing lower cost per acre cannot solve the current economic problems of agriculture, says Dr. R.E. Wagner, President of the Potash & Phosphate Institute (PPI) and the Foundation of Agronomic Researech (FAR).

In a statement to the PPI Board of Directors, Dr. Wagner strongly advocates the need for farmers to strive for lower unit costs of production (per bushel or per ton).

"Increasing yield with more efficient use of inputs is the only feasible way in the long-term to reduce or control unit production costs so farmers can survive low commodity prices and so U.S. products can compete on world markets. The alternatives are not good. Basically, they are continuing closely government support and pricing ourselves out of the export market," Dr. Wagner explains.

"If U.S. agriculture no longer can respond to low commodity prices with increased production per acre, how can it respond at all, short of continuing, massive government outlays and/or further loss of export markets?" he asks. "How can it be a growth market if it produces corn, wheat, and soybeans less efficiently...at a higher cost of production per bushel with lower yields? Indeed, lowering the unit cost of production through higher yields is an economic necessity for farmers."

One out of every three of our acres is dependent on exports for disposal of its produce. A recent USDA study says that by the year 2000 the U.S. will be exporting half of the crops it grows. It goes on to say that if it does not happen, domestic farm prices will fall, "devastating the farm sector."

There is no way we can retreat to being a domestic cocoon. We must re-position ourselves with strength in the international marketplace. It's not just good for farmers only. Agricultural exports are a component of strength to all the economy, generating nearly 20 percent of total American export earnings, the PPI President continues.

The maximum economic yield concept, championed by the Institute and many others in agriculture, demonstrates that higher yield per acre is the best route to lower cost per bushel or ton or other unit produced.

"We don't say farmers should try for maximum yields, but rather they should **maximize the economics of their yields,**" Dr. Wagner says.

It's no different than in any other industry. Many industries spend huge sums for modern equipment or for the latest technology because they know it will reduce their unit costs, either with a better product or a higher volume or both.

Dr. Wagner cautions against continuing acreage controls in the U.S. "There is no better way to build markets for other exporting countries at the expense of our exports than to offer them the combination of 1) restricting our acreage and 2) keeping our crop prices high. We've seen the devastating effects of that in the last three of four years. I know the high dollar and high interest rates are serious factors, but they have simply made an already bad situation much worse. One could point to countries like Argentina, Brazil, or Australia, and others."

Until we helped them, with our ill-advised policies, some countries new to the export world didn't even know they could produce and compete. Now they do and they like it. In fact, experts are predicting that the world is about to embark on a major surge in agricultural productivity. The U.S. is the only country in the world that tries to limit its production in any significant way, Dr. Wagner points out.

U.S. government programs are not working. There is no more convincing evidence than the financial condition of farmers in America today and the tremendous financial burden on the government, the agricultural leader says.

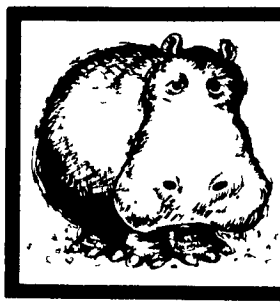
"In summary, agriculture needs a new direction. If American farmers no longer can respond to low commodity prices with higher yields, then they are in even more serious trouble than any of us realize. Aggressive export market strategies are crucial. We need to rework and eventually to eliminate most production restrictions and price supports. Then the greatest food-producing system of all time can get back to work," Dr. Wagner concludes.

Chester County 'Farmer of the Year'

Pictured at the recent Chester County Crops Day are (from left) Chester County Conservation District director Harold Kulp, director Jenny Russell, Howard Mason, John R. Hicks, Robert Mason, director Pownall Jones and Carl Yoder.

Howard and Robert Mason received the District's "Farmer of the Year" award, and John Hicks and Carl Yoder were awarded Certificates of Accomplishment.

Not present were Hoopes T. Yarnall and John S. Stoltzfus, also awarded Certificates of Accomplishment for establishing conservation measures on their farms.



GIGANTIC SELECTION IN Lancaster Farming's CLASSIFIEDS

Forage

NEWARK — In these lean times on the farm, dairy producers may want to make use of more home grown forage in daily feed scedules. The computer-calculated results of forage feed tests obtained from the Cooperative Extension Service or feed company offices show the available amounts of dry matter, energy, protein, fiber, calcium, phosphorus and other minerals cows need to live and produce.

"In order to be useful, forage tests must be translated into daily supplies of nutrients," says University of Delaware extension dairy specialist George F. W. Haenlein.

Haenlein has prepared a fact sheet which describes the ten steps necessary to calculate daily feed rations in terms of maintenance and milk production requirements.

Copies of "Using Forage Test Results" are available by calling county extension office in Newark (451-2506), Dover (736-1448) or Georgetown (856-7303).

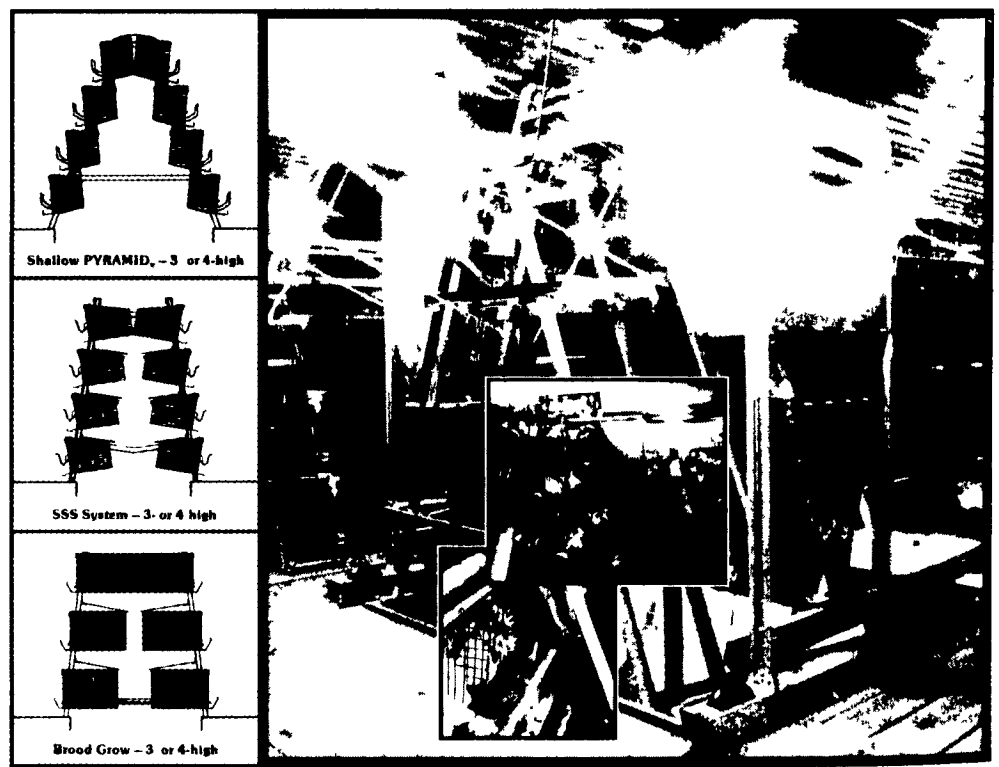
Fast track to egg cost reduction



Chore Time's MEALMASTER FeedKar traveling feeder can help you get your egg costs on track Here s how

1 The typical chain feeder uses 1 1 2 hp to feed each cage tier – 6 hp for a 4 high Our hopper system traveling on tracks, is pulled by a cable using only 1 1 hp – a 95% energy reduction!

2 Cuts feeder maintenance and labor costs to virtually 'zero" You know what a chain feeder costs to maintain!

3 Evens out egg production from one end of the row to the other – birds at the front can t "highgrade" the feed

We d like to talk to you about the other ways the nearly 200 feeders we ve sold are helping owners Our FeedKar is now standard on all Chore Time brood grow and layer cages our famous shallow PYRAMID and new deep PYRAMID our 3 and 4 high SSS

Find out more about the FeedKar – plus our line of cage systems and the Chore Time total package" of feed bins auger ventilation and waterers

Watch for alfalfa pests

NEWARK, DE – Over the next few weeks, many farmers will be busy planting corn. But alfalfa has already begun to grow rapidly, so it's important to take time to scout these fields for early signs of pest activity.

One disease to watch for is **Sclerotinia** crown and stem rot, which can cause significant stand losses in fall-seeded fields. According to University of Delaware extension plant pathologist Bob Mulrooney, this fungus attacks new seedlings in the fall and overwinters in infected plants. Come spring, it starts to grow again–especially in cool, wet weather.

New infections appear as pinpoint watersoaked spots on alfalfa leaves and stems, which eventually turn yellow and collapse.

Mulrooney says the only way to control this disease is to avoid contact with the fungus. He recommends: (1) avoiding fall seeding on sites where the fungus was present the previous spring, (2) a three to four year rotation between forage legumes if spring symptoms are present, and (3) deep plowing to bury the fungus source.

While scouting for alfalfa diseases, also check for insect pests. The alfalfa weevil is the biggest problem on the first cutting, says extension pest management specialist Joanne Whalen. Research has shown that this insect can severely reduce the yield and quality of an alfalfa stand, so close monitoring and early detection are needed to keep populations at low levels.

Larval feeding generally begins shortly after plant growth starts in the spring. Damage initially appears as small pinholes in newly opened leaves. As the larvae mature, these feeding holes enlarge and the leaves appear shredded and skeletonized. Heavily infested fields may look gray.

Whalen says growers should start checking for alfalfa weevil larvae and tip feeding in mid-April. While scouting fields the first week of the month, she found feeding signs on only 5 to 10 percent of plants checked. With favorable growing conditions over the next few weeks, the alfalfa could stay one step ahead of the weevil, she says.

Alfalfa growers should base their treatment decisions on a random sample of 30 stems collected throughout a field, the specialist advises.

"Place stems in a bucket and beat them against the inside to dislodge larvae. In general, we recommend an insecticide treatment if two or more larvae are found per stem. Remember, long-lasting residual materials are more likely to kill parasites of the weevil, so use short-lived insecticides."

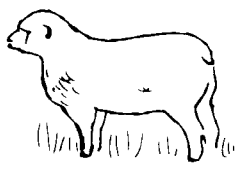
Growers often ask Whalen if they should cut or spray their alfalfa when they find a threshold level of weevils.

"In general," she says, "if the crop is in the full bud stage and a threshold level is reached, we recommend harvesting the field instead of spraying. However, if the population level is steady and you can't harvest in the next three to five days, apply a short residual insecticide immediately."

While scouting for alfalfa weevils, growers may also find pea aphids feeding on plant stems. Because these are cool-season pests, outbreaks generally occur on the first cutting of alfalfa. Even though the aphids seldom reach economically important levels, high populations can cause significant stand reduction.

Make control decisions on a random sample of 30 plants collected throughout the field. Whalen recommends an insecticide treatment if 50 to 75 aphids are found per stem.

Delaware residents who want further information on in-season crop pest activity can call the University of Delaware Cooperative Extension Service CROP PEST HOTLINE at 1-800-345-7544. Out-of-state residents should call 1-302-451-8851.



Don't buy a Straightwall

How much rent?

NEWARK, De. – 'Land rental rates, like any other production 'actor, should be tied to the productivity of that 'actor. You can only afford to pay high rent 'or highly productive soils," says University of Delaware extension farm management specialist Dr. Don Tilmon.

He suggests farmers take a close look at the rates they're paying for rented land. "If the rate is too high, next year try to re-negotiate your rental agreement to either a lower rate, a flexible cash lease or a share lease that spreads some of your risk between you and your landlord," he advises. 'If all else fails, give up the rented land. It's better to farm smarter than bigger."

Location of rented fields is another consideration for farmers who are trying to reduce costs. "How far do you travel to your most distant piece of land?" the specialist asks. "Rented land that's far away should be evaluated closely for its profit potential."

How about renting new land? Don't do it if the move will require the purchase of additional capital items or the commitment of additional full-time labor, Tilmon advises.

He suggests farmers use the following residual approach in deciding how much to pay for rented land:

- Calculate the cost of production, excluding rent.
- Calculate returns based on low (pessimistic), expected (average), and good (optimistic) yields times the expected (contract) price for fall delivery.
- The balance, after subtracting the production cost from the range of revenues possible, is the range of dollar values available for rent.

For more information on rental agreements and financial arrangements, contact your local extension office.

Wheelchair trek is Mike King's "challenge of a lifetime"

BY SALLY BAIR
Staff Correspondent

COCHRANVILLE — It is being called the "challenge of a lifetime"–and what a challenge it is! Twenty-six year-old Michael King is traveling from Fairbanks, Alaska, to Washington, D.C., and it is his mode of transportation which is the challenge. He is traveling the 5,400 miles by wheelchair.

Mike is a paraplegic, the result of a spinal cord injury suffered in a motorcycle accident seven years ago. While he was vacationing with friends in Banf Naitonal Park in Canada, a car pulled out in front of him. The accident dramatically changed the life of this active teenager.

Before his accident, Mike, the son of Paul J. and Dorothy King, was working in contruction, but was planning to join his father on the family farm in Cochranville after his trip.

He spent three weeks in a hospital in Canada, then three weeks at Hershey Medical Center, where he had back surgery, then 2½ months at Elizabethtown Rehabilitation Hospital. Throughout the long recovery Mike says he was amazed at the support of his friends and family, and says there was not a day went by in Canada without a note from someone, and not a day when he returned to Pennsylvania that he didn't have a visitor, despite the 65-mile trip from his home.

He is the first to admit that when he returned home, totally dependent upon his family and friends, it was difficult. In retrospect he says it was a great feeling when he finally got hand controls on his van, offering him an independent life.

Eventually he went to college and resumed an active life, but he says, "Life was going easy for me, so I thought it was time to do something wild and crazy."

And so, the idea began. Mike says he has always had a dream to bike or hitchhike across the United States. Because another Lancastrian had ridden a wheelchair coast to coast, he said, "That was done. I decided to do Alaska."

He says, "There are two reasons for the trip. One is to support other handicapped. The second is to help people understand that they can reach out to goals and dreams and make life exciting despite the difficulties that come along."

Indeed, the itinerary was chosen in part because of all the organizations Mike had encountered in those states which he wished to help. One function of his trip will be to raise funds for the handicapped in the areas he will be visiting, through benefits, testimonial dinners and other events.

He will travel from Alaska to Alberta, Canada, Montana, Wyoming, Colorado, Kansas, Missouri, Indiana, Ohio, Pennsylvania, Baltimore and Washington, D.C. He estimates that about 1,000 miles could be cut out by being more direct, but it is important to visit friends and institutions along the way that he has come to know through his college work in Kansas.

The trip is planned to encompass 123 days of the road. Mike has planned that Sundays will be days of rest, unless he gets behind in his goal.

It is a little early in the season to be traveling in Alaska, but the timing is planned to allow Mike to begin graduate school in the fall. A graduate of Tabor College in Kansas, with a major in church ministries and social work, Mike is determined to get his master's degree as the first step in working in rehabilitation centers with spinal cord injuries. Mike says that while he received excellent medical help at the time of his injury, he had little counseling. He believes there is a need for someone "to feel and to help and to know what patients are going through."

Packing necessities for a four-month trip is no small matter. Mike says some clothes have been packed away in boxes to be brought out in the heat of the summer. One small suitcase will go with him on the flight to Alaska; the remainder will go by van, his main supply carrier.

The first part of the journey will be the most grueling, for many reasons. Mike is extremely well traveled, and knows the states from Colorado east. Alaska, however, is a big unknown. He says, "As long as the weather behaves up north, we'll be all right. But the weather patterns change quickly."

He acknowledged that their main concern for Alaska and the Alaska-Canadian Highway is if it gets muddy, a distinct possibility for the spring of the year. The highway is 1,500 miles long, 200 of which is gravel. He adds that according to the maps they have consulted, they should not get into gravel highway until two or three weeks into their trip.

Of course, Mike will not be traveling alone. He will be accompanied every mile of the way by a support van. The van, designed to sleep three, will also carry food, clothes and other necessities. There will be a two-way radio contact between the van and Mike in the wheelchair, and the van has a public address system by which the van driver can communicate with Mike. For the first month, the driver of the van will by Curt King, Mike's 22-year-old brother who is taking a vacation from his construction job to help with the project.

There will also be a four-person support crew, consisting of students from Messiah College, which is cooperating by offering the students credits for the experience. The crew will include a journalist and a photographer who will help document the trip. It will be the job of this support crew to make arrangements as the group moves along, including contacts with the media, and follow-up activities, once Mike has gone through the area.

Michael King checks out some of the supplies that his brother, Curt, is putting into the van as they make final preparations for the journey across the United States. Cut will drive the van to Alaska, then stay with Mike for the first month. Other van drivers will accompany him for the rest of the trek.

Contacts have been made along the entire route with State and County police, and Mike says they have been supportive in suggesting routes to the group. He will be allowed on a few Interstate highways in the West, but they will travel primarily on secondary roads.

To prepare for trip, Mike says the important thing is "to put in road miles." He adds, "I had always lifted weights since the accident to build up endurance." He has stopped weight lifting and concentrated on road miles since February, now averaging 45 miles daily.

Mike said he expects to put in eight to 12 hour days, and averages about five to six miles an hour. "That is the pace I am setting for myself. It's the average I want to keep."

Although he has run some races in his wheelchair, he has never done endurance runs. He said some people have told him the Appalachian Mountains are worse than the Rockies. To prepare, he has traveled "quite a few" hills in the routes around his home. He maintains that hills are not a problem because once over the crest you can coast and recuperate for the next one. He says, "You can push yourself real hard and then rest as you're cruising downhill."

Mike will be traveling with two "Quada" wheelchairs, donated by the company. The chair is lightweight, weighing only 22 pounds. The support vehicle will carry a plethora of nuts, bolts, tires, and extra wheels, to be prepared for any emergency. He pointed out that he has 800 miles on the tires of his training chair and they are ready to be replaced.

The itinerary has been planned on a daily basis, but reservations, are not firm because of the potential for delay. This will be one job of the road crew. Mike says the Mennonite Central Committee is helping to spread the word through Mennonite communities, and they hope to get some lodging and food through this hospitality. In the beginning they hope to have more conventional accommodations as they move into more highly populated areas.

(Turn to Page B4)

Homestead Notes

This van will be "home" to Michael King for four months as he travels 5,400 miles from Fairbanks, Alaska, to Washington, D.C. It will be with him every mile of the journey by wheelchair, carrying supplies, and maintaining communication.

If you haven't checked John Deere's deal, you haven't gotten the best deal

Shop around There are all kinds of "deals" floating around out there And most of the benefits of those "deals" disappear after the dollar sign. Our "better" deals go far beyond the dollar sign We're going to be very competitive price wise, but we can offer you so much more We're ready to show you just how sweet a deal you can make—right now

DEAL 1. 4WD TRACTORS

Thousands of dollars in pass-along savings on every new John Deere 4WD tractor in stock No interest for 9 months from date of sale, (or 1 May, 1986 depending on Ser # See us for details) with John Deere financing * Or in lieu of the finance waiver take an extra discount worth thousands more!

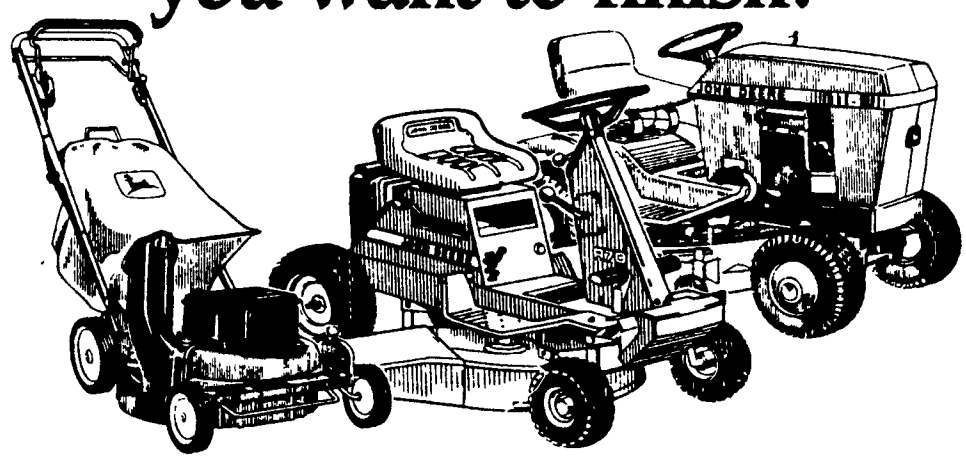
We're ready to write the most competitive deals around on any new John Deere equipment Stop by today for all the details

*Availability of John Deere financing subject to approval of credit All tractor offers end June 15 1985 and others may be withdrawn at any time

Once you've decided to mow with the best, it's only a question of how fast you want to finish.



No matter what kind of lawn you have or how much time you want to spend on it, there's a dependable John Deere mower designed for the job.

If you have a lawn of a quarter acre or less, your best bet is probably a walk-behind mower. There are several models available, including the 21-inch self-propelled version. It comes with a dependable 4-hp engine, a deep die-cast aluminum deck, and rear-wheel gear drive.

If you own a larger lawn, you may prefer one of five John Deere riding mowers. even the 8-hp R70, the lowest cost model, can mow ¾ of an acre in about one hour. It has a 30-inch mower and a 5-speed shift-on-the-go gear-drive transmission. A 6½-bushel rear grass bag is optional. If you mow an acre or more, a John Deere lawn tractor may be in order. The 116, for instance, with a 46-inch mower and 16-hp engine, can mow an acre of lawn in about 45 minutes.

See us today for the mowing equipment right for you.

The Long Green Line™

JOHN DEERE

Nothing runs like a Deere™

Mike King

(Continued from Page B2)

Mike pointed out that eating well is important, and he is accustomed to eating a lot of carbohydrates and foods that are high in calories.

It has been difficult for them to establish an exact cost of the trip, though it will all be paid for by donations through the Hope for Life organization, chaired by Myron Stotzfus. Mike makes it clear that the money above the cost of the trip will be donated to agencies serving the handicapped. Monies raised along the way given to agencies in those areas.

Mike says he is pleased and buoyed by the support his friends and the community have shown. Not only were the van and wheelchairs donated, but Hershey corporation donated granola and Hershey bars for quick energy as he travels. "It is really great to see how people are picking up and supporting and encouraging."

Serious planning for the trip began last summer, and in the fall Stotzfus began working with Mike and helping with the details.

Packing is no small matter. If you have difficulty deciding what you need for a weekend, imagine Mike's dilemma. He said some things are packed in boxes to be used in July. In Alaska he will need layers of sweatshirts and other cool weather wear. His gear includes a durable raincoat and bib pants, which he says he will use in Alaska to ward off the wind. Although he says they will sit out a downpour, he will ride during rain because of the necessity of keeping close to schedule. He points out that a real concern in the north is the danger of frostbite, because he has no feeling in his legs and feet. This will necessitate layers of warm, thermal clothing to protect him.

The doctor who did his back surgery and the nurse who worked with him at Elizabethtown are both members of the board of Hope for Life and will be available for any medical problems he may encounter. They will be able to make contact for him throughout the country should the need arise. There is also a toll free number which will allow him to check in with his local office each day to report progress, problems or other needed information.

Traveling is not new to Mike. He has traveled extensively in Europe and Central America as well as Brazil and Peru. He said that Central America is not equipped for wheelchairs, and that experience will probably help him in his journey.

Mike says, "Physically, I'm ready, but there is a little fear of the unknown and wondering if we'll run into any problems." He expects there will be days when he wonders why he decided to undertake such a journey, but said he has many friends who have told him to call when he reaches that point and they will personally come and encourage him.

How does he pass the time as he rides mile after mile? He said, "By being a little crazy out there. I do cartoon imitations and talk to myself." He adds, "I sing a lot when I'm out."

Singing comes naturally for Mike, who sang with the "Choraleers" a contemporary gospel music group. He has also traveled widely in the United States with a seven-person band, and continues to sing at church weddings and functions. He figures that the nearness of the van will also help to ward off loneliness as he travels the miles of highway.

The danger of blisters is constantly with him, though he wears gloves and has worked so hard preparing. "I just tape them and use a little grease," he says, adding that warm weather is particularly bad for getting blisters.

Very careful records will be kept by the road crew, including a ledger recording amounts of money spent.

Mike says he appreciates the support of his family. His mother says, "Now I say go for it. We are glad he is using what he has and not worrying about what he lost."

A send-off testimonial dinner and fund-raiser was held in Lancaster on Thursday, and Friday Mike left by plane for Fairbanks where the journey will begin on Monday.

Hope for Life has prepared a brochure which details Mike's reasons for going and explains the plans for the trip.

Certainly for Mike this represents the biggest challenge he has undertaken. But with his courage and determination, this challenge, once successfully met, will be the stepping stone for others. The real challenge is for others–to face and succeed in their challenges.

Horseback Ride-a-Thon

HICKORY, Md. – The Tri-County Riders are sponsoring their 4th annual Horseback Ride-A-Thon on May 11, for the Friends of Child Find, Inc.

The ride will be approximately 20 miles, starting from Hickory, Md. The event is open to members of all horses clubs and experienced riders. Anyone can camp for the weekend and trail ride on Sunday.

Interested persons may contact John Newton at 301-838-9528 for sponsor sheets.

Ida's Notebook

Ida Risser

My husband's aunt, who was over 100 years old, died last month and I've been privileged to read some of her diaries.

I'd like to share some of the things that I found interesting in her 1902 and 1904 entries. She was in her late teens and, being the oldest girl in a family of seven children, it seems that the emphasis was on "work." We all know that there were no conveniences, as we know them, to help at that time.

In the spring, they moved to the summer kitchen and baked their bread there They must have had a big asparagus bed as one day 116 bunches were sent to town to be sold and another day they had 283 bunches. The next day they churned 40 pounds of butter. That must have been an all day job as I remember churning butter in the early days of my marriage. At that time we did not have enough milk to sell and so it was necessary to do this greasy and time-consuming job.

She mentions picking one bushel blackberries on July 26 and then on Aug. 1 another 43 quarts. They canned and dried peaches and one rainy day, the men helped to pare them. Another day they baked pies and then filled the oven with apples to be dries. Her father picked 26 bushel Kiefer pears on the 10th of October. Then on the 22nd of October they moved back to the winter kitchen in the main house That fall they went to Martic Forge to pick up chestnuts.

But through all of these entries was a generous sprinkling of visiting and some traveling Her parents went to Schenectady to visit an uncle for ten days. Many people came for meals and stayed overnight. The first Reist reunion was held July 21, 1904 at her great uncle John's farm. Many funerals are mentioned. Dec. 31, 1902 she was at Martin Nissley's watch night. Some days the men hauled and stored ice and that year their tobacco was sold for seven and a half cents per pound.

She says, "Mama washed the carriage and the Jenny Lind and Papa went to a horticulture meeting in Lancaster." There were "handkerchief surprises" and Farmer's Institutes to attend at Pleasant Hill plus a Lovefeast at the Crossroads.

All in all, I suppose it was a pleasant way of life and probably they were as busy as we, even though we think of life in the past as being more leisurely.

Marhefka named outstanding home economist

UNIVERSITY PARK – Jane B. Marhefka, interim state program leader for home economics with Pennsylvania State University's Cooperative Extension Service, has been named "Outstanding Home Economist" by the Pennsylvania Home Economics Association. The award was made during the association's annual meeting held recently in Reading.

Mrs. Marhefka was honored as a dedicated professional home economist whose outstanding contributions have helped improve the quality of life for families in Pennsylvania. In addition to citing her leadership in coordinating the state home economics program, the award also recognized Mrs. Marhefka's comprehensive family living program in Juniata County, where she serves as county extension director. Her programs there have encompassed day care, rural dental health and nutrition.

Treat yourself to chocolate

Chocolate — the very word is conducive to spinning tales of love, to stimulating the senses. Even the Aztec emperor Montezuma drank chocolate from his golden ceremonial goblet. It was called chocolatl, a lukewarm drink mixed with beer or wine and seasoned with pepper.

Hernando Cortez first tasted this pleasurable drink in 1519 and brought cocoa back to Spain. The Spanish added sugar and other flavorings to the rich-tasting beverage. But it wasn't until 1847 that the first piece of chocolate was eaten.

Soon chocolate became the delectable ingredient in all types of desserts, and today people everywhere enjoy indulging in this tasty treat.

THE ULTIMATE CHOCOLATE CAKE

2 cups unsifted flour
⅔ cup cocoa
1¼ teaspoons baking soda
¼ teaspoon baking powder
1⅔ cups sugar
4 eggs
1 teaspoon vanilla
1 cup mayonnaise
1⅓ cups water

Mix first 4 ingredients; set aside. In large bowl with mixer at high speed, beat next three ingredients 3 minutes or until light and fluffy. At low speed, beat in mayonnaise. Add flour mixture in 4 additions, alternating with water, beginning and ending with flour. Pour in 2 9-inch greased and floured pans or a 9x13x2-inch pan. Bake at 350°F. for 30 to 35 minutes or until toothpick comes out clean.

Genevieve Voneida
Muncy

CHOCOLATE LOVER'S ICING

¼ cup crisco or butter
½ cup cocoa
¼ teaspoon salt
⅓ cup milk
1½ teaspoons vanilla
3 cups 10x sugar or enough to make spreading consistency. Very good — not sickening sweet.

Genevieve Voneida
Muncy

TOLL HOUSE PIE

2 eggs
½ cup unsifted flour
½ cup sugar
½ cup firmly packed brown sugar
¾ cup margarine, melted and cooled
1 6-ounce package semi-sweet bits
1 cup chopped walnuts
1 9-inch unbaked pie shell

Preheat oven to 325°F. In large bowl, beat eggs until foamy; beat in flour, sugar and brown sugar until well-blended. Blend in melted margarine. Stir in semi-sweet bits and walnuts. Pour into pie shell. Bake 1 hour. Serve warm.

Mollie Fanton Tressler
Marietta

FROZEN CHOCOLATE PUDDING

2 squares unsweetened chocolate
1 envelope gelatin
3 tablespoons cold water
½ cup confectioner's sugar
1 cup milk
¾ cup granulated sugar
¼ teaspoon salt
1 teaspoon vanilla
2 cups cream

Soften gelatin in the cold water. Melt chocolate slowly and add granulated sugar. Scald milk and stir in the chocolate mixture, bring to boiling point and remove from heat. Add gelatin and stir until dissolved. Add other ingredients except cream. Chill till partly set, then beat the mixture. Beat the cream and add to the chocolate mixture and whip together and freeze.

Verna M. Reiff
Leola

CHOCOLATE RIBBON CHEESECAKE

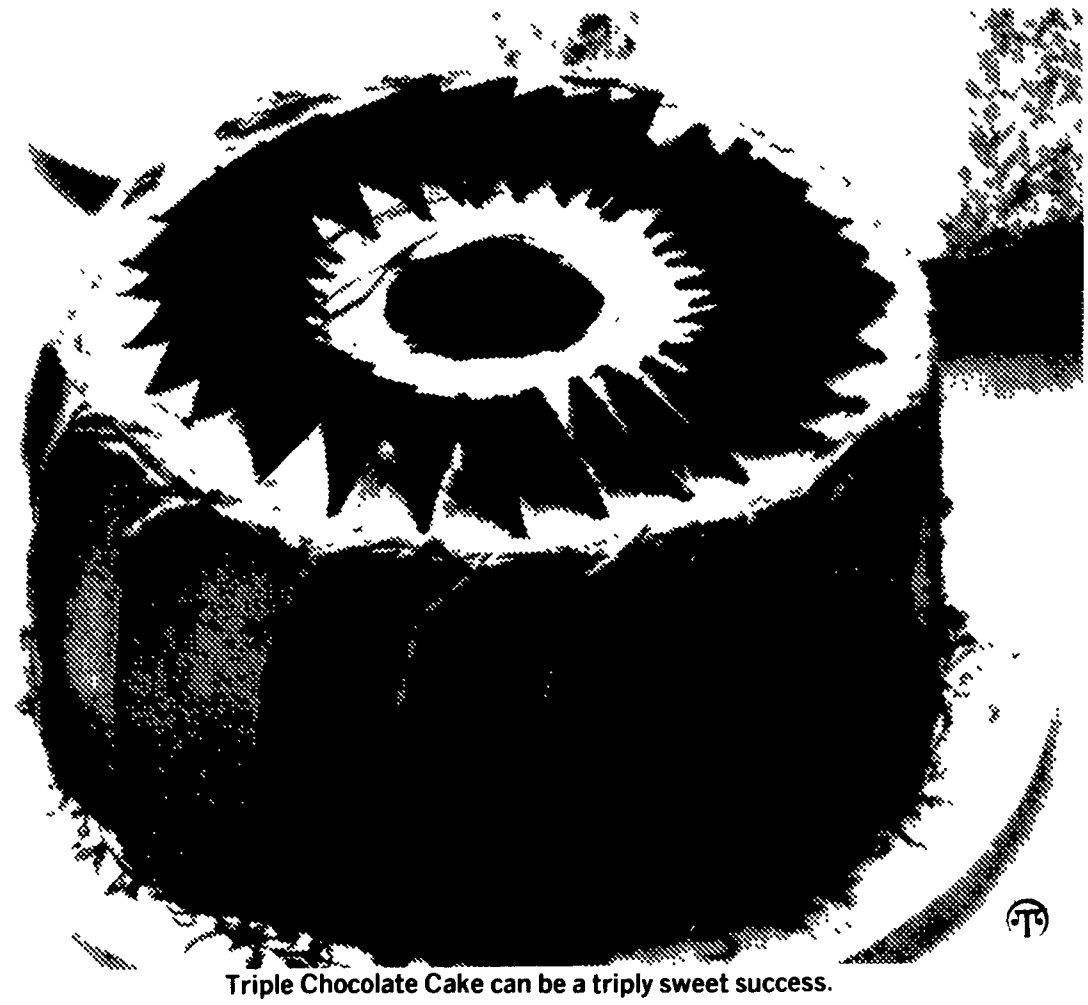
2 cups chocolate wafer crumbs
½ cup margarine, melted
1 envelope unflavored gelatin
¼ cup cold water
2 8-ounce packages cream cheese, softened
1 teaspoon vanilla
1 7-ounce jar marshmallow creme
1 8-ounce container whipped topping, thawed
1 cup semi-sweet chocolate pieces, melted

Combine crumbs and margarine; press onto bottom of 9-inch springform pan. Chill. Soften gelatin in water, stir over low heat until dissolved. Combine cream cheese and vanilla, mixing until well blended. Gradually add gelatin, mixing until blended. Beat in marshmallow creme, fold in 2 cups whipped topping. Fold chocolate into 2 cups gelatin mixture Pour remaining gelatin mixture over crust; carefully spoon on chocolate mixture. Chill until firm. Top with remaining whipped topping.

CHOCOLATE ICE CREAM FONDUE

6 squares (1 ounce each) semi-sweet chocolate OR 1 6-ounce package semi-sweet chocolate pieces
1 cup vanilla ice cream, softened
¾ cup sugar
½ cup butter
1 teaspoon vanilla extract
1 to 2 tablespoons creme de menthe

Melt chocolate over low heat in heavy 1½-quart saucepan. Add ice cream, sugar and butter. Cook, stirring constantly, about 5 minutes or until mixture is thickened. Stir in vanilla and creme de menthe, if desired. Transfer to fondue pot over low heat. Suggested dippers: Cubes of angel food or pound cake, apples, pear, bananas; Swiss, Gouda and cream cheese. Yield· 2 cups.



Triple Chocolate Cake can be a triply sweet success.

MARBLED BROWNIES

1 cup butter or margarine, softened
1½ teaspoons vanilla
2 cups sugar
4 eggs
1¾ cups all-purpose flour
½ teaspoon salt
2 cups coarsely chopped nuts
2 squares unsweetened chocolate, melted and cooled
Velvety Chocolate Frosting

Cream first three ingredients together until light and fluffy. Add eggs one at a time, beating well after each. Add flour and salt and mix until blended. Stir in nuts. Divide batter in half and add chocolate to one half. Drop batter alternately by heaping teaspoonfuls into greased 13x9x2-inch pan lined on bottom with waxed paper. Press down with spoon to smooth top and run knife through batter several times to give marbled effect. Bake in moderate oven, 350°F., about 45 minutes. Turn out on cake rack and peel off paper. When cold, spread with frosting.

Velvety Chocolate Frosting

2¼ cups confectioner's sugar
4 squares unsweetened chocolate, melted
4 egg yolks
¼ cup butter or margarine, melted
1 teaspoon vanilla

Add ¼ cup hot water and the sugar to chocolate. and mix well. Add egg yolks one at a time, beating well after each. Slowly add butter, then vanilla and beat until smooth.

Mrs. David Blank
Kinzers

CHOCOLATE SYRUP

1 cup sugar
½ cup cocoa
½ tablespoon flour
¼ teaspoon salt
1 cup water
1 teaspoon butter
1 teaspoon vanilla

Mix all dry ingredients, add water and butter. Let come to a boil, remove from fire and add vanilla. Add a few marshmallows and stir to thicken. Tastes good on ice cream.

Genevieve Voneida
Muncy

TRIPLE CHOCOLATE CAKE

Chocolate Angel Food Cake (below)
Chocolate Fluff(below)
Chocolate Triangles (below) or dark chocolate covered thin mints

Bake Chocolate Angel Food Cake as directed. Remove cake from pan. Split cake to make 3 layers. Fill each layer with 1 cup Chocolate Fluff; frost cake with remaining frosting. Decorate with Chocolate Triangles. Refrigerate any remaining cake.

Chocolate Angel Food Cake

1½ cups powdered sugar
¾ cup cake flour
¼ cup cocoa
1½ cups egg whites, about 12
1¼ teaspoons cream of tartar
1 cup granulated sugar
¼ teaspoon salt
1½ teaspoons vanilla

Heat oven to 375°F. Mix powdered sugar, flour and cocoa. Beat egg whites and cream of tartar in large bowl on medium speed until foamy. Beat in granulated sugar on high speed, 2 tablespoons at a time; continue beating until stiff and glossy. Add salt and vanilla with the last addition of sugar. Do not underbeat.

Sprinkle flour mixture, ¼ cup at a time, over meringue, folding in just until flour mixture disappears. Push batter into ungreased tube pan, 10x4 inches. Cut gently through the batter with a metal spatula.

Bake until cracks feel dry and top springs back when touched lightly, 30 to 45 minutes. Invert pan on heatproof funnel; let hang until cake is cold.

Chocolate Fluff

3 cups chilled whipping cream
1½ cups powdered sugar
¾ cup cocoa
¼ teaspoon salt

Beat all ingredients in chilled bowl until stiff.

Chocolate Triangles

Heat 1 bar (4 ounces) sweet cooking chocolate over low heat until melted. Spread over outside bottom of square pan, 8x8x2 inches. Refrigerate until firm, bring to room temperature. Cut into squares, cut squares diagonally into halves for triangles. Refrigerate until ready to use.

Featured Recipe

This week's featured recipe comes from Lancaster County Dairy Princess Judy Miller. Judy is already gearing up for June Dairy Month with a cow coloring contest for all Lancaster County kids age three to eight. To enter, kids should color in the cow on page B10 and send it to Judy.

The recipe Judy shares this week is a good one for those hot days that have already arrived and offers a good way to use the fresh strawberries that will soon be in season.

Strawberry Cooler

Vanilla or strawberry ice cream (vary according to taste)
½ cup milk
1 cup strawberries (fresh or frozen, drained)
½ teaspoon vanilla

In a blender, pour in milk and slowly add strawberries. Blend 30 seconds. Add vanilla; blend another 30 seconds. Add ice cream, one scoop at a time, until shake reaches desired consistency. Pour into two tall, frosty glasses and garnish with fresh mint and strawberries. Makes 2 servings.

QUESTION - Nancy Farabaugh, Ebensburg, would like recipes to make honey spreads and butters such as apple butter or others like cherry, grape, orange, peach, pear, plum, quince or tomato

QUESTION - Annie Kauffman, Honey Brook, would like a recipe to can pizza sauce that tastes like the kind made from Mrs Wages Pizza Sauce mix bought in the stores

QUESTION - Fran Westfall, Spring Grove, would like a recipe for a cheesecake that is very heavy with a pie dough crust, and is not made from cream cheese Sometimes, the cake is served with pineapple on top, or with apples, or raisins and cinnamon

QUESTION - Colleen Shields, Jersey Shore, would like a recipe for cinnamon rolls that stay soft

ANSWER - Pat Stambaugh, Elliotsburg, requested a recipe for homemade ravioli Thanks go to Fran Westfall, Spring Grove, for the following recipe

Ravioli

6 cups flour
¾ teaspoon salt
4 eggs
About 1 cup warm water

Sift flour and salt onto board or big bowl Make a deep well in the center and put in eggs, beat lightly with fingertips Then mix eggs into flour with a folding and lifting motion of the hands until eggs are well absorbed Add water gradually and start shaping in a ball Knead dough just a few minutes and add just a bit more water if it seems too dry Cover with a warm bowl 15 minutes

Knead again until dough is smooth and air pockets disappear Cover with warm bowl Repeat kneading process two more times Keep dough covered at all times Roll all or half the dough on floured board until very thin (the thinner the better)

Drop teaspoons of filling about 2 inches apart on half of dough Cover with other half, with fingertips, gently press around each mound to form little squares Cut apart with pastry wheel. Cook in boiling salted water 15 to 20 minutes. Drain and place on platter. Sprinkle each layer with cheese and cover tomato sauce

Ravioli Filling

1 pound Ricotta cheese
2 eggs, slightly beaten
½ cup grated Parmesan cheese
1 tablespoon chopped parsley (or flakes)
Salt and pepper to taste

Break up and mash Ricotta with fork Add remaining ingredients. Mix until smooth You can add some chopped cooked ham

ANSWER - Mrs Ginny Atkinson, Bridgeton, NJ, wants to know what ClearJel is. The answer to her question comes from Aletta Schadler, an Extension home economist in Lebanon County. ClearJel, Aletta, says, is a modified food starch made for commercial food processors that has equal thickening power as cornstarch However, unlike cornstarch, it can be reheated without breaking down, and it will not separate even if heat processed (canning) or frozen

There are two kinds of ClearJel - instant and regular. Aletta suggests using the regular, which is available in many bulk food outlets

Chocolate

(Continued from Page B6)

WOOPY PIES

1 cup shortening
2 cups sugar
2 egg yolks
2 whole eggs
1 cup cocoa
½ teaspoon salt
4 cups flour
2 teaspoons vanilla
1 cup sour milk
1 cup hot water
2 teaspoons soda

Mix first four ingredients. Add remaining ingredients. Drop by spoonfuls on cookie sheet. Press lightly with bottom of glass that has been dipped in sugar. Bake at 450°F. for 5 minutes.

Filling

2 unbeaten egg whites
1 teaspoon vanilla
4 teaspoons flour
2 teaspoons powdered sugar
4 teaspoons milk
1½ cups shortening
1 box powdered sugar

Put first six ingredients until smooth and fluffy, then add the box of sugar and beat. Spread filling between two cookies.

Price elected Penn State Dairy Princess

UNIVERSITY PARK — Penn State students in the Dairy Science Club selected Deborah Price as the 1985-1986 Penn State Dairy Princess. Deborah was one of four finalists who competed on the basis of speaking ability, poise, service to the college of agriculture, and knowledge of the dairy industry.

Deborah, a sophomore at Penn State majoring in dairy production, is also the Berks County Dairy Princess. After graduation she plans to pursue a career in dairy and livestock Extension or in dairy herd management. She was crowned by Kimberly Kriebel, the 1984-1985 Penn State Dairy Princess from Millerstown, a junior majoring in dairy production.

A panel of judges interviewed each contestant during the club meeting April 10. Judges were: Beth Raney, a former Clarion-Venango County Dairy Princess who is now an educational assistant for the Penn State Cooperative Extension Computer Services at University Park; Dr. harold Harpster, assistant professor of animal science and faculty advisor to Penn State's Block and Bridle Club; and Dr. Gary Killian, associate professor of animal science with the Dairy Breeding Research Center at Penn State.

The Dairy Princess represents Penn State at dairy industry events and presents dairy and other agricultural interests to students at Penn State.

Michelle Campbell, a junior majoring in animal bioscience from Butler County, was elected to be the alternate dairy princess and will assist Deborah in her duties. Other finalists included Annette Shirey, a sophomore majoring in agricultural education from Snyder County, and Kristine Shive, a sophomore majoring in dairy production from Bucks County.

The Dairy Princess Contest is the second in a series of events of the 1985 Dairy Exposition at Penn State that culminate in Show Day on Saturday, April 27. The first event was the dairy cattle judging contest last month

New 4-H club in Aldenville

ALDENVILLE — An organizational meeting to form a 4-H Club in the Aldenville area of Wayne County will be held at 7 p.m. Thursday in the basement of the Baptist Church in Aldenville.

Prospective members between the ages of 8 and 19 are urged to attend.

Evie Vitali, Wayne County nutrition agent, and Jackie Cook, extension home economist, will explain 4-H projects and answer questions.

Sheila Biddle is new Blair County dairy princess

BY BETSY STITT
Staff Correspondent

ROARING SPRING — Sheila Biddle of Williamsburg R1 was crowned the twentieth Blair County Dairy Princess Friday night during the annual pageant at Roaring Spring Junior High School.

Sheila, the daughter of J. Edward and LaDonna Biddle, was crowned by last year's princess, Crystal Pheasant.

During the event, contestants were asked random questions concerning their knowledge of the dairy industry. Sheila's question was "Do you think the image of dairy farming has changed over the years and how?"

In answering, she explained that the image has changed because farming was simpler years ago. She said, "Today's farmers have a more technical job with more emphasis on further education."

Sheila is a 1984 graduate of Williamsburg High School and is attending the Altoona campus majoring in agriculture business. She is active in the 4-H Baby Beef and Swine Clubs and the FFA. She was a finalist in the State FFA Public Speaking Contest. Last summer, she traveled to Europe with the Agricultural Youth Exchange.

Susanne Kelly, Tyrone, and Chris Kensinger, Williamsburg, were named equal alternates.

Susanne, the daughter of Tom and Peg Kelly, attends the Altoona campus of Penn State majoring in human development. She is active in the 4-H Dairy Club and the Judging Team. She enjoys singing and has attended the Fred Waring workshop. She is also listed in Who's Who Among American High School Students.

Chris is the daughter of Garry and Mary Kensinger. She is a senior at Central High School and is in the college preparatory program. Chris is active in the Drama Club, FTA and her church youth group. She plans to continue working on the farm after graduation and have a job that allows her to work with children.

Crystal Pheasant, the 1984 Blair dairy princess, reflected on her activities which included 40 classes of preschool and second graders, and 14 non-farm visits. She also wrote 27 articles and recorded 25 public service announcements, and attended numerous farm events.

Anther highlight of the evening was recognizing past dairy princesses who returned for the pageant. They were Rosemarie Steele Drenning, 1964; Carol Hileman Hoover, 1966; Joyce Hileman Burns, 1967; Sharon Biddle Emenheiser, 1975; Angie Smith Fetzer, 1976; Marcia Smith, 1978; Betsy Stitt, 1981; Kim Hoover, 1982; Luella Smith, 1983; and Crystal Pheasant, 1984.

Tom Riley of WFBG Radio served as master of ceremonies. Judges for the event were Charlene Courtney, 1975 Pennsylvania Dairy Princess; Roy Rumaugh, president and general manager of McLanahan Corp. Hollidaysburg; and Judy Shade, a member of the Huntingdon County Dairy Promotion Committee.

Crystal Pheasant crowns the new Blair County dairy princess Sheila Biddle.

Alternates Chris Kensinger and Susanne Kelly surround Blair County's new dairy princess Sheila Biddle.

Get ready for Dairy Month with cow coloring contest

Michele Gruber is working on one of the coloring sheets she will enter in the cow coloring contest sponsored by Lancaster County's Dairy Princess Committee. Current dairy princess Judy Miller looks on.

MANHEIM — A cow coloring contest for children ages 3-8 is being organized to draw attention to June Dairy Month. Judy Miller, Lancaster County's Dairy Princess, says that the contest will begin May 1 and continue throughout the month, with entries due by June 1.

Judy said that entries will be judged according to neatness and creativity and prizes will be awarded to winners. She and the organizing committee are hoping to have four to five thousand children participating in the contest.

All winners will receive free tickets to attend the Lancaster County Dairy Princess contest on June 15 and prizes will be awarded at that time And, all entries will be displayed in the lobby of the Farm and Home Center.

The coloring sheets for the contest are being distributed to area dairy stores and restaurants and to some elementary schools. Any child in Lancaster County is welcome to enter the contest. If you need coloring sheets call Judy Miller at 653-4288 and she will mail them to you. Finished entries should be mailed to Judy at R.D. 4, Box 408, Echo Valley Road, Manheim, Pa. 17545. Entrants should write their name, address, age and school on a separate sheet of paper.

Color your cow now, and help promote June as dairy month!

York 4-H team third in judging contest

YORK — The York County 4-H Dairy Judging Team placed third at the Delaware Valley 4-H FFA Dairy Judging Contest April 13 at Delaware Valley College in Doylestown.

C.E. Hubbard of New Cumberland led the team with a second-place finish in "reasons" and a third place finish in the overall individual category.

Patty Bupp of Seven Valleys was the 10th individual and Lesley King of Delta was 10th in "reasons." Bridgette Boyer of York also competed for the York County team.

Hubbard recently finished fourth in the Penn State 4-H FFA Dairy Judging Contest.

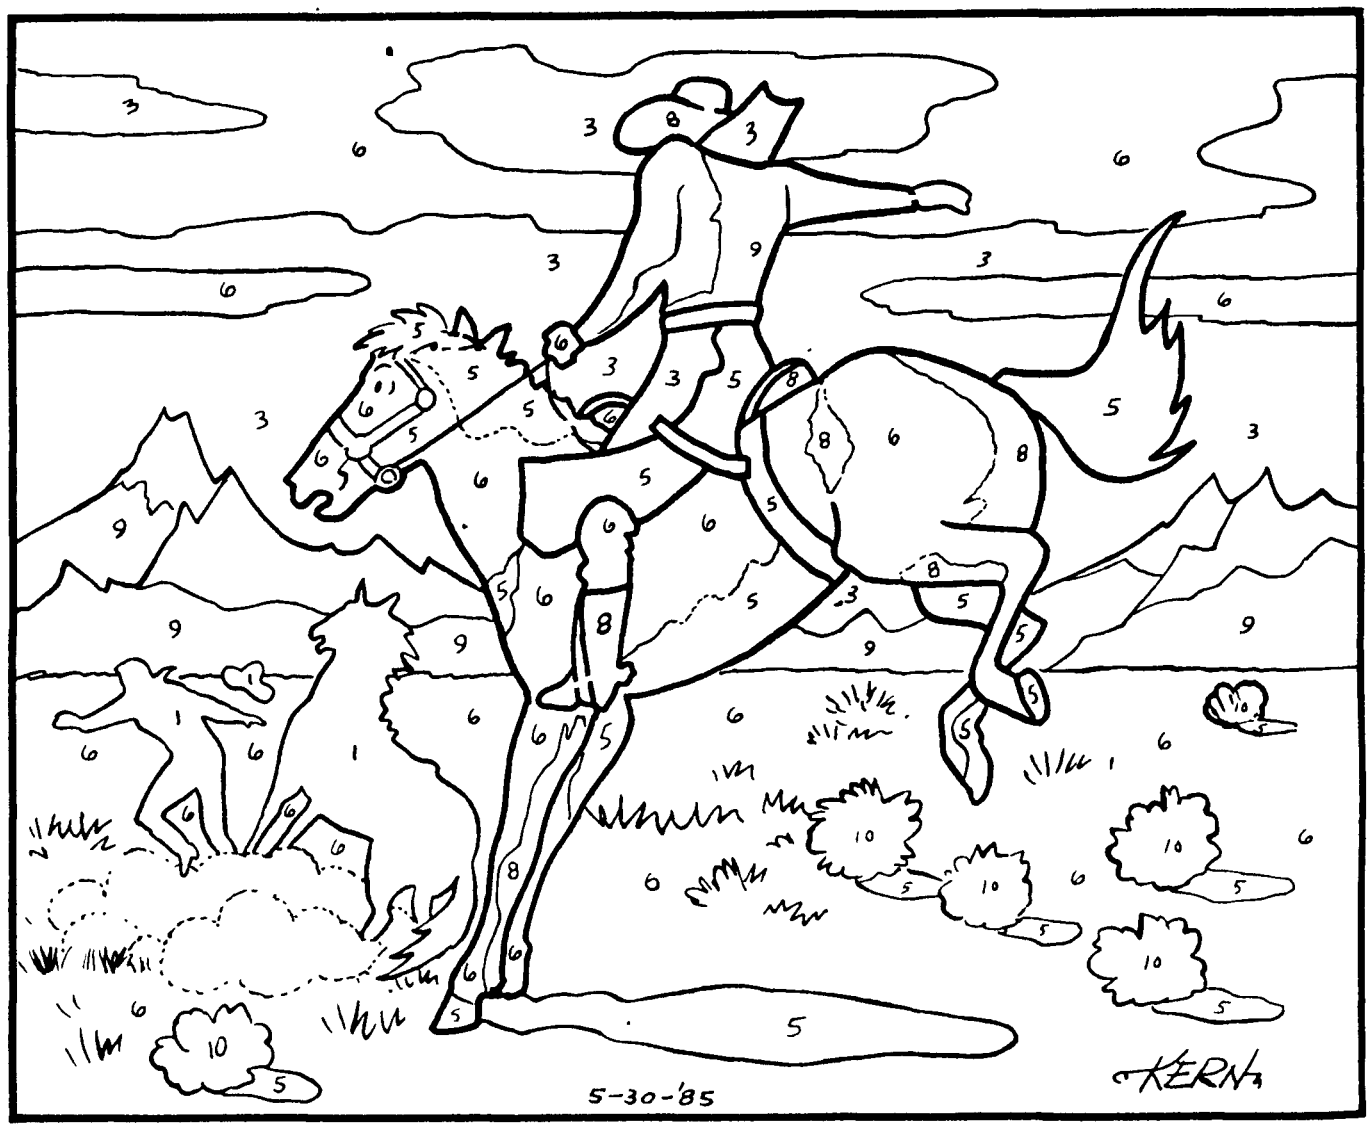
RODEOS ARE A CONTEST OF SUPERIORITY AMONG COWBOYS. ROPING IS ONE OF THE MANY TESTS OF SKILL, IN WHICH COWBOYS COMPETE FOR POINTS TO DECIDE THE WINNER. THE BRONCO BUSTER MUST STAY MOUNTED FOR AT LEAST 10 SECONDS. HE MAY GRIP THE REINS WITH ONLY ONE HAND, THE OTHER HAND MUST REMAIN COMPLETELY FREE.



Entertainment, food featured at Adams Co. Apple Blossom Festival

GETTYSBURG — Adams County will be the site of the 35th annual Apple Blossom Festival scheduled for May 4 and 5.

Highlights of this year's festival include: Live entertainment, chicken dinners, free orchard tours a craft show and sale, petting baby barnyard, livestock and agricultural exhibits, and the crowning of the Apple Blossom Queen. Features this year include an apple butter boil and a wider selection of taste-tempting food treats.

The Apple Blossom Festival is held each year at the South Mountain Fairgrounds located 10 miles northwest of historic Gettysburg, Pennsylvania on Rt. 234 near Arendtsville. The Fairgrounds are situated in the middle of scenic Adams County's 20,000 acres of fruit orchards. The festival gates will open each day from 10 a.m. to 5 p.m. and admission is $1 for adults; children under age 16 are free and there is plenty of free parking.

Visitors from a six state area are attracted to this special annual event to enjoy the festival and to view the beautiful blossoms of the apple, peach and cherry trees which are usually in full bloom during festival week.

Adams County Fruitgrowers, who produce over five million bushels of apples each year, would like to invite you to view, enjoy, and learn about their apple industry.

Attractions, both days, promise to delight both young and old. Other attractions include a display of antique cars, helicopter rides, a large group of antique steam engines, antique corn sheller demonstration, homemade crafts, plus much, much more.

The highlight of Sunday's activities will be the crowning of the 1985 Apple Blossom Queen. Preceding the crowning will be an apple pie baking contest, apple pie eating contests, and apple bobbing contests. A wide variety of food products will be available for purchase such as fresh apples, apple cider, apple butter, candied apples, apple dumplings, apple strudel, apple pies, chicken barbeque dinners (Saturday and Sunday), homemade scrapple and country sausage.

Adding to the activities at the festival will be a living Sham Battle relating to the famous Civil War battle fought at Gettysburg, on May 4 and 5 at 1 p.m.

The Apple Blossom Festival is sponsored by the Adams County Fruitgrowers Association, and coordinated by the Gettysburg - Adams County Area Chamber of Commerce. For further information contact: the Gettysburg-Adams County Area Chamber of Commerce, 33 York Street, Gettysburg, PA 17325.

Adams County fruitgrower David Pitzer of Pleasant Valley Fruit Farms posts direction signs in preparation for the Adams County Apple Blossom Festival May 4 and 5.

Franklin County 4-H Horse and Pony Equestrian Drill team

CHAMBERSBURG — After a five-year lapse, there's a 4-H Horse Production club in Franklin County.

Fourteen members of the new club visited the farm of Joyce Armstrong to learn about breeding a mare, and learn how to recognize when a foal is being born.

The group also judged various types of hay and discussed advantages and disadvantages of feeding each type.

The club includes both draft-type horses as well as light breeds of horses and ponies.

Prospective members aged 8 to 18 are encouraged to join the club.

For more information, contact Mr. and Mrs. Ronald Garling at 263-0141.

Berks dairy princess candidates prepare for pageant

BY ROBIN PHILLIPS
Staff Correspondent

READING — As the selection process for a dairy princess in each county goes into full swing, farm girls across the state are learning what it takes to become a dairy princess. The ability to appear poised and natural, speak in public, and answer questions ranging from "cow science" through "nutrition" are prerequisites of a dairy princess.

In a phrase, according to "The Dairy Princess Primer," a pamphlet given to each contestant, the dairy princess must be "a young lady with well-above average qualities of personality, intelligence, attractiveness, poise, and pride in dairying."

Berks County dairy farmers take great pride in their dairy princess program. With a full schedule of appearances and speaking engagements awaiting the new dairy spokesperson each year, the dairy princess committee painstakingly arranges an orientation seminar that will acquaint the candidates with the program and what is expected of them if they should win the title. Consisting of seminars on poise and public speaking, color and makeup, nutrition, and cow science, the educational program stresses an informed, naturally vibrant, outspoken individual to promote dairy products.

"Milk is a natural. You should look natural," stated Sue Reese, dairy princess coordinator for the past three years. Reese, the coordinator of development at the Reading Hospital, spoke to the candidates on poise, appearance, and public speaking. "The worst thing is to look made up," she stresses, "especially for a dairy princess."

"People judge you everyday," she continued. The ability to coordinate your clothes, manage your hairstyle, and use cosmetics must be practiced and worked at everyday, according to Reese. "It's not that one look is right or wrong, but that you carry it through," she advises.

Reese also discussed the importance of facial expressions. "Smile easily; show interest in others; and be able to show feeling," were a few of her rules. "We never know how important our one meeting with a person is going to be that day," she cautioned. "We have to be concerned with impressions."

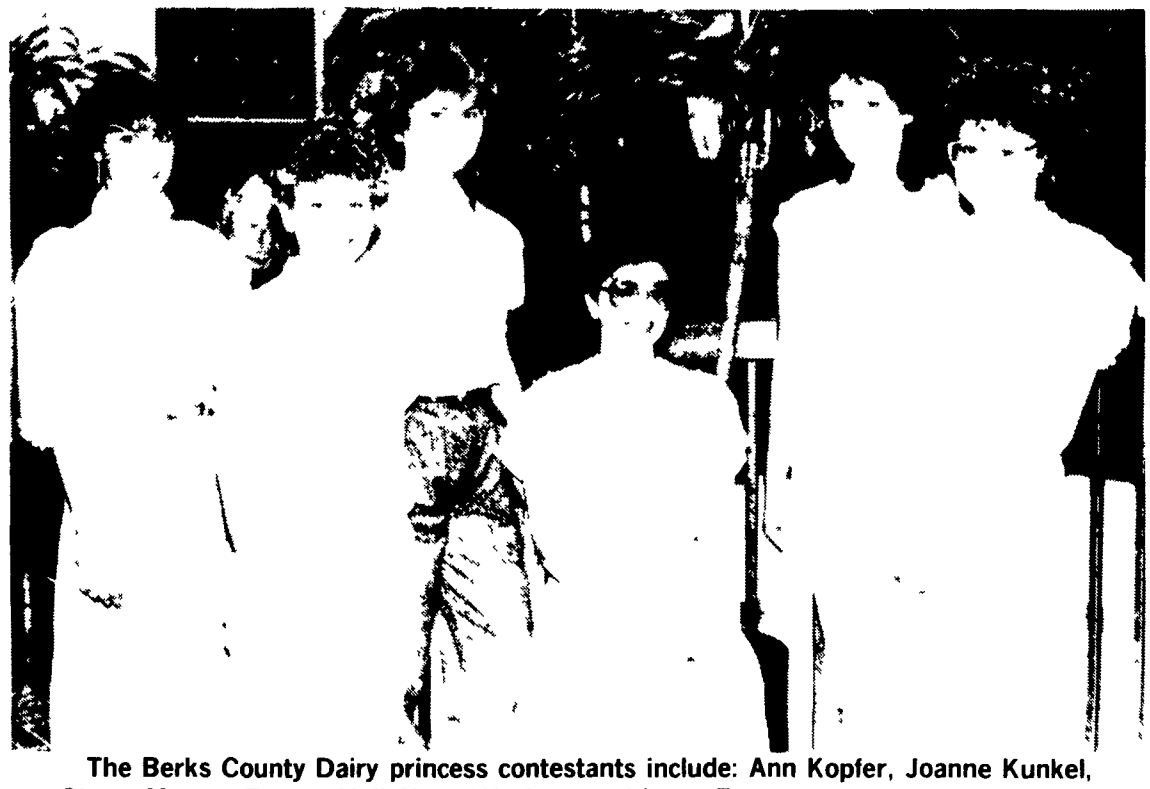
Walk with grace; sit or stand with ease; and use hands comfortably; Reese advised. She suggested the girls sit relaxed with legs crossed at the ankles and leaned to one side. Walking with a straight posture should be practiced with a book on your head, she also told the candidates. "You may be great now, but you can be better," she said. "That's what you must work on - being better," she encouraged.

Reese also discussed public speaking and had each candidate practice in front of their small group. After some awkward, shy, and hurried statements by the candidates, Reese had these suggestions: If you bring up a point, have an answer. Choose words carefully. Give all the positives about something and forget to mention the negatives. "If you don't think the dairy farmer is getting the support he needs, tell the people your ideas," she added. Reese stresses, "If you are going to make a statement, have a solution."

As she closed her part of the seminar, Reese offered a few other tips. "The most important thing about this is that you have fun and enjoy it and grow from it. Think positive and make the most of everyday and ourselves," she concluded.

The six Berks County candidates were also treated to a color and makeup session by Georgene Marmarou of Zinger Guarantee, Inc., a fashion and makeup coordinating service. Skilled at instructing business image classes in color, Georgene used one of the contestants to demonstrate her points.

"It's what you wear next to your face," she advised regarding the right colors to wear for a particular skin tone. She suggested



The Berks County Dairy princess contestants include: Ann Kopfer, Joanne Kunkel, Stacey Meyers, Tammy Moll, Naomi Herbert, and Susan Troutman.

searching for the proper colors by draping them by the face and looking in a mirror.

Coordinating makeup with the colors worn is also very important according to this fashion expert. "You will need makeup for the night of the pageant," she advised. "If not, the lights will swallow you up," she stated.

"Blending is very important," when wearing makeup according to Goergene. "Make yourselves look like you're put together the way you should," she stressed.

Six contestants will compete for the Berks County title on May 4th at the Berks County Ag Center, Leesport. Judged on their poise, appearance, and dairy knowledge, the contestants will be interviewed by the judges to test their knowledge of the dairy industry and will also perform a promotional skit about milk or dairy products the night or the pageant.

Contestants for this year include: Naomi Herbert, R3 Kutztown; Ann Kopfer, R2 Fleetwood; Joanne Kunkel R2, Kutztown; Stacey Meyers, R2 Kempton; Tammy Sue Moll, R1 Hamburg; and Susan Troutman R1 Myerstown.

Naomi Herbert is a senior at Kutztown Area High School. She is active in the FFA, Eastern Berks 4-H Dairy Club, Fleetwood Grange, and several school athletic teams. She owns 13 Holsteins and is the daughter of Elva Herbert.

Ann Kopfer, the daughter of Robert and Caroll Kopfer, is a junior at Fleetwood High School. She is president of her class, a cheerleader, student council member, and belongs to the Eastern Berks 4-H Dairy Club. Her family farms 210 acres and milks 60 Holstein and Guernsey cows.

Joanne Kunkel, daughter of Kenneth and Grace Kunkel, hails from a 500-acre farm where her family milks 46 Holsteins. A senior at Kutztown Area High School, Joanne is a member of the FFA, Pa. Holstein Association, and Mt. Zion's Lutheran Church.

Stacey Meyers is the daughter of Donald and Vernette Meyers. She is active in the FFA, National Honor Society, Eastern Berks Dairy Club, and local and national Holstein clubs. Her family farms 200 acres and milks 60 Holsteins.

Tammy Moll is a senior at Hamburg Area High School. Receiving many academic awards, Moll is listed among Who's Who Among American High School Students. She belongs to 4-H and her family farms 107 acres and milks 24 Holstein cows.

Susan Troutman is the daughter of George and Mary Troutman. A member of the Stouchsburg 4-H Dairy Club, she is active in church youth groups and the Marion Grange. Her family farms 200 acres and milks 72 Holsteins.

The six contestants will continue their practice in public speaking, poise and appearance until the night of the pageant. Also scheduled for them are seminars on nutrition and cow science the week before the competition. The winner will be crowned by the 1984 county dairy princess, Deborah Price, R1 Douglassville. The county princess will then be eligible to compete in the state pageant this fall.

DEALERS INQUIRIES INVITED

On being a farm wife - And other hazards

Joyce Bupp

Hooray for the members of the most recent space shuttle crew. I'd like to recommend that they be made honorary farmers.

Consider this: A multi-million dollar communications satellite is launched. In spite of the most up-to-date technology, engineering and computerism, the equipment refuses to operate. Astronauts rig together a make-shift swatter device, fashioned of plastic notebook covers, to attempt to flip a switch believed to be the culprit.

While it didn't do the trick, and the problem proved more complex, give 'em a hand for creativity under duress. Like farmers, they tried to make a repair with simple things at hand.

What they probably should have had was a length or two of baling twine.

Farms today, by necessity, are often worth (on paper) upwards of a million dollars--and probably mortgaged for just about that. Still, in spite of push button planting, computerized feeding and digital-read-out seeding, most-I suspect--are basically held together by one of the greatest and unrecognized resources of rural America.

Used baling twine.

It's handy, cheap, recyclable, biodegradable, versatile, and pollution free, a magical answer to everyday farm fix-it problems.

The door on the heifer pen that needs propped to facilitate air flow on a hot day? Tie it back with baling twine. Same goes for the windows at the end of the old bank barn.

A new calf in the calf barn occasionally escaped through the pen front, taking a nose dive out through the feed and water access opening, and heads off adventuring. I've seen calves do that three or four times in five minutes.

Baling twine, strung horizontally across the opening for a couple of hours until Junior settles down, makes for a safe, and secure, temporary door closure.

Fastening gates is big baling twine business. This proves especially true on gates frequently moved from here to there, or devoid of permanent hinges because no one ever got around to installing them--since the twine does the trick.

When a cow slips her metal necklace for stall tying, a length of baler twine easily suffices. Probably warmer in the winter, too, though perhaps less stylish.

Just a cut above the mundane everyday uses are the intricate works of baling twine art woven hereabouts by a certain individual. These macrame-designs are divised at those unhandy gaps between fences or gates, where a more slippery-than-usual heifer can manage to sneak out.

Spiders have been known to crawl out from the barn walls, to gaze in awe and envy at some of these majestic web-like baling twine masterpieces.

Elsewhere, the twine is tapped for such backyard uses as tying up newspapers and tomato plants, marking a row of onions, hanging baskets for the back porch, even snitched by resident barn birds for feathering their nests.

A certain offspring with hunter tendencies used to tie baling twine to cardboard boxes, prop the boxes at an angle, and put "bait" under the catching for cats, while he yanked the long twine from a hiding place in the distance. The cats, for the most part, lined up for the chance to get "caught" and snag a tasty bite of the bait of the day.

For far too long, the baling twine farm resource has gone unheeded and unappreciated. It's high time that census officials, farm financial analyses, balance sheets, and cash flow statements recognize the inherent worth of those stacks of dusty, curled up twine remnants.

In the interest of future national space security,and potential needss of our astronauts, I'm considering shipping a donation of used twine to NASA.

What worries me, though, is that IRS might then wake up to its value, and figure out how to slap some tax on it.

Search begins for Lycoming Co. Princess

MUNCY — All single young women who are between the ages of 16 and 22 and from a dairy farm background are eligible to compete for the title of 1985 Lycoming Dairy Princess.

The winner of the Dairy Princess pageant, to be held June 21, 1985 at 7:30 p.m. in the Lycoming Mall, Muncy, will be eligible to vie, at the state level, for the title of Pennsylvania Dairy Princess.

Twenty-seven state princesses and hundreds of county princesses have served as spokespersons for the dairy industry in Pennsylvania. They appear in shopping malls, fairs, supermarkets and on radio and television to educate consumers about the dairy farmers product.

Any single woman who has completed her junior year in high school, is not over 22 years of age, never married and whose parents or guardians are engaged in farming, or if the young lady is the owner of at least one dairy animal is eligible to compete for the title.

The winner of the Pennsylvania Dairy Princess Pageant receives a $500 cash award. The first and second runner-up will receive a $300 and $200 cash award respectively. The state title is honorary and there would be no interruption of school or regular employment plans. The state pageant is coordinated through the Pennsylvania Dairy Promotion Services, Inc.

Young women interested in entering the Lycoming County Dairy Princess Pageant in June should contact J. David Jarrett, R.D.1, Linden, Pa. or Mrs. Helen Barto, R.D.1, Montgomery, Pa., by May 15, 1985.

Kids will enjoy gardening projects that yield quick results

Ever see the way a kid's face lights up when he's asked to plant some sunflower seeds or pick beans? Children love to play in the soil and help plants grow. Those who learn gardening at an early age develop an understanding of nature as well as a lifelong hobby.

How about making gardening really fun for your children? Horticulturist Linda Harris, suggests: "Get their attention and hold their interest with projects that yield quick or spectacular results, such as the projects outlined here."

Watch a Seed Sprout

Equipment needed: Clean glass jar with lid, damp paper towel, several lima bean seeds.

Show children the dry seeds before starting the project. Explain that the seeds are "sleeping;" to wake up a seed, it must be moistened or planted. Then line the inside of the jar with the damp paper towel and insert the seeds between glass and towel, spacing the seeds a few inches apart. Put on lid and leave jar on the kitchen counter. Check each day to make sure the paper towel is still moist; sprinkle warm water on the towel if it looks dry. In a few days, the seeds will swell and burst open. Roots will grow down while stem and leaves grow up. The seedlings grow quickly and are large enough even for young children to see easily.

Grow Pretty Flowers

Let children grow French marigolds. Sow seeds along the edge of vegetable gardens, walkways, or even in containers. If growing in containers, let children choose unique kinds—an old tire, toy wagon that's not being used, large toy truck, sand pail, old boot, and so forth. Conatiners should be at least six inches deep for best results.

When plants flower, help children cut some of the blooms and let them arrange the flowers in a jar or can. Or make a marigold "lei" by stringing flower heads on heavy thread. The lei will stay fresh for several hours of dress-up fun.

Grow Your Own Jack-O-Lantern

There's nothing in the garden a child likes better that a pumpkin—the bigger, the better! Depending on how much garden space you have, you can grow small pumpkins, medium-size pumpkins, or great big monsters. Whatever you choose, the kids will love them!

When weather is warm, plant four to six seeds in groups, cover seeds with half inch of soil, firm lightly and keep evenly moist. (See seed packets for more specific information.) Seedlings will appear in ten to fourteen days. When seedlings are well-started, choose the sturdiest two in each group and cut the others off at ground level. Let children watch as the plants enlarge, begin to vine, and produce flower and fruit. They'll enjoy the hide-and-seek game of spotting the pumpkins as they enlarge under the foliage.

To personalize ppumpkins with your children's names: In late August or early September, when pumpkins are fully enlarged but the shells are not yet hard, mark the letters of their names (or whatever you want to write) with a pencil on the shell of the pumpkin. Then take a nail or screwdriver and scratch the lines shallowly into the pumpkin shell. The inscriptions will callous over as the fruits mature and will be easy to read by harvest time. Or, if pumpkins are not inscribed, have a family fun time before Halloween by helping each child paint or carve a pumpkin he grew himself.

Other fun projects children can try include planting a wigwam of pole beans, growing sprouts for a sandwich, starting tomato seeds indoors, growing radishes indoors in styrofoam cups, or planting and charting the progress of their own giant sunflower.

Planning Vacation Travels

It's that time of year when the sunshine brings out the urge to travel and get around. For some, the sunshine draws us to the sandy sea shore while others head for the cool mountains.

My recent vacation included traveling across several states visiting college friends and family. Always the adventurer, my husband chose the longer but more beautiful "scenic route." Personally, I'd rather just get there the quickest way possible. However, I must admit it was refreshing to take time to observe the countryside from roads other than the turnpike.

Vacation plans for some families may mean planning around young children. Unfortunately, many people still share the notion that young families must give up real vacations until the children are grown. Of course some vacations are not at all suited to young children (like our scenic route across two states), but there are lots of vacations that can be fun and enjoyable for the whole family.

Planning is the key word to a successful vacation. First consider where you are going. Will the sights be of interest to young children? Preschoolers will not enjoy museums. School-age children may enjoy them as much as adults, but they tire much faster than adults. With very small children, it is best to keep some familiarity in the surroundings. A new bed, different water, and strange food all the same time is quite a bit for any youngster to handle.

Decide how you are going to get to your destination. Long days of driving cross-country are hard on the patience of some adults and it may be worse for children. Planned stops at parks and playgrounds make the drive much easier. Some airlines will make special provisions for babies and preschoolers if you notify them before take-off time. It is also a good idea to choose an uncrowded flight for children. That means more space for them to move around and often more attention from the flight attendants.

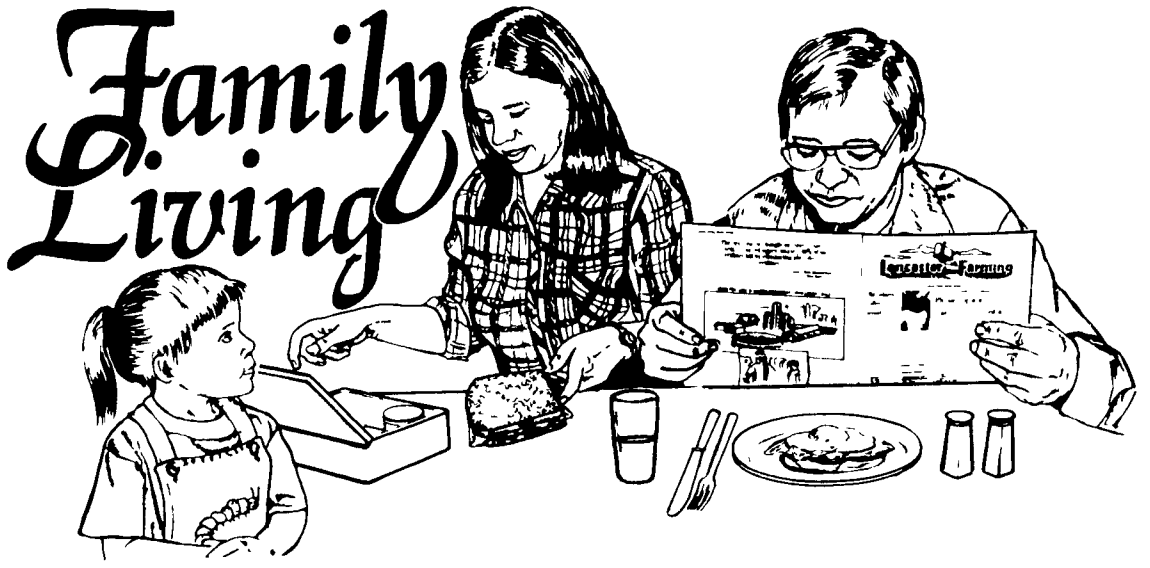
Before you leave, have a medical check-up for everyone. It's no fun being sick on a vacation. If you take prescription medicines with you, be sure to have a copy of the prescription itself in case the medication has to be replaced. You may want to take along an anti-nauseant for those who have trouble with motion sickness.

When planning your vacation, keep in mind a given: Children are naturally active. Therefore, you can expect them to be uncomfortable if you ask them to sit still for long periods of time. Allow younger children to take along a favorite toy or pack a variety of small surprise packages to be opened at intervals during the trip. However, make sure these surprise toys are compatible with the travel situation. Finger puppets, picture cards, washable foam blocks, or an art pad with washable crayons are good choices. With preschoolers, it is best to talk about the trip casually several weeks before you go to get him used to the idea. Young children are often concerned about things that adults take for granted He may ask such things as, "Where will I sleep?, How will we know where we are?, Who will make supper for us?," or "Will there be other children there?" You should answer these questions to the best of your knowledge without making up answers Although he probably cannot comprehend a time span in days or weeks, you may need to assure him that you will return home soon.

As we got older, our favorite family vacations were camping trips. We were included in making the selection of the state park to camp at as well as choosing the camp site.

We also vacationed with another farm family who were our good friends. As kids, we loved getting together to make plans about what we would do there and who was bringing what games and of course our biggest concern was snacks and food! Including your children in planning and preparations for the trip will give them ownership of the vacation and may make it more enjoyable for everyone.

P.S. Don't forget the camera to preserve these enjoyable memories to share in later years. We still get together and spend an evening laughing over our camping pictures! Happy Vacationing!



Extra protein can become "fat"

SOUTHHAMPTON – You want to build more muscle, you've decided, and you've heard the way to do this is consume more protein in the form of red meat, protein powders, and supplements.

Don't be fooled into thinking that extra protein, in any form, will lead to a bigger and stronger you, says Dairy Council Inc., Southhampton. The fact is: you're probably getting enough protein in your daily diet. The average American woman consumes about 40 percent more protein and the average man about 100 percent more protein than the Recommended Daily Allowance (RDA) calls for. Unfortunately, food companies and network advertising have made Americans as afraid of eating too little protein as they are of consuming too many calories.

Proteins are the most abundant substance in body cells, besides water, and they have many functions. They account for the tough, fibrous nature of hair, nails, and ligaments, and for the structure of muscles. The body requires protein for building and maintaining body tissue, as well as all hereditary characteristics in body cells.

Do people ever need extra protein intake? Weight lifters may use slightly more protein than usual to build new muscle–although a balanced diet based on the four food groups will provide sufficient amounts.

Higher intakes are usually required for pregnant and breast-feeding women, for victims of physical stress (surgery, infection, fever, burns), and for people who burn protein for energy because they don't consume enough calories, and thereby create a protein deficiency.

People who eat less than the RDA (56 grams for men and 44 grams for women, daily) are not necessarily deficient because the RDA requirements have been set above most people's needs. These inflated figures cover the average person's needs as well as those with exceptionally high needs. If your daily diet is based on recommended daily servings from the food groups (milk–two for adults, four for teens, and three for children; meat–two; fruits and vegetables–four; grains–four) you should have no trouble meeting requirements.

The body cannot store protein and this is why it is needed daily. But if more protein is consumed than is required, the extra amount is converted to fat. Thus, one can become "fat" from eating excess calories in the form of protein as much as from too many calories from carbohydrates and fat. In fact, eating excess protein is economically wasteful because food that provides primarily carbohydrates and fat are cheaper sources of calories.

Excess protein also inhibits the body's ability to absorb calcium which could lead to osteoporosis. According to some sources, preliminary findings show a link between excess protein and cancer.

Sources of high-quality protein include meat, pountry, fish, and dairy products. Low-quality proteins are found in legumes (peas and beans), vegetables, and grains.

Even if you are athletically-inclined and engage in strenuous activity, says Dairy Council, your best diet comes from a variety of foods–not just those top-heavy in protein.

Cumberland Valley Future Farmers celebrate with annual banquet

BY MONTIE TAK
Staff Correspondent

MECHANICSBURG — It was time for celebration and congratulation.

On April 18, Future Farmers met with parents, teachers, friends and well-wishers at Cumberland Valley High School in Mechanicsburg for the FFA 31st Annual Parent and Member Banquet.

Tim Armstrong won top honors at 1985 Chapter Star Agribusinessman. A senior, Tim stands in the top one-eighth of his class with an 89.9 percent average. He has also sereved as co-secretary of the chapter, along with Jenny Shoop.

Chapter Star Farmer awards went to president Ray Yost and vice president Sandy Hopple. Ray also won a foundation award for dairy production and Sandy won foundation awards in sheep production and nursery operations.

FFA reporter Kim Kopple and historian Jeff Nolt took the 1985 Star Greenhand Awards. Kim also received a foundation award for diversified livestock production and outdoor recreation, while Jeff won a foundation award for swine production.

Chapter sentinel Dave Shultz won foundation recognition for beef production and feed grain production. Kurt Hall also scored a double victory with fruit and/or vegetable production and forest management.

Foundation awards for agriculture mechanics went to Lynn Nestor; agriculture electrification to Steve Weaver; placement in agriculture production to Brian Barger and horse proficiency to Cindy Frey.

Seven honorary members were installed and awarded the Chapter Farmer Degree.

These were Randy Yost and Sam Coover, former Cumberland Valley students and both holders of the coveted American Farmer Degree; Richard Harbold, Wolf's Bus Lines driver; Robert Norman Rudolph, industrial arts teacher; Joyce Simmons, head cook at middle school west; and Montie Tak, Lancaster Farming correspondent. Dr. Robert Weber, veterinarian, was unable to be present.

Newly installed honorary members holding Chapter Farmer Degrees from left are Robert Rudolph; Samuel Coover; Randall Yost, Joyce Simmons, Richard Harbold and Montie Tak.

Special award winners at Cumberland Valley FFA banquet from left are Tim Armstrong, Chapter Star Agribusinessman; Sandy Hopple, Chapter Star Farmer; Kim Hopple, Star Greenhand; Jeff Nolt, Star Greenhand; and Ray Yost, Chapter Star Farmer.

Tale of a city gal named honorary Chapter Farmer

BY MONTIE TAK
Staff Correspondent

CARLISLE — Few things I have won have meant as much.

When I read the letter informing me the local FFA chapter had chosen me to receive the degree of chapter farmer, I thought there had been a mistake. A phone call to vo-ag teacher Robert Leib told me there was no mistake.

I thought, for a kid from New York City, I did pretty well. Not too many farmers – even honorary ones – grew up within a stone's throw of Times Square. My father's work as a journalist-broadcaster ruled out a home in the country.

But that didn't stop me. I wanted a horse in the worst way, as only a city child can want one. And I didn't realize it at the time, but I had an ally in my mother

When I was 12, Mom and I spent several days on a 300-acre farm owned by Elwood and Florence Reynolds, near Friendsville, Pa. Mom had learned of the Reynolds through the Pennsylvania farm vacation directory. It was an experience that changed my life.

Mr. and Mrs. Reynolds became second parents to me as I spent the next four summers on their farm. I learned what it was like to rise before dawn, go out into the fields and bring in the dairy herd. I even learned and how to milk by hand on a patient Holstein named Rosie.

After breakfast I would take the cows to their daytime pasture by herding them on one of the farm's several riding horses. My favorite was a beautiful chestnut named Lady and it was she who taught me to have compassion and love for God's creatures. Lady heard all my secrets.

There were always plenty of chores around the farmhouse and I learned to run a wringer

Extension 4-H Agents elect officers

Officers of the Pennsylvania Association of Extension 4-H Agents for 1985-86, elected at the organization's recent annual meeting are from left: Debbie Gregory, Bucks County, Secretary; Renee Mims, Dauphin County, treasurer; Rick Kauffman, Berks County, president-elect; Kate Humbert, Montour County, vice president; and Brenda Skiba, Erie County, president.

Have you tried to hem a napkin?

By BETTY W. KINSER
Copley News Service

Napkins are so easy to make. You cut a square, hem the sides and there you have it.

However, that hemming can give you a migraine! The sewing machine likes to gobble up the corners no matter how carefully you try to pivot.

Well, here is an answer to your prayers–a way to hem napkins without feeding the corners to your machine.

Press under ½ inch on each side. Working with one side at a time, begin at the middle of the side and stitch close to the pressed edge all the way to the corner and off the fabric (this locks your threads without backtacking). Begin again at the middle and stitch in the same way to the opposite corner.

Trim the hem allowance close to the stitching. Fold hem again (it will be LESS THAN ¼-inch wide); stitch from middle to each corner.

Now, work with each of the remaining sides in the same manner. No more gobbled-up corners.

When selecting fabric for napkins, choose one that has quite a bit of cotton in it. Cotton is more absorbent than man-made fibers. Before laundering your napkins, always treat stains with a pre-wash spray.

Do napkins have to be made from regular fabric? Not at all. Choose napkins to suit the mood of your meal.

Bandanna Handerchief: Fantastic napkins for chili suppers, cookouts or casual buffets.

Terry Towels: Small hand towels of lightweight terry are great soaker-uppers for spaghetti suppers or other mess-makers. Especially useful when you must balance your plate on your lap.

Men's Hankies: Good linen handkerchiefs make soft, elegant napkins for more formal affairs.

For The Car: Travel much? Eat in the car? You need BIG napkins. Keep in the car cotton kitchen towels folded and stored in a large zip-type, plastic bag. When snack time comes, just whip out the towels and cover each lap. Less mess (I can't guarantee no mess!)

Questions may be addressed to Mrs. Betty Kinser, 1307 Indian Lane, Independence, MO 64056.

FFA

(Continued from Page B15)

washer under Mrs Reynolds' tutelage. I never knew what sheets dried in the sun smelled like until then.

When I think of Florence Reynolds, I think of peaches. Peaches. Oceans of them in a three-day canning marathon every season. We canned everything that couldn't get away until the secret of dark of the earthen cellar was lined with the jewel-like jars. And if you weren't canning, you were planting, weeding or picking. I remember shelling peas on the front porch in the deepening dusk of an August night Sometimes Mrs Reynolds would excuse herself to play an old gospel favorite in the piano in the parlor

Housework was only the start There was a lot to learn from Mr. Reynolds, too A Quaker, he was the first person I knew who could work hard and have fun at the same time He taught me about horses, cows, chickens and hay baling. A lot about hay baling. I fell off the wagon once, but never again.

It was my chore to feed the beef cattle, too My favorite was a massive Hereford, Cutie Girl, who loved having her neck rubbed. I would rub, she would lean blissfully. Mother, on a visit to the farm, was terrified.

There was always so much to see and do but there was a lot of fun, too. Like riding the horses down to the general store for an after-supper Coke. I remember long trail rides, blueberry picking and homemade ice cream. I remember reading farm magazines and thinking how much I would like to farm.

And I seem to recall a frantic flurry of activity early Sunday mornings when we girls tried to find suitable hats to wear to the little white church down the road. Somehow I always felt more comfortable finding God in the open fields or in a star-studded crystalline night sky And there were miracles, too Like the morning I went to bring in Lady, only to find a new born foal at her side

I lived through the city winters by counting the days until summer My summers on the farm ended when I went away to junior college. A few years later, the Reynolds sold out and retired to the south My life would never be the same

These memories are especially sharp right now. Just days before I received the chapter farmer degree, I learned Mrs. Reynolds had died. Part of my youth went with her and I can only say, thank you Mrs Reynolds, wherever you are

Two Lebanon 4-Hers visit Harrisburg

LEBANON — Lebanon County 4-H members Damian Shiner and Sharon Wagner recently joined a group of Pennsylvania 4-H members who visited their state representatives in Harrisburg.

The two were guests at a breakfast at the Capitol and toured government offices and agencies as part of their stay.

Shiner is a sophomore at ELCO, and is president of the Myerstown Raiders 4-H Club and news reporter of the Lebanon County 4-H Teen Council.

Wagner is a sophomore at Cedar Crest and is president of the Norsolebco 4-H Club and a member of the county 4-H Teen Council.

THE MICRO WAY

LANI BLOOMER

Your microwave is a perfect companion for a diet. Use it to reduce the calories in your favorite recipes, by reducing fats and steaming foods as suggested last week. Then with the time you save preparing meals, take a 10 minute walk, and use up some more calories. You'll be in swimsuit-shape in no time!

If only one person in your home is dieting, the four-ounce frozen haddock portions are a quick and simple low-calorie protein food. These unbreaded squares of fish have about 110 calories per portion when steamed with no added ingredients.

However, since the fish pieces are square, the corners tend to overcook before the center is cooked or defrosted. To avoid overcooking the corners, let the center finish thawing or cooking during standing time:

— To defrost one haddock portion, wrap it in waxed paper and heat on low (30,3, defrost) for 3 minutes, turning fish over halfway through. (The edges and corners will be thawed, but the center still slightly frozen.) Set aside to stand for 5 minutes for the center to finish thawing.

— To steam one haddock portion, place the completely thawed haddock on a small plate. Sprinkle with 1 teaspoon lemon juice and herbs or spices such as parsley or pepper if desired. Cover with the waxed paper that was around the fish for defrosting. Cook on high for 2½ to 3 minutes, until the center is almost cooked. Let stand for two to three minutes for the center to finish cooking. If you cook it on high until the center is completely done, the corners will be overcooked (dried out and hard).

Are you getting tired of the diet foods you've been eating? Try some of the different low calorie recipes below. Serve the Barley Casserole, Spinach Meatloaf, some carrot and celery sticks and Light Fruit Mousse as a meal. You will have a satisfying and filling dinner complete with dessert, with less than 400 calories per serving!

Whole grains, like brown rice or barley are filling and take a long time to digest, so you do not feel hungry as fast. This barley casserole reheats and freezes well, so make it ahead of time, or in a large quantity and freeze in single servings.

Tomato Barley Casserole

½ cup pearl barley (such as Quaker quick cooking)
1 can (16-ounces) peeled tomatoes
¾ cup water
1 small onion chopped
¼ teaspoon each dried oregano and garlic salt
1/8 teaspoon pepper

Put all ingredients in a 2-quart casserole, stir to blend and cover. Cook on high for 15 minutes, stirring once halfway through, until hot and boiling.

Reduce power to low (30,3) and simmer for 15 minutes more until the barley has absorbed most of the liquid. Set aside to stand for 5-10 minutes.

Makes 4 servings, 114 calories each.

Tips:

— To double the quantity, increase the cooking time about 5 minutes in both Steps 1 and 2.

— If you need the microwave to cook other food before the barley stands, remove the barley from the oven after Step 1. Let it stand for 10 minutes, then cook on high for 5 minutes. Repeat as needed until the liquids are absorbed and barley is tender. This technique works for rice and other dry grains or beans as well.

Spinach Meatloaf

1 10-ounce package frozen, chopped spinach
1½ pounds LEAN ground beef
1 medium onion, finely chopped
1 beaten egg
1 teaspoon worchestershire sauce
½ teaspoon lemon pepper (OR use ¼ teaspoon pepper)
¼ teaspoon salt
1 tablespoon dried bread crumbs
¼ cup grated mozzarella cheese

Cook spinach (right in the carton) for 5-6 minutes, turning the box over after 3 minutes. Drain well.

Thoroughly mix all ingredients except meat and cheese in a bowl. Gently stir meat into spinach mixture until combined. Pack meatloaf into a 6-cup ring mold (or use a 2-quart casserole with a custard cup in the center).

Cover with waxed paper and insert a temperature probe through the waxed paper into the middle of one side of the ring. Cook at 160 degrees on high using the temperature probe. If your oven has no probe, cook on high for 12 minutes, covered with waxed paper.

Srpinkle cheese over top and cover with a lid or foil. Set aside to stand for 10 minutes. If the cheese is not melted at the end of the standing time, heat on high for a minute or two. Makes 6 servings with 180 calories each.

Here is a deliciously light and creamy dessert with only 50 calories per serving! Try it, you'll like it even if you're not a yogurt fan!

Light Fruit Mousse

1 8-ounce can crushed pineapple
2/3 cup water, (or less)
1 box sugar free Jello, lime or orange flavor
8 standard size ice cubes (about 1¾ cups)
1 cup plain yogurt (8 ounce container)

Drain pineapple juice into a 2-cup measure. Add water to equal 2/3 cup. Cook on high for 2-3 minutes until boiling.

Put Jello then boiling juice and water into a blender container and blend for about 30 seconds until the gelatin has dissolved.

Add ice cubes and blend about 1 minute until almost smooth. Then add yogurt, blending again until smooth and creamy. Add crushed pineapple and stir or blend just to mix.

Pour into 6 parfait or serving dishes and chill 1 hour or more before serving. Makes six, 5-ounce servings with 50 caories per serving. Top with one teaspoon whipped topping if desired, for 64 calories per serving.

Tip: This can be made with any flavor Jello and without any fruit. Use 2/3 cup water. You will have five servings with 27 calories each. One cup of any other chopped fruit could be added in place of the pineapple.

Note: The cooking times above are for microwaves with 600-700 Watts of power. For 500-600 W, add 10 seconds per minute; for 400-500 W, add 20 seconds per minute.

Farm Women Societies

Lancaster Society 2

Twenty-two members and two guests attended a recent meeting of Lancaster Society 2 at the home of Esther Lehman of Penryn.

The monthly program was an old-fashioned spelling bee with Sherry Cassel winning first prize and Edna Loose winning second. The group presented a gift to Jay Witman and Byrl Nickels and to the brother of member Ruth Waltz.

At its next meeting, the group will entertain Society 31 at the Farm and Home Center in Lancaster. Speaker will be Judy Miller, current Lancaster County Dairy Princess.

Members will sew at the Osteopathic Hospital on Monday, April 29. June will be a vacation month, and the July meeting will feature a quiz on local by-laws.

Lancaster Society 3

Lancaster Society 3 entertained Society 33 of the East Petersburg area at its monthly meeting April 20 at Zion's United Church of Christ.

Mrs. Lauren Welker of Mechanicsburg told the group how she molds, paints and makes clothes for her porcelain dolls, which are sold throughout the country.

During the business meeting, the group gave a $25 donation to Jody Hinkle, a Lancaster County student enrolled in the International Farm Youth Exchange.

The society will also give a scholarship to a graduating student from Cocalico, Warwick or Ephrata who will is planning further study in home economics or agriculture.

County first vice president Mary Shellenberger and treasurer Betty Geib also attended the meeting.

Irene Eberly will be the hostess for the next meeting, which will be held May 18 at the Emanuel Lutheran Church, Brickerville.

READ LANCASTER FARMING FOR COMPLETE AND UP-TO-DATE MARKET REPORTS

Lancaster Society 10

Lancaster Society 10 met recently at the home of Winifred Bergen.

A letter of resignation from reporter Ida Kunkle was read and accepted with regret. Kathryn Hebbe was named the new reporter.

Dr. James Fleming presented a tape on Peter and his times.

The next meeting will be held May 4 at the home of Mary Habecker. Marion Long will review the book, "Growing up in the 30s," by Russell Baker.

Lancaster Society 34

Lancaster Society 34 met April 15 at the home of Nellene Myer. A Bible reading and prayer were offered by Melody Krantz, co-hostess.

County Extension Agent Jay Irwin gave a talk on farm safety.

It was reported that the sub sale was a success. The county project this year will be the Farm and Home Center.

Four new members — Joyce Samuelson, Joan Wimer, Debbie Kreider and Ann Shoemaker — were accepted into membership. Debbie Mellinger has been named the new corresponding secretary.

The society will entertain Society 28 at its next meeting, May 20 at the United Methodist Church, Quarryville.

Berks Society 9

Berks Society 9 met recently at the home of Mrs. Patricia Haas, Douglassville RD 2. Carl K. Wiest Jr. from the Bank of Pennsylvania talked about the importance of making a will.

Members will hold a ham-on-roll sale May 4.

The next meeting will be held May 1 at the home of Mrs. Jeanne Frey, Gilbertsville, and will feature a presentation by a Hospice Volunteer from the Pottstown Cancer Society.

Lebanon Society 14

Lebanon Society 14 entertained Society 13 and 19 at is spring meeting at the United Church of Christ in Cambelltown.

Dr. John Walmer spoke on the topic of stress.

The next meeting will be held May 21 at the home of Carol Ungemach.

Franklin County 4-H elects officers

CHAMBERSBURG — David Keener has been elected president, and Christiana Keener vice president of the Franklin County 4-H.

Other officers include Kelly Boyd, secretary; Kelby Mowery, social chairman; and Heather Fusting, news reporter.

Recent programs include instruction on nutritional requirements of market lambs and the different breeds of sheep.

F.W.S. Calendar

Saturday, April 27

Lancaster Society 5 meets at Judy Weidman's home.

Lancaster Society 4 meets at the Farm and Home Center at 12:30 p.m. for a covered dish luncheon. Society 34 and county officers will be their guests.

Monday, April 29

Lancaster Society 2 sews at Osteopathic Hospital

Thursday, May 2

Lancaster Society 20 entertains mothers at the Divine Carousel Restaurant and at the Strasburg Rail Road

Lancaster Society 17 holds a mother-daughter banquet at 6:30 p.m. at Shady Maple.

Friday, May 3

Lancaster Society 1 meets at the Brunnerville Fire Hall at 6:15 p.m.

Saturday, May 4

Lancaster Society 15 meets at 10 a.m. for brunch at the Willow Valley Restaurant.

Lancaster Society 6 meets at the Elizabethtown Church of God for lunch and music by the Robert Kettering family

Lancaster Society 10 meets at 2301 Spring Valley Road

Ladies Have You Heard?

By Doris Thomas

Lancaster Extension Home Economist

Effective Use Of Hot Water

Using water—especially hot water, wisely helps the environment by conserving precious water and energy. It also saves money. You should consider habits that can be adapted to use energy effective and also achieve good results. They start with the water heater, the second largest user of energy in your home. Heating and cooling systems are first.

When purchasing a water heater, estimate needs and select the size accordingly. Hot water requirements may have changed; future requirements should also be considered. An oversized unit heats unneeded water while an undersized unit won't deliver a sufficient amount when needed.

Models are available that have a high level of insulation in the shell. They are more expensive than water heaters with less insulation but substantial savings in energy and costs will be realized over the life of the unit.

The water heater should be located as close to the points of hot water usage as possible. The longer the distance, the more heat is lost. Insulating hot water supply pipes can reduce heat loss. This is particularly advisable when long lengths of pipe are unavoidable.

An insulation jacket can be installed around existing water heaters to reduce heat loss through the walls of the tank. Kits are available and manufacturere's instructions should be followed carefully. Particular care should be taken not to cover any doors, vents or relief valves. Utility companies can also provide information on proper installation.

Where possible, the installation of a large-capacity uninsulated tempering tank in the supply line to the water heater should be a consideration. The temperature of incoming water can be raised in the tank before it enters the water heater, thus reducing the amount of energy needed to heat the water in the water heater.

Proper care of a water heater is also important to extend its life and improve its effectiveness. Several times a year, drain a bucket or two of water from the faucet located near the bottom of the heater tank. This removes any sediment and deposits. Any build-up makes the heating unit work harder, thus using more energy and shortening life of the water heater.

Where Does Your Money Go?

One of the very first things to do if you find yourself in financial difficulty of any sort, is to figure out where your money goes. If you don't know where it goes, you won't know how to manage with less.

Most families are fairly clear about their fixed expenses such as mortgage, rent, utilities, and car payments, but many are completely in the dark about where the rest of their money goes. Most of us eat, pay for transportation, buy clothes, enjoy a little entertainment, and even pay our monthly bills, but do we know enough about these spending patterns to be able to budget and plan?

If not, it's time to get busy! Get your family together and make up a chart of monthly income and spending so you have a summary of where the money comes from and where it goes.

Estimate your income by month, from all certain sources, and for all members of your family. Include net or take home salaries and wages, interest and dividends from savings and investments, social security benefits, unemployment compensation, the value of your food stamps, and any other monetary benefits you receive. If certain benefits are expected to run out in two of three months, be sure that is clear on your monthly income chart.

Now make a list of all monthly expenses for all family members. To keep the picture clear, group these expenses by category. Include: savings (both short and long term), allowances for everyone, clothing (new purchases and upkeep such as dry cleaning), contributions, food at home and away, gifts for birthdays and other occasions, housing (mortgage, rent, taxes, insurances, maintenance, repairs, utilities, and fuel), life insurance, health (insurance, doctor, dentist, and drugs), personal improvement (newspapers, magazines, books, tuition, lessons), recreation, transportation (license fees, car payments, insurance, gasoline, maintenance, and public transportation fare costs).

Once you have your monthly income and your monthly expenses clearly mapped out, look for discrepancies. If your expenses are more than your income, it's time to make some hard decisions. As a family, consider these cost reducing activities to help you get by on less.

- Spend less for some items. Buy store or generic brands, rather than advertised brand names; buy used items, including cars, appliances, clothing, and sporting goods.
- Make use of family skills instead of paying for services.
- Pack your lunch instead of buying it.
- Take advantage of free community services and entertainment.
- Barter with neighbors and friends.

Cumberland Chapter wins NJ FFA Contest

DOYLESTOWN — The Cumberland FFA Chapter of Seabrook, N.J., placed first in the New Jersey FFA Livestock Contest held recently at Delaware Valley College. Thirty students from throughout New Jersey judged seven classes of livestock and presented three classes of oral reasons to make up their total scores for the contest.

Teams consisted of up to four members with the three highest scores contributing to the official team score. Nine teams participated in the contest.

Newton FFA Chapter, Newton, placed second; Northern Burlington FFA Chapter, Columbus, third; Warren Hills FFA Chapter, Washington fourth; and North Warren FFA Chapter, Blairstown, placed fifth in the state contest.

The top five individuals in New Jersey were Dave Dilks, Cumberland FFA; Kirsten Sass, North Warren FFA; Dan Berg, Allentown FFA; April DeGeorge, Newton FFA; and Jeff Franzyshen and Russ Kenny tied for fifth from the Northern Burlington FFA Chapter.

The Cumberland FFA Livestock Team is now eligible to compete at the regional and national levels of competition. The regional competition is in September at Eastern States Exposition, Springfield, Massachusetts. The team will travel to Kansas City, Mo. in November to compete in the national contests which take place during the National FFA Convention.

Interscholastic judging competitions enable vocational agriculture/FFA members to excel in and practice skills learned in the classroom.

Plan your vacation now

MEDIA — For many families this is the time of the year to plan the family vacation. Have you ever wondered what makes your vacation successful? For one thing careful planning and for another, the family itself.

Here are some tips to help make your holidays happy whether the budget's large or limited:

- Decide exactly what your vacation needs and preferences are, then try to tailor your plans to fit.
- What interests your family? Swimming, camping, golf, visiting historic sites? Do they like to dress for dinner or to be completely casual? The answers help in selecting resorts, hotels, or campgrounds.
- Think of the children. For younger travelers, look into special provisions — rates, play areas with supervision, swimming pools and particular attractions for them.
- Be realistic, especially about money. Economics play a big part in the selection of a vacation spot. Better a less ambitious schedule than a budget stretched out of shape and vacation full of stress.
- Consider traveling off season. Inquire about trips to areas of the country you'd like to visit at a time that isn't the height of their vacation season. There are attractive off-season pkg rates everywhere.
- Tipping can cause anxiety. Allow for it in advance, along with other expenses. Then relax.
- Check your attitude. Go expecting to have a good time and leave worries and doubts at home. Smile; you'll most likely receive a smile in return.

CREAMERY — At this time of year, some of your houseplants may be getting too large or spindly. If the growth is not too weak, you may want to consider propagating new plants from the cuttings of larger speciments, says County Agent Paul Reber. You will not only have more plants, but the new offspring will probably be stronger and of better quality than the parent.

Cuttings are an ideal means of propagating house plants, since the new plants will be exactly like their parents. Cuttings made from the stems will propagate reliably and quickly. Since there are no seeds involved with this method, it is called asexual propagation.

Before taking any cuttings from the plants, assemble all the materials needed for the operation. A rooting medium consisting of equal parts by volume of peat moss, coarse sand and perlite would be a good first choice for most plants. Fill small containers or flower pots with the rooting mixture and soak with water before setting the cuttings. Allow all excess water to drain from the medium through holes in the container.

Plastic bags, large enough to hold the rooting containers after the cuttings are set, will be needed. Bread bags or plastic freezer bags are just about the right size in most cases.

Water is often used as a rooting medium for some types of house plants. Cuttings set in water have to be managed closely to prevent the growth of algae in the water. A dark or opaque container keeps light out of the water and slows algae growth. Change the water on a regular basis until rooting is complete.

Stem cuttings can be classified as either "tip" or "cane". Tip cuttings are taken from the end of the stem, while cane cuttings are made from small sections of the stems below the tip.

Tip cuttings work well for Christmas cactus, coleus, geranium, schefflera, wax begonia and philodendron. To make a tip cutting, cut the stem 3 to 4 inches from the top of the plant. Always use a sharp knife or shears to prevent tissue damage. There should be several leaves on the cutting. The more leaves, the faster it will root and the larger the root system will be.

Strip any leaves from the base of the cutting so at least one leaf node (point of leaf attachment) is under the rooting medium. If the stem is long, make a clean cut just below node to make certain it is well into the rooting medium. This is important since most roots will form at the node. A weak formulation of root-promoting chemical may be applied to the base of the cutting if desired. Then, insert the cuttings into the rooting medium.

Place the container into the plastic bag and seal the top. It may be a good idea to label each bag with the date. Set the bag in a well-lighted, warm spot out of direct sunlight. Too much light will overheat the cuttings and injure them.

Cane cuttings are effective for propogating dieffenbachia, dracaena and chinese evergreen, or most plants that produce long leafless stems. Cane cuttings can be prepared from the remaining stem after a tip cutting has been removed or the plant is air layered.

Cut the leafless stalk into small two or three inch sections. Vary the length to assure that each section of stalk has two sets of leaf scars or nodes to allow for root development. The dormant bud at the node will produce the new stem on the rooted cutting.

Place the cane cuttings on their sides slightly below the surface of the moist rooting medium with one of the dormant buds facing upward. Place the cuttings in the plastic cover, seal and handle them as described for tip cuttings.

Don't allow the rooting medium to dry out. Check it periodically and add small amounts of water as needed. If it is too wet, as suggested by excess condensation on the plastic, the cuttings may rot before they root. Rooting should be completed in 4 to 5 weeks, and then can be potted and grown as new plants.

Beef Cook-off planned for National Angus Show

TULSA, Okla. — Chefs, young and old alike, gather up your cooking utensils, aprons, hats and beef recipes and bring them to the Big Beef Round-Up Cookoff, July 9 at the Tulsa State Fairgrounds Beef Arena in Tulsa, Okla. This cooking event, co-sponsored by the American Angus Auxiliary and the National Junior Angus Association, is being held in conjunction with the 17th National Junior Angus Show this July 9-12.

The Big Beef Round-Up Cookoff will consist of a division for adults and a division for junior games. Anyone 21 years of age and older may compete in the adult competition and may enter individually or in teams of two. In the team competition, contestants must be between 10 and 21-years-old and be a member of a state junior Angus association. Each state may enter one team consisting of two to four members.

The contestants will be judged on their recipes as well as on showmanship. Judges for the cookoff will consist of a panel of people with varied backgrounds. The winners in the recipe and showmanship categories will receive recognition at a luncheon following the judging. The junior entries will be judged at 11 a.m. and judging of the adults will follow at 11:45 a.m.

In this year's contest, any cut of beef may be used and grills will be furnished for the contestants or they may bring their own.

Entries, including a typed recipe and name of contestant(s), must be submitted by June 5 to Mrs. Ardyce O'Neill, Route 1, Box 272, Logan, Iowa 51546, phone 712/644-2062. Questions about the cookoff should be directed to her by mail or by calling.

Seeing Eye offers new tour program

NORRISTOWN, N.J. — Who was the first Seeing Eye dog user in the United States? When was The Seeing eye founded? What kinds of dogs make good guides? How many students graduate from The Seeing Eye every year? How are Seeing Eye dogs trained? What's the magic? How does it all work? A visit to The Seeing Eye campus on Washington Valley Road can provide the answers.

The Seeing Eye is now holding guided tours every Thursday morning at 10:30 a.m. Tours are scheduled by appointment through the office of public information. Each tour is one-and-a-half hours long.

Beginning with the story of the founding of the school, each tour also includes a film about the training of Seeing Eye dogs and instruction of blind students who flock here from all over the United States and Canada.

Long and short-haired German shepherds, high-stepping golden retrievers, and black, yellow and chocolate Labradors, all in various stages of training, provide a noisy welcome in the training kennel where tour guides and staff describe how the dogs are fed and cared for and explain Seeing Eye dog training techniques. Training equipment, health care procedures, and the 4-H puppy raising program are also explained.

The grand finale of each tour is a dog training demonstration presented by one of The Seeing Eye instructors frequently seen working with Seeing Eye dogs and blind students along the sidewalks of Morristown.

Tours are conducted by a volunteer tour committee chaired by Seeing Eye Trustee, Mrs. Fred M. Kirby II of Madison.

CORRECT THE CAUSE OF PESTILENCE and PROBLEMS - THEN SYMPTOMS WILL VANISH

Toxins in the soil instead of soil bacteria, microbes etc., and lack of minerals and trace elements - that is the cause of bugs, disease and blight. Our customers are proving it. Some have healthy commercial fields of cantaloupes and other crops which other growers need to spray. Our mineral fertilizer produced 300 bu. corn per acre, and tripled the soybean yield in N.J. There is no excuse not to go organic with our improved soil program. We get the yields plus bug resistance plus much more nutritious crops so that the livestock are healthier and need less feed per pound of milk, meat and eggs.

We have an excellent new product "Willard Water" for cutting herbicide in half and improving crops by using on soil and seed. Almost unbelievable testimonies. Also liquid fish for soil or foliage. Alfalfa and orchard customers had very good results from foliage feeding. Fish supply the missing elements to produce the maximum crop.

National Ag Society honors PSU faculty, students

UNIVERSITY PARK – Gamma Sigma Delta, the national honor society of agriculture, initiated members and recognized outstanding alumni, faculty and students at the Pennsylvania State University during its recent annual banquet.

Penn State alumni Essex E. Finney Jr., Harold W. Hawk, and William L. Hileman were initiated into the society in recognition of their contributions to agriculture.

Essex E. Finney Jr., associate director of the USDA Beltsville Agricultural Research Center, received his master's of science degree in agricultural engineering from Penn State. He recently received the 1985 Outstanding Engineering Alumni Award from the college of engineering. Finney has conducted research on drying cereal grains and methods for measuring the quality of food in agricultural products. He has also served as a senior policy analyst on the staff of the science adviser to the president.

Harold W. Hawk is chief of the reproduction laboratory at the USDA research center in Beltsville. His primary research emphasis has been in the areas of sperm transport and ovum fertilization in sheep and cattle. He is a frequent advisor to the Agricultural Research Service in the U.S. and abroad. Hawk received his bachelor of science degree in dairy science from Penn State.

William L. Hileman, a Penn State graduate in agricultural economics, manages the Kistaco Farm, a 200-acre family farm and market operation specializing in fruits and vegetables. He is chairman of the Armstrong County Conservation Committee, past president of the Armstrong County Extension Executive Committee and a member of a number of other community and agricultural associations.

Three faculty in Penn State's College of Agriculture were honored for their contributions to research, teaching and extension.

Lawrence D. Muller, professor of dairy science, was recognized for his research in dairy cattle nutrition and mangement which has led to the adoption of new production practices. He is secretary of the production division of the American Dairy Science Association and a member of the subcommittee revising the "Nutrient Requirements of Dairy Cattle" published by the National Research Council.

Roger Pennock, Jr., associate professor of soil genesis and morphology, was recognized for his outstanding teaching and advising. His participation in the Penn State soil judging team has resulted in consistent top performance Pennock was named Outstanding Faculty Recipient in teaching and advising from the Golden Key National Honor Society in 1981 and received the Penn State Amoco Outstanding Teacher Award in 1984.

Lester A. Burdette, professor of animal science extension, was honored for his contributions to the Penn State Cooperative Extension Service. He has been coordinator of the animal science extension programs for the past four years and has served on numerous state and national committees concerned with the livestock industry. He is director of the Executive Council for the Pennsylvania Livestock Association and has served in various executive positions with the Extension Professors Association

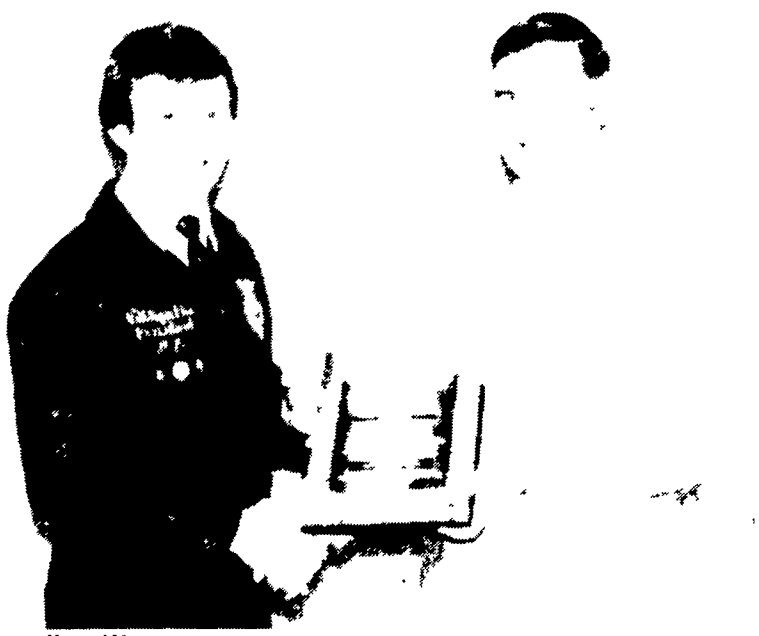
In addition, Theodore R. Alter, associate professor of agricultural economics extension; Harry Carey, associate professor of extension information and exhibits specialist for agricultural communications; Kathleen B. Evensen, assistant professor of postharvest physiology; Paul Heller, associate professor of entomology extension, Albert R. Jarrett, associate professor of agricultural engineering; Wayne A. Schutjer, head of the department and professor of agricultural economics; and John M. Skelly Sr., head of the department and professor of plant pathology were also honored and initiated into Gamma Sigma Delta.

Three awards recognizing scholastic achievement were presented to undergraduates. The senior award, an engraved watch, went to Thomas N. Ritchey, son of Mr. and Mrs. Paul R. Ritchey Jr. of Roaring Springs. He will graduate in agricultural education this spring. The junior award, a leather portfolio, went to John F. Amrhein, son of Mr. and Mrs. Edwin G. Amrhein of Bethel Park. He is a forest science major. The sophomore award, a pen and pencil set, went to Rita McMillan, daughter of Mr. and Mrs. Amos Clay of Philadelphia She is majoring in agricultural science

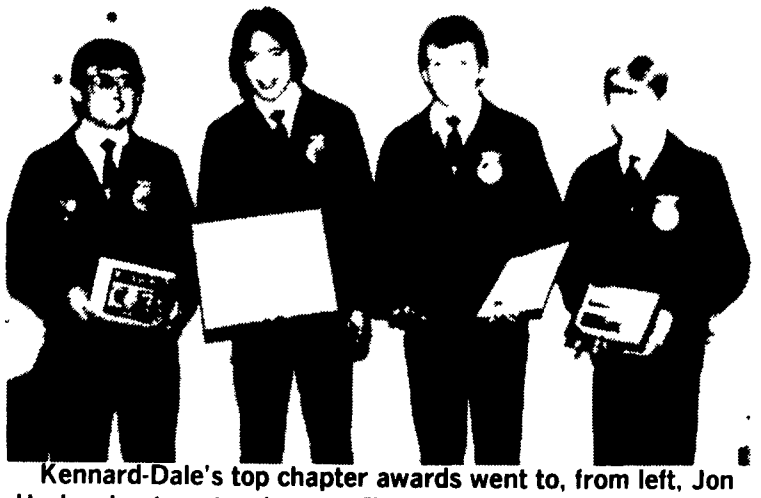
Each year, the national honorary agricultural fraternity initiates a number of graduate and undergraduate students in recognition of their academic record and promise of future leadership in agricultural research, teaching and extension. This year 36 graduate students and 36 undergraduates representing nearly all 12 departments in the college of agriculture, were initiated into the society.

Elected officers for 1985-1986 are. president, Donald V. Waddington in agronomy; vice-president, Jack C. Schannon in horticulture; secretary-treasurer, James H. Mortenson in agricultural and extension education, and historian, Todd Bowersox in forestry.

Kennard-Dale FFA honors former member



Jim Warner, right, receives the Kennard- Dale FFA Chapter's Distinguished Service Award from chapter president Bill Boothe, left.



Kennard-Dale's top chapter awards went to, from left, Jon Hash, chapter star farmer; Tom Parks, Production Credit Award; Bill Boothe, star agribusiness and DeKalb award winner; and Paul Stewart, star greenhand.

FAWN GROVE – A former chapter member was honored by the Kennard-Dale FFA chapter as their 1985 Distinguished Service Award winner. The award was made during the chapter's annual banquet, April 16, at the Kennard-Dale High School.

Jim Warner is a chapter alumnus, American Farmer degree holder, and New Park R1 dairy farmer. He and his wife, Norma, have remained active supporters of the chapter's activities, and have served as chaperones and adult leaders for numerous FFA trips, exhibits and related events.

Four members received recognition for outstanding accomplishments within the Kennard-Dale local chapter.

Paul Stewart is the star greenhand, the top award presented to a first-year FFA member. Star farmer of the local FFA is Jon Hash, a recipient earlier this year of the Keystone farmer degree

Chapter president Bill Boothe copped two top honors, and was named both the chapter's star agribusinessman and recipient of the Dekalb award. A $50 records-keeping presentation from the York Production Credit Association went to chapter sentinel Tom Parks.

Special speaker for the annual dinner and awards meeting was Jamie Frey, state secretary of the FFA. Entertainment was provided by the Slate Ridge Blue Grass band.

The Dairy Business

By Newton Bair

50 YEARS OF SOIL CONSERVATION

This might be a good time to go back and read John Steinbeck's "Grapes of Wrath." If you don't remember what it was about, it dramatizes the plight of the farmers who were the direct victims of a prolonged drought in the Midwest which created the infamous Dust Bowl back in the early '30s. They were labeled as "Oakies," because many of them were from Oklahoma, the center of the devastation.

That devastation was the result of gross mismanagement and total disregard for conserving the soil. As a result, most of the topsoil from Oklahoma and Kansas was blown eastward in great clouds of dust that ended up polluting our skies and disappearing into the Atlantic forever.

We can all be thankful that among the things Franklin Roosevelt did was to sign a law creating the Soil Conservation Service. That law designated the SCS as the technical arm of the United States Department of Agriculture. Its primary duty was and is to protect the soil against the ravages of wind and water erosion. Stated more plainly, the Soil Conservation Service is dedicated to protecting our soil against the stupidity of man himself.

That farsighted legislation, passed exactly 50 years ago today, on April 27, 1935, was inspired by necessity. Drastic steps were needed to begin repairing the damage to the soil. Only when men begin to starve, as they did then, do we wake up to the terrible consequences of our greed and stupidity.

And speaking of history, Pennsylvania passed its own Soil Conservation Law in 1937. Then in 1945, at the insistence of Secretary of Agriculture Miles Horst (who, by the way, was a prominent citizen and farmer from Lebanon County), the Legislature passed its own Conservation Law. That law authorized the formation of county-wide conservation districts. Every county except Philadelphia now has an active Conservation District, governed by a board of directors made up of four farmers, two urbanities and a county commissioner.

Over 60,000 Pennsylvania landowners are cooperating in the conservation program. They own or operate 10,800,000 acres, and have devloped plans to conserve soil on more than 8,000,000 acres of Pennsylvania's farmland.

No one can deny the great value of SCS in saving precious soil. They have done a great job. Agriculture has done a great job in Pennsylvania, and that is good news. Try to envision the possible disasters without the work of the Soil Conservation Districts in Pennsylvania!

But the job is never done, and there is a long way to go. Conservative estimates show that there are still over 100,000,000 tons of topsoil blown and washed from Pennsylvania farms each year! That's not just dirt we are talking about, it is the very stuff that supports all the life on your farm and mine.

It is expensive lime, phosphorus, potash, organic matter, and a host of other irreplaceable nutrients put there by God and Agway and Production Credit.

Yes, you and I did lots of hard work, too, to try to replace that expensive plant food. We are only kidding ourselves if we think that we can keep on letting it blow away, or slush down the Swatara or the Yellow Breeches or Pine Creek, to smother the oysters in the Chesapeake Bay. The cost is astronomical, in soil, plant nutrients, and irreparable ecological damage.

And we can be thankful that we have the means to prevent most of it. All we have to do is support the valiant efforts of out local Soil Conservation Districts, and use the talents of the professional conservationists.

A look at what has happened in Africa and South America, where no efforts have ever been made to conserve good soil, will convince even the worst detractors. Fortunately, we will have to come face to face with starvation before we wake up. But it could happen here, if we don't start NOW to save what we have left.

COMPAK
Stake Body

Increased hauling capacity for your down-sized pickup.

Your energy-saving, small pickup, teamed with the versatile Omaha Standard Compak stake body, is a smart combination Available with wood or steel floors in platform lengths of 7' or 7'6" and widths of 72" or 78"

Corner and rear identification lights are built into the platform All steel stake racks feature a two-section rear, spring-loaded rack connectors, and automatic spring-loaded rack hold downs

Underbody steel tool boxes with lockable paddle latch, rear step bumper and steel bulkhead with full-width mesh window are sensible options

Compak platforms and stake bodies are ideal for delivery services, contractors, electricians, nurseries and other trades

ALL WORK BOOTS ARE NOT CREATED EQUAL

Don't cheat your working feet out of the comfort and support they deserve

The last thing you need is sore, uncomfortable feet on the job. Because of that, Red Wing has developed work boots that no one can match for comfort, durability and support. For over 80 years, Red Wing has been fitting feet comfortably. So, try on a pair of Red Wings and give your feet the comfort and support they deserve!

Oliver 1650 diesel, wide front, power steering, dual hydraulics 814-793-4293

Oliver 1850 diesel, dual hydraulics, wide front, 814-793-4293.

Planning on dribbling nitrogen on corn but don't want to drag a trailing sprayer through it? I have for sale a 3 pt. hitch, heavily constructed, 45' spray boom on 15" centers. It has 1 inch feeder lines with 3/4 inch teeth for large capacity. (Will handle as much as 100 gal. per acre). It also has hydraulic booms and hydraulic side hill hitch to keep nitrogen off the corn on steep slopes. New, was $2,500. Asking $1,100. Snyder Co. 717-837-0724.

Potato eq., 8 ton bulk body, 25' elevator, potato grader. Lanc Co 717-354-8230.

For Sale: Bale Thrower Wagons, Steel or Wood. Will fit sides onto your flatbed. Also, Available Flatbed Wagons.

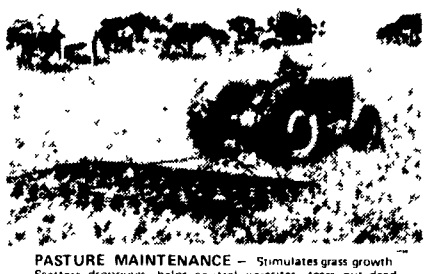
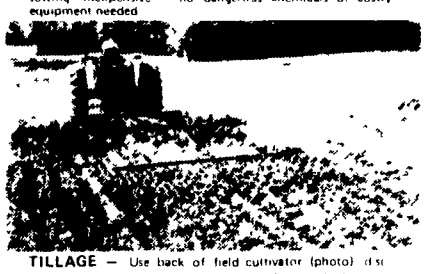
SAVE $$$ WITH AN INEXPENSIVE TILLAGE TOOL

A Good Idea That Works



PASTURE MAINTENANCE – Stimulates grass growth Scatters droppings helps control parasites tears out dead growth aerates for better moisture penetration works in fertilizer Flexes to cover every inch of the ground
PASTURE RENOVATION at Low Cost – (Fertilize and lime is required) Scarify to prepare shallow seedbed without destroying existing turf Use to cover seed after sowing Inexpensive no dangerous chemicals or costly equipment needed



TILLAGE – Use back of field cultivator (photo) disc spring tooth plow or alone prepares a fine seedbed breaks up crust on hard packed soil Use for first cultivation in corn beans etc Covers small grain back of broadcaster

FUERST F-L-E-X-I-B-L-E TINE HARROW®

ADJUSTABLE PENETRATION FOR GREATER VERSATILITY -- HERCULES ILLUSTRATED

MAXIMUM PENETRATION – Tines down pointed slightly back
LIGHT PENETRATION – Tines down pointed further back
SMOOTHING FLOATING – Tines up pull in either direction
TWO JOBS IN ONE PASS – Front section maximum penetration rear section – light penetration or floating HERCULES Models only

HERCULES — *Faster and Safer at any Speed!*

Unique tine design and exclusive spreader bars allow much greater speeds save labor time and money Others recommend operation at 3 to 4 mph (at higher speeds they skip jump and skim the surface loosing effectiveness) See chart for added acreage covered by Hercules

Acres covered per hour at various speeds

Width Ins. ow	3 m.p.h	3½ m.p.h	4 m.p.h	*5 m.p.h	6 m.p.h	*7 m.p.h	*8 m.p.h
8 ft	2.4	2.8	3.2	4	4.8	5.6	6.4
10 ft	3	3.5	4	5	6	7	8
12 ft	3.6	4.2	4.8	6	7.2	8.4	9.6
16 ft	4.8	5	6.4	8	9.6	11.2	12.8
20 ft	6	7	8	10	12	14	16
24 ft	7.2	8.4	9.6	12	14.4	16.8	19.2

*Only the Fuerst Hercules design allows effective coverage and operation at these higher speeds

Easy to use, handle, store

Specially designed 7/16 (10.5 mm) steel tines – virtually indestructible No parts to grease oil tighten Design and construction assures maximum penetration while flexing to cover every inch of the ground

All models sectionalized for ease of handling Sections roll up for compact storage transport All FUERST Harrows easily assemble disassemble without tools If ever needed parts readily available

Connecting front and rear sections of Hercules Harrow

Easy way to transport Hercules Model 12

- 8 Foot, Must Order $485.00
- 10 Foot, In Stock $632.00
- Used 12 Foot. $389.00

OR GO WITH THE FOLDING

THE FUERST F-L-E-X-I-B-L-E TINE HARROW/CART

Fuerst Hercules 30 Harrow carried on a Harrow Cart incorporating Treflan Amiben Lexone near Keota IA in one pass behind a 28 IH 496 disk

Improves Your Herbicide Performance!

- Eliminates a pass over your fields
- Requires little additional power
- Levels and prepares ideal seedbed

All for a minimum investment Harrow/Cart moves quickly from field to field 16 to 30 foot widths

You don't need expensive implements to incorporate herbicides!
Work done by several chemical companies and universities demonstrates how effective the Fuerst Flexible Tine Harrow is behind cultivators or disks In essence farmers are getting two incorporations in one pass with the bonus of outstanding leveling and an excellent seedbed

One Pass Incorporation Strategy
The Fuerst Harrow carried on a Fuerst Harrow Cart retains its flexibility when in use assuring same depth incorporation throughout Behind your cultivator or disk you can expect to get good results of incorporating and leveling even on trashy fields Eleven rows of unique 3½ inch long spreading action™ tines are linked together in a blanket like manner With no rigid frame the harrow is able to snake snugly over the contours of the ground The special tines are the key to the success of the Fuerst Hercules Harrow for incorporating and leveling achieving optimum results at 6 to 8 mph

- The Harrow Cart is rugged and follows tight turns behind a disk or cultivator wiping out wheel tracks as it goes
- The folding wings make transportation of the harrow from field to field a simple manner without restricting the harrows effectiveness in the field Can be transported directly behind disk or cultivator

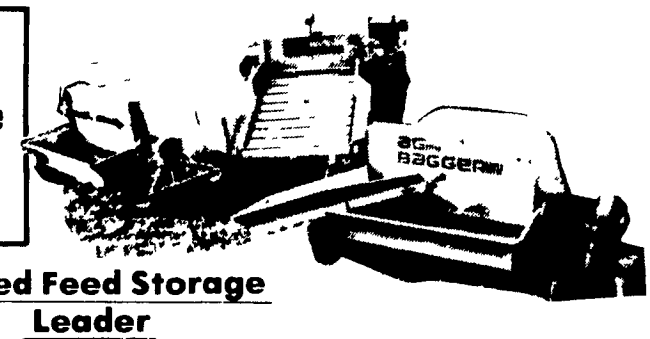
AG-BAG System Compare & SAVE



Sealed Feed Storage Leader

Better Forage At Lower Cost

Ag-Bag System gives not only lower investment and interest cost, but gives the quality forage you would expect with an oxygen limiting silo By using the Ag-Bag on a custom work basis no major capitol cost was required and the interest which was foreseen with other systems was eliminated We would recommend the Ag-Bag System for anyone with storage shortage at a very low cost per ton of feed

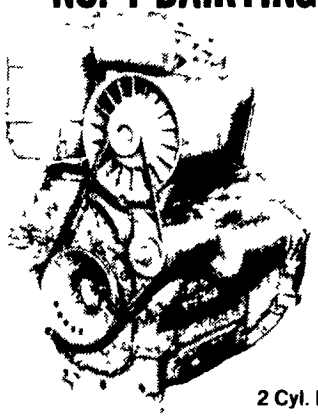
D & R EQUIPMENT INC.

Ringoes, New Jersey (201) 782-5082

NO. 1 DAIRYING DIESEL



AT 1968 PRICES

Since 1968 F2L-912 diesels have earned the reputation as the most reliable diesel. Don't settle for less.

2 Cyl. F2L-912

EASIER STARTING: Heavy flywheel provides easy starting. No electric heater plugs.

QUIETER: Runs quieter than most water cooled diesels. Very quiet exhaust.

F2L-912 SPECS: 20 Hp @ 1500 RPM
25 Hp @ 1800 RPM
32 Hp @ 2300 RPM

It has direct injection, lube oil cooling, and oil cooled pistons. This engine has proven to survive the extreme heat of a heavy load in a small engine house better than any other engine.

VanDale P.T.O. Manure Pump Rental

Looking for lower operating costs and less downtime? You'll want our name and numbers.

20% better fuel economy
Deutz AirDiesels are more fuel efficient by design Advanced combustion technology direct fuel injection and fast warm-up allow Deutz engines to do more work with less fuel

40% less downtime.
AirDiesels have no liquid-cooling system That means 40% better reliability No water pump failure no leaky radiator no liquid in the engine oil Ever

150,000 AirDiesels at work.
We've got a complete selection of engines from 8 to 500 hp Powering welders compressors pumps gensets and more Whatever the application whatever the environment there's a Deutz AirDiesel to do the job for you They are premium quality engines that deliver low life cycle cost

Call us today for more information Put our numbers to work on your bottom line

We've got the numbers.

KHD DEUTZ

We have been distributing Deutz Diesels since 1955.

★ **WE NOW ALSO SERVE WESTERN PA. AREA**
We Seek New Dealers and OEM Customers.

With Each Deutz Engine We Also Deliver:

★ **EXPERIENCE** - Accumulated the hard way, our customers problems are our problems.
Our experienced personnel design each sale for customer satisfaction and trouble-free service.

★ **RELIABLE SERVICE** by conscientious technicians.

★ **SERVICE DEALER NETWORK.**

★ **HIGH VOLUME** - lowest Deutz prices.

No other independent engine house in the region can match our expertise.

Shouldn't you be our customer or dealer?
It would be good for both of us!

Stauffer Diesel Inc.

Power Steering Kits For 2000, 3000, 4000, 5000 Ford Tractors Complete $700.

We also have a large inventory of tractors at our other location at 4530 Olde Scotland Rd., ¼ mile off Exit 8 on 696 North.

¼ Mile East of Exit 6 I-81 on U.S. 30
Hours: 8:30-5:00 Mon.-Fri.
8:30 - 12:00 Saturdays

TORQUE AMPLIFIERS, ETC.

Serving Customers in 20 States Coast to Coast.

Complete TA assemblies for 706-1586 are priced at $595 and come with a Dana Co Heavy Duty Sprag instead of the usual IH sprag **The Dana sprag is guaranteed for 2 years against failure.** Sprag kits (includes sprag gear, Dana sprag, and piston carrier) and all items for rebuilding your own TA are available to qualified persons. Ramps and carriers for the older style TA's (as in SMTA, 340, 560) are priced at $150 each and carry a 90 day guarantee. We have all the parts needed to rebuild your TA in stock at prices that will save you money We also have a shop available for complete TA installation Or, you may split your own tractor and bring the center housing to us, which we can rebuild while you wait (approx 4-6 hrs) We also stock New and Rebuilt Water Pumps, Dynlife Clutches, Pressure Plates, and PTO Drive Gears, (Spline-fit into pressure plates) for most IH tractors and combines

— QUALITY USED PARTS —

We buy and sell used parts and parts tractors We have a good selection of quality used parts at competitive prices Please have part no when calling, if possible

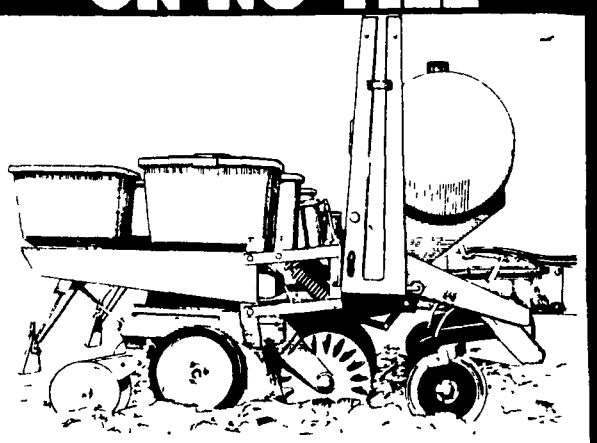
FOR LOW-TILL OR NO-TILL



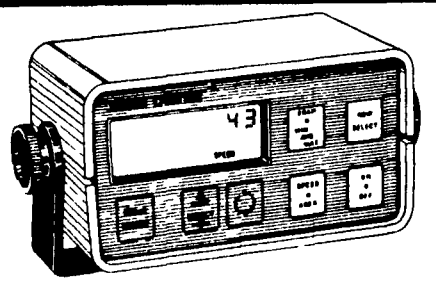
Save fuel, time, moisture and soil with a Max-Emerge® conservation planter

Here's a rugged planter you can rely on in most soil conditions, including stubble and many sod fields

Heavy-duty springs help transfer weight from the 7-inch frame to each planting unit to keep unit-mounted coulters in the ground Frame-mounted coulters and cast-iron firming wheels are available, too, for extra-tough conditions

Whether you no-till low-till or conventionally till your ground these 4-row (30 to 40-inch rows) and 6- and 8-row narrow models can help you save fuel, time moisture and soil See us soon for details

Computer-Trak™ Monitor



Calculator-type display gives you up-to-the-second planting data

Numbers in the monitor window display minimum, average and maximum seed population, quick as a wink

You can check speed and acres planted, too And wiring harnesses custom-fit your Max-Emerge® planter

NEW 4 and 6 row planters in stock for immediate sale.

Good Fit. Great Cutting Action. Right Price.
JOHN DEERE HAY TOOL PARTS

During hay season, you can't afford to lose time replacing worn parts. Check your machines now. Then see your Parts Pro for replacement parts. You'll like our new low prices. Stock up on bearings, belts, pickup teeth, knives and sections — razor sharp and evenly ground. We have all the parts you may need. Stop in soon. For precise fit and like-new cutting action at a good price, count on John Deere hay tool parts.

THE FASTEST MOWER CONDITIONERS IN THE WORLD.

When conditions get tough, the new Vicon KM mower/conditioners get the hay in the windrow 30% faster than any conventional system. Available in working widths of 7'10", 9'5" and 10'6", the new KM mower conditioners combine a disc cutterbar with a square-cornering drive system to dramatically improve your mowing and conditioning. See the new KM mower/conditioners.

2900 Gal. Tank w/Easy Loader

NOW (Patent Pending)

You can haul liquid Manure all day without getting off the Tractor Seat using the SLURRY BUGGY Easy Loader

1.) Back up to pit or lagoon. Lower easy loader (boom) from tractor (by hydraulic)
2.) Engage PTO Switch pump to vacuum
3.) Float level indicator shows when tank is full
4.) Stop PTO Raise boom and head for the field
5.) In field. Switch pump to pressure. Start PTO. Open Valve and unload

A liquid manure spreader that loads and unloads and has no chains, bearings, fans, augers, or moving parts that touch manure.
For more information call or write.

KUHN

FASTER AND MORE EFFICIENT HARVESTS MEAN INCREASED NUTRITIONAL VALUE

GMD 55 6 Ft. 7 In. Disk Mower

The GMD 55 has 5 discs and allows a very fast working rate with its 2 m (6'7") cutting width This 2 m size is ideally suited for todays tractor widths allowing the tractor wheels to run each side of the swath The cutterbar is raised through a hydraulic system

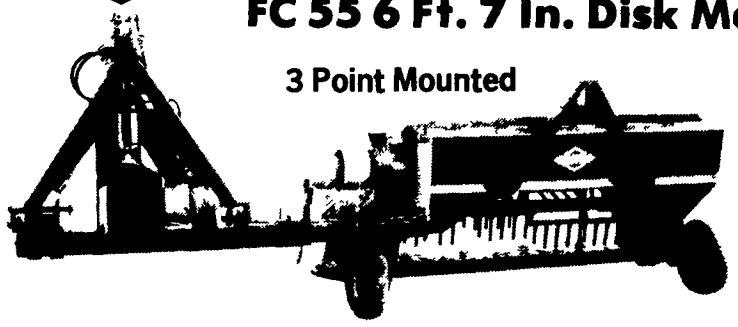
GMD 66 7 Ft. 10 In. Disk Mower

With its 6 discs and 2 4 m (7'10") cutting width the GMC 66 is the largest model in the Multidisc Mower range The dividing plate makes a clean break between cut and uncut crop while the swathboard brings the grass into a narrow fluffy swath when so desired

KUHN

FC 44 5 Ft. 3 In. Disk Mower Conditioner
FC 55 6 Ft. 7 In. Disk Mower Conditioner

3 Point Mounted

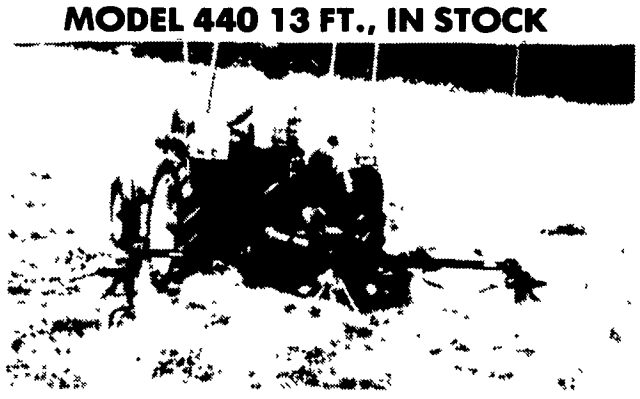


Can be used in 4 different ways:
- **Mower - Fluffer (swath plates and comb completely open)**
- **Mower - Fluffer - Windrower (comb open, swath plates closed)**
- **Mower - Conditioner (comb positioned as necessary and swath plates open)**
- **Mower - Conditioner - Windrower (comb positioned as necessary and swath plates closed)**

DO YOU WANT FIRST CLASS HAY IN DOUBLE QUICK TIME?

Do It With Kuhn Gyrotedders!

MODEL 440 13 FT., IN STOCK



Gyrotedder GF 440:
Tedder with 4 rotors, trailed or 3-point mounted - Adjustable frame for working along hedgerows... Working width: 13' - Also available with an articulating 3-point frame for automatic towing.

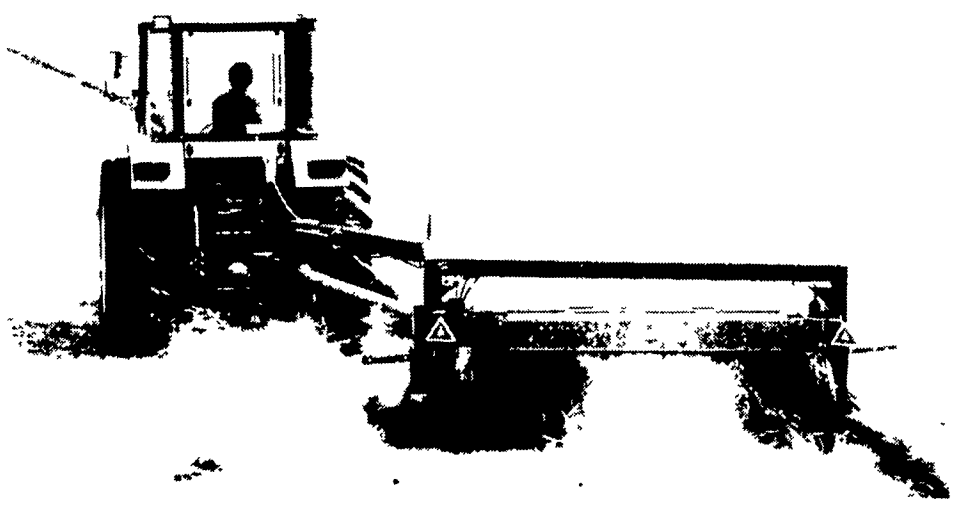
MODEL 452... A Tedder That Works

17 FT., IN STOCK

Gryotedder GF 452:
Tines on gear-driven rotors mesh to crimp hay gently lift, fluff and spread hay for faster curing. Trouble-free operation. No belts or chains. Optional gearbox provides slower rotor speed to produce two light windrows. 17 ft. width. Folds to 6 ft. for transport, 3 pt. or trailing models.

DISK MOWER CONDITIONERS

FC 250 8 Ft. **FC 300 10 Ft.**



With the Kuhn Mower Conditioner system, the whole length of the stem is conditioned. The natural wax coating is opened, loosened and fragmented, giving a maximum surface area for moisture evaporation. The stems will dry at the same rate as the leaves, giving faster, more even drying and ensuring that leaf and nutrients are retained.

Top Performance At Less Cost Than Other Competition Disk Mower Conditioners

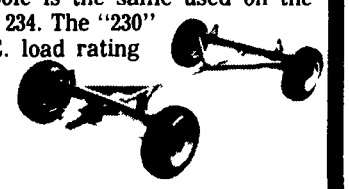
(1) N.H. 230 FARM WAGON
6 Ton w/Long Fixed Tongue, 15x8" Rims
$875 Tires Extra

The Model 230 farm wagon, handles medium-duty hauling chores. The heavy-duty reach pole is the same used on the bigger Model 234. The "230" has an A.S.E. load rating of 6 tons.



(3) N.H. 234 FARM WAGONS
8 Ton w/Long Adj. Tongue, 15x8" Rims
$1,050 Tires Extra

The heavy-duty Model 234, is a good companion for the Model 8 Crop-Carrier. The front axle assembly is reinforced to withstand stress imposed by heavy loads and big tractors. It has an A.S.A.E. load rating of 8 tons.

CHOICE #2
Waiver of Finance Till September 1, 1985

CHOICE #3
Low A.P.R. Financing

In Lieu Of April Cash Dividends (Choice #1) Listed With These Prices, Take Advantage Of Choice #2 Or Choice #3

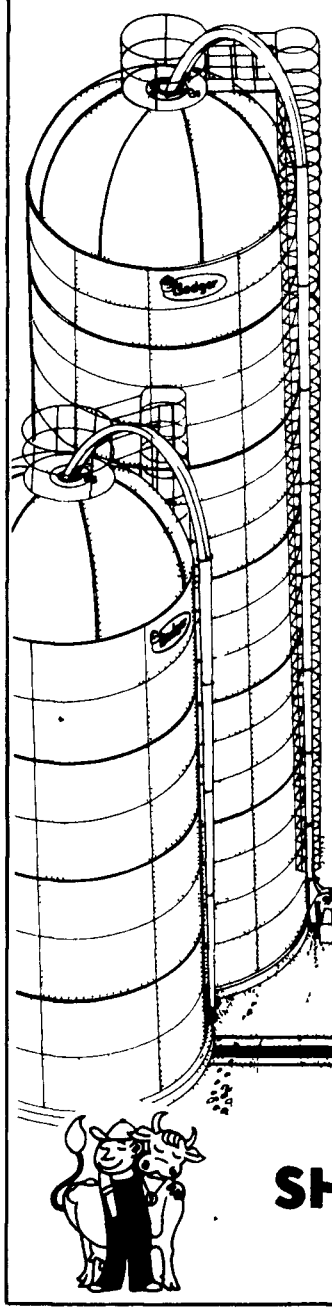
3 SILOS AND UNLOADERS

Badger Structures A Quality Alternative

Badger Northland "beats the blues" with the introduction of three better investments that will save you time, money, feed, fuel and fertilizer.

For over 35 years, Badger Northland has set the standards by producing farm equipment systems that livestock farmers need to run their operations efficiently and profitably And they're setting the standards again with forage, grain and manure storage systems built with the same quality that has made all Badger Equipment so popular with farmers everywhere

Forage or grain, there's a Badger structure to fit your needs.



Now, more than ever, production costs must be controlled, and storing haylage in a new Badger structure is the best way. Now you can harvest haylage in its "prime", blow it into a Badger structure and trap all the nutrients you've worked so hard to produce

And while you're saving, skip the dryer next year with a Badger High Moisture Grain Storage System. You'll harvest earlier and reduce field losses due to poor conditions

Say goodbye to daily hauling with an energy efficient Badger manure storage structure.

Manure is a valuable resource, too valuable to waste That's why a new Badger Manure Storage Structure makes sense now! You'll be surprised at the payback you'll get in fertilizer cost savings, fuel and time not to mention doing away with the hassle of daily hauling

Badger Manure Storage Structures are built to last. They meet or exceed U S Soil Conservation Service Standards that call for a minimum 20 year life span

See your Badger Dealer now for all of your feed, forage and manure handling needs. He's your local parts and service expert too!

Setting the Standards

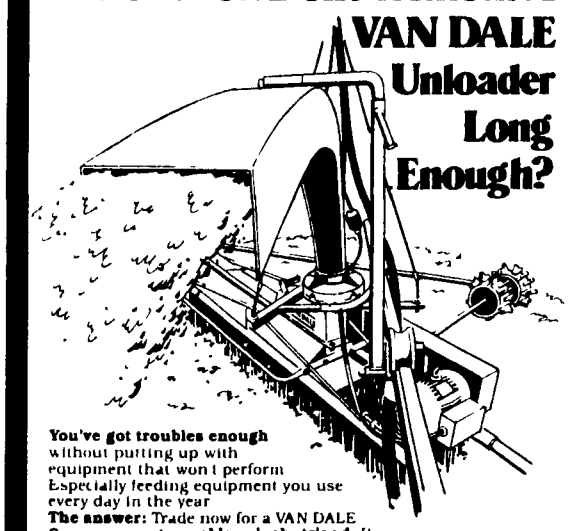
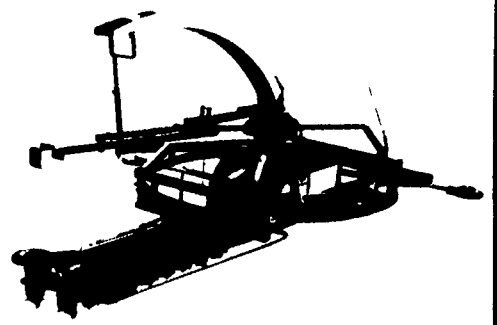
Haven't You Done Without A VAN DALE Unloader Long Enough?



You've got troubles enough without putting up with equipment that won't perform. Especially feeding equipment you use every day in the year.
The answer: Trade now for a VAN DALE
Save your motor, cable, winch, tripod. Renew the heart of your system by trading now for a new VAN DALE unloader. The unloader that keeps going year round, helps keep your animals fed on schedule, helps keep you from climbing silo in below zero weather.

VAN DALE

CALL US ABOUT THE "NEW" VAN DALE RING DRIVE
We Offer A Big Savings
For The Month Of April



What Unloader Will You Use. . . In The Year 2000?

Buy The Only Unloader w/A 3 Yr. Warranty

If you purchase the Supreme SS428 Turbo Ring Drive Unloader now it's a good bet this same unloader will be performing in the year 2000!

Supreme Posi-Tracs are proven good for 20+ years The Stainless Turbo must last longer with lower maintenance

And the Supreme SS248 Turbo Ring Drive Unloader is unmatched for performance. Hardened chopping augers rip thru hard-packed & frozen material to rapidly deliver volumes of forage. The 4-paddle 28" Stainless Steel Blower has tremendous output capacity

(ATTENTION DAIRYMAN)

In today's economy stress, you must feed your cows properly.

Put in trough dividers, with fold up flaps to make easy sweeping. It prevents late lactating cows of over-eating & gives the high producers more time to eat their feed which results in more dry matter intake and more milk.

Being able to know exactley what each cow eats will be a benefit to you and the cow.

We also build self locking head gates and cattle guards, gutter grates.

SOME THINGS ARE CHANGING BUT HOOBER'S OLD-FASHIONED SERVICE IS STILL THE SAME

Are you winning the profit struggle?

Master Mix can help make sure you do.

Get Master Mix... and more to boot!
Ask your participating Master Mix Dealer how you can earn both a free pair of high quality Wolverine® boots and free Potency Formulated starter feed.

NOTICE

For Contracts Written Now Through May 31, 1985 Master Mix And Its Dealers Are Offering

8% INTEREST On Swine Feeder Finance For Those Who Qualify

Master Mix is anxious to show you how improved feed conversion and increased average daily gain can help you produce more pork per ton of feed and get lower fixed costs per pound of pork marketed

We can help you generate more profit with your hog operation with our new line of high performance Potency Formulated feeds developed by Master Mix Research Potency Formulated feeds are available for all phases of pork production and supply the highest levels of useable amino acids and energy to give you top performance and profits in your operation

See your Master Mix Dealer today for more information about Potency Formulated feeds and learn how you can win the profit struggle.

Master Mix® CENTRAL SOYA

Boot Offer Ends April 30th

Get Master Mix...and More to Boot!

From February 1 through April 30, 1985, your participating Master Mix dealer has an offer you won't want to miss. You can earn both free Potency Formulated started feeds and a free pair of high quality Woverine® work boots.

Here's how...
For every half ton of Potency Formulated Premawean or Premapig starter feeds you purchase, we'll give you another 50 pounds free. That's right, buy 1,000 pounds and you get 50 pounds to boot!

But that's not all...
While you're buying Potency Formulated starter feeds you'll also be earning Master Mix "Boot Bucks." And when you've got $75 worth of Boot Bucks, you can walk away with a free pair of high quality Wolverine work boots.

Chester Co. shepherds flock to 4-farm tour

COCHRANVILLE — Chester County's shepherds turned out fifty strong to breakfast on lamb sausages and pancakes at the farm of Warn and Annette Menhennett near Cochranville and to then tour the Menhennett flock and three other sheep operations.

Following the 8:30 a.m. breakfast on Saturday, April 13, the group first heard from Annette Menhennett on record keeping in a purebred flock. Sample record forms were distributed. While viewing the Menhennett's flock of 75 Shropshire brood ewes, 30 yearling ewes and 130 lambs, she explained the Menhennett system of internal parasite control which is based on frequent fecal analyses. Menhennett pointed out that one must know whether or not the sheep have Nematodes, Cestodes, liver flukes or Coccidiosis, otherwise much time and money may be wasted in treating for the wrong parasite.

Upon leaving the Menhennett farm, the group traveled in a caravan of cars to the farm of Bob Nichols near Nottingham. Nichols has a flock of 100 white-faced ewes, mostly Finn-crosses. Since he operated an evergreen nursery, one of his prime objectives has been to find sheep that will eat the grass and weeds between the trees and not browse on the branches.

Nichols lambs in May and has attempted successfully to adopt a total forage program wherein he buys very little feed. During the late fall and winter months the sheep graze on Brassicas. When he must supplement the outdoor forages he uses a fish emulsion feed. By adding corn to the pelleted ration he can decrease the protein content so that he can use the feed for his ewes as well as his lambs. He showed the group a plastic material which can be used for gates and pen-dividers.

The third stop on the tour was at the farm of Walter and Barbara Leis just south of Oxford. Barbara is a wool-crafter, specializing in woolen felt products. She displayed many attractive garments made from her homemade felt. The Leis's flock is primarily Corriedale and Corriedale crosses. Like other wool-crafters, Leis prizes the black or colored sheep in her flock.

To keep their fleeces clean, Barbara's prize colored ewes wear plastic jackets. The Leis's have converted a dairy barn into utilitarian sheep housing. Walter talked about the problem they had had with copper toxicity which was a result of high copper content in the well water. This problem was solved by installing a device that removed the minerals from the drinking water.

The final visit on the tour was to the flock of Tim Wills-Allen near Chadds Ford. Wills-Allen is an Australian and had much "down under" knowledge to impart to the group.

Wills-Allen uses a plastic greenhouse-like structure to house part of his flock of 250 Western-type ewes. It cost him $3000 to erect the stucture. Around one side of the greenhouse he has erected a "bugle sheep handling system" which is so-called because it is shaped like a bugle. This system of chutes and runways permits the shepherd and his dog to handle many animals without additional help. The "bugle" can be used for sorting and medicating, plus many other tasks demanded on the sheep farm.

Australian Tim Willis-Allen houses part of his flock in this plastic greenhouse-like structure.

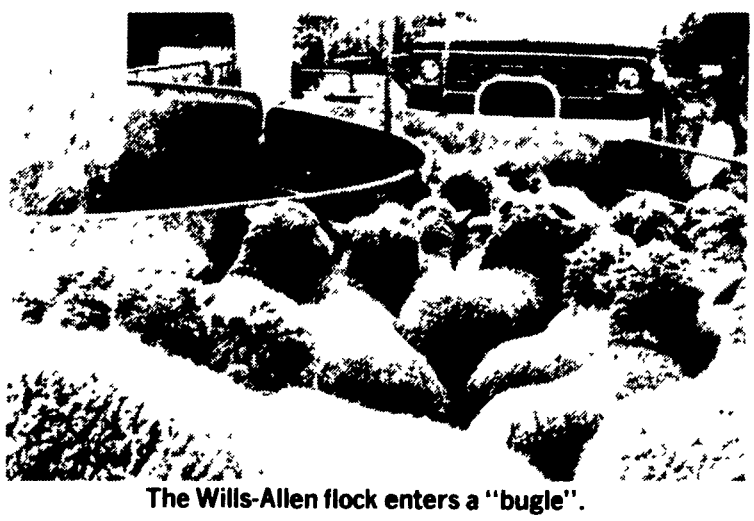
Part of Wills-Allen's tour included a demonstration of the Autralian method of shearing. Wills-Allen then showed the group his wool press and his pendulum blade sharpener.

Wills-Allen lambs in early January and many of his lambs are sold to the ethnic trade at Easter.

The Chester County Sheep and Wool Growers Association was organized in May 1984. Membership is open to any person who is interested in sheep and wool. Membership dues are $6 per year. Information on the organization may be obtained by contacting The Chester County Cooperative Extension Service, 235 West Market Street, West Chester, Pa. Telephone 215-696-3500.

In addition to a dinner meeting which is planned for May 9 at the Marsh Creek Inn north of Downingtown, the Chester County sheep producers plan to hold a wool festival at the Unionville Community Fair, October 10, 11, and 12. Educationally informative meetings are held throughout the year.

Bob Nichols explains his total forage program.



The Wills-Allen flock enters a "bugle".

Barbara Leis is surrounded by her hand crafted wool products.

New ID requirements proposed for livestock

WASHINGTON, D.C. — The U.S. Department of Agriculture is proposing to require that individual identification devices worn by cattle and swine remain on animals moved interstate, from point of origin to final destination.

"Current regulations require that the identification remain on the animals only for the actual interstate movement," said Bert Hawkins, administrator of USDA's Animal and Plant Health Inspection Service.

"By requiring that these devices remain on the animals until they reach their final destination, we are increasing our ability to pinpoint the source of any disease that may be detected in the animals and take quick action to remedy other problems," he said.

The devices include eartags, backtags, brands and tattoos, which may be used to identify the herd of origin of the animals.

Movement in interstate commerce is considered to begin at the point of origin and includes any temporary stops, such as those at stockyards or dealers for feed, water, rest or sale. The final destination is usually a slaughtering establishment or a farm for breeding.

USDA is also proposing that the individual identification devices not be removed or tampered with by any person who ships, transports or otherwise causes the cattle to be moved in interstate commerce. The devices may be removed at the time of slaughter or in specific cases authorized by USDA's deputy administrator for Veterinary Services.

Comments on the proposal are due June 14 and may be sent to: Thomas O. Gessel, APHIS, USDA, Room 728 Federal Bldg., 6505 Belcrest Rd., Hyattsville, Md. 20782.

Notice of this action is scheduled for publication in the April 15 Federal Register.

Beef promotion suffers setbacks in two states

CREAMERY — Legal action in two states, California and New York, have definite implications for future beef promotion campaigns. Early in January the Supreme Court refused to hear California beef promotion case, thus affirming the Court of Appeals decision–the assessment on out-of-state beef packers selling beef in California is unconstitutional.

California had passed the promotion assessment in 1982 and has since collected $2.3 million. Since July 1983 the funds have been held in escrow. Now all of the fees will have to be returned to the out-of-state packers.

In a March 2 statement the New York State Attorney General's office announced it had forced the Beef Industry Council of the National Livestock and Meat Board to discontinue television and radio commercials, print advertisements and other promotional materials the Attorney General feels are deceptive and misleading.

In addition, the Beef Industry Council has agreed to pay New York State $25,000 in costs. The "Beef Gives Strength" commercials which began in 1983 will be discontinued. The Attorney General says strength and endurance cannot be attained simply by eating beef.

This is the fifth time in less than two years that the New York Attorney General has been reponsible for significant changes in a national adverising campaign.

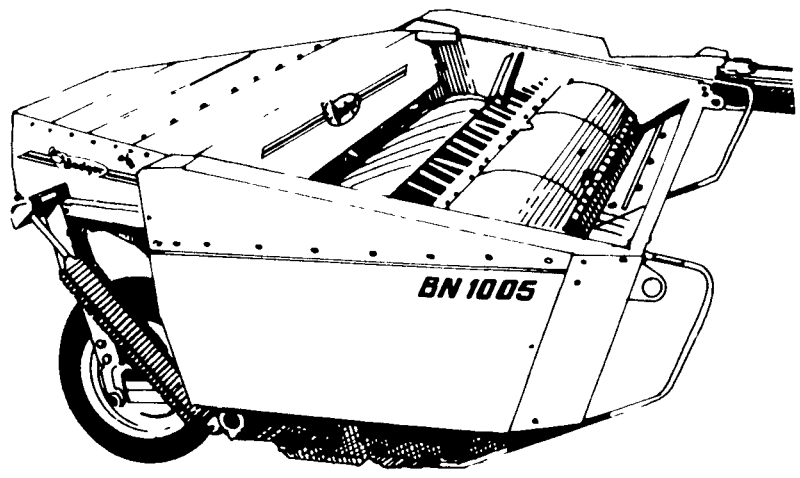
BADGER Has Been Building Forage Equipment For Over 30 Years. They Know What It Takes To Make Forage Equipment That Is Profitably Efficient. And They Know What Is Needed To Make Forage Farming Profitable.

Badger's Mower/Conditioner... Ground Hugging, Clean Cutting Efficiency At It's Best!

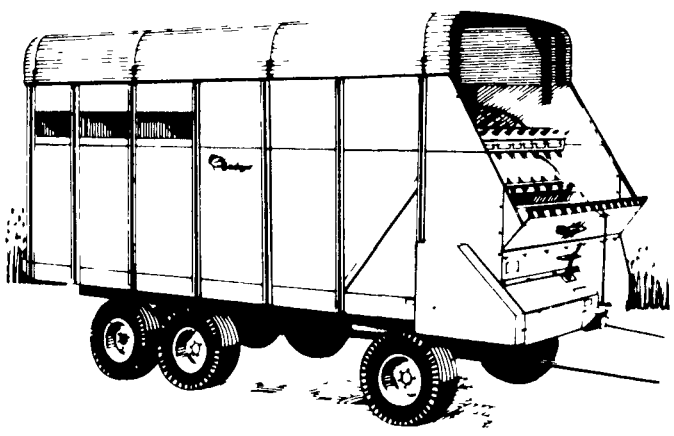
Badger's Mower/Conditioners are quiet, solid running, heavy-duty units designed to get all of your valuable forage crop without overconditioning.

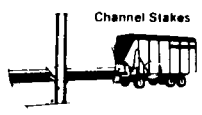
Built rugged for less maintenance, longer life. This unit features an adjustable dial hitch reel speed and tooth pitch. Wheel to cutter bar distance is only 38" to follow ground contours and get all the crop. Unitized header dampens high speed bounce.



The Best Forage Box You Can Buy Is Built By Badger

Here's Why Badger Boxes Outlive Other Brands!





- Badger is one of only a few who build their own complete units — quality control is controlled
- Tough all steel structural frame
- Marine grade plywood sides and floors with originial owner lifetime guarantee!
- Heavy-duty pintle chain main apron and cross-conveyor
- Simple chain drive for beaters and apron
- Easy maintenance
- Enameled roof with roof edge protector
- Options to suit you! High speed unloading kit/rear unload/cross-conveyor extension/hydraulic drive.

Livestock Ledger

By

Chester D. Hughes

Extension Livestock Specialist

Feeding your sheep

The adage, "You are what you eat" is just as appropriate for growing lambs as it is for people. A balanced ration provides needed nutrients for efficient growth and also will prevent some illnesses.

Lamb nutrition begins with the ewe. For the first 30 to 45 days, lambs rely on milk for most of their calories. Feed a lactating ewe a high energy ration with 14 to 15 percent protein. With high quality hay and 2 to 2.5 pounds of shelled corn per day, ewes can raise twins or even triplets. If the hay is less than 15 to 17 percent protein, add one-quarter to one-half pound of soybean meal to the grain. Money can be saved by not feeding the high energy ration to ewes with singles.

At 10 to 14 days, provide lambs with a creep area. Palatability of the ration is the key here. The lambs are getting lessons in eating rather than essential nutrients. Offer cracked corn, rolled oats, soybean meal, and leafy alfalfa hay or a complete commercial lamb starter.

Two or three weeks before weaning, gradually start lambs on a high protein diet that supports their rapid growth of bone and lean tissue. A high energy ration with 15 to 16 percent protein, 0.8 percent calcium, 0.4 percent phosphorus fortified with vitamins A, D, and E and a feeding level of antibiotic is recommended.

The 2:1 ratio of calcium to phospherus is critical for lambs. If there is too much phospherus, kidney stones can form and stop bladder function. Feed the starter ration as a ground and mixed feed or as a complete feed so that lambs cannot sort our various ingredients and create an imbalance.

Ten to 15 pounds of limestone per ton of feed provides calcium to balance the phospherus in corn and alfalfa. Roughage is also important. Provide 20 to 30 percent hay (400 to 600 pounds per ton) in a complete ration. If alfalfa is used, trace minerals are not required. Add 1 percent salt in a complete feed or pellets, or offer salt free-choice.

As lambs grow, the protein level in the ration should be reduced to save on supplement costs. Once lambs reach 80 pounds, 13 to 14 percent protein is adequate. At 100 pounds, lambs begin fattening and require even less protein–12 to 13 percent will do.

The Extension Service is an affirmative action equal opportunity educational institution.

Lamb grading, marketing workshops offered

LEESPORT – Marketing and grading are keys to success in today's competitive lamb industry. Lamb producers and allied industry leaders can learn the latest in grading, evaluating and marketing lambs by attending a regional lamb grading and marketing workshop being held on June 7 & 8, at Peters Brothers Meats in Lenhartsville, Berks County.

Clair Engle, Penn State Extension associate professor of animal science, is coordinating the program. Other workshop presentors include Bill Henning, Penn State Extension assistant professor of meats, John Zimmerman, director of livestock grading and market reporting for the PDA bureau of markets, Rick Harbaugh, regional manager of lamb marketing for the American Sheep Producers' Council, and Fred Staph, proprietor and manager of the Appalachian Lamb Company in Greencastle.

The session will also include the annual "On-Foot On-Rail Lamb Evauation". Those bringing a lamb for the workshop and the On-Foot On-Rail Evauation will be charged $12.00 for the workshop. Those not bringing lambs will be charged $16.00. Registration deadline for the workshop is May 17, 1985. For more information, call Clyde Myers, Berks County Agent, Berks County Agricultural Center, Leesport, PA 19533, telephone 215-378-1327.

Hearing scheduled on embryo import proposal

WASHINGTON, D.C. – The U.S. Department of Agriculture will conduct a public hearing on its recent proposal to establish import regulations for livestock embryos beginning at 10 a.m. Wednesday, May 15, at the Airport Sheraton Inn, 7301 Northwest Tiffany Springs Road, Kansas City, Mo.

"The purpose of the meeting is twofold," said Bert W. Hawkins, administrator of USDA's Animal and Plant Health Inspection Service.

"We want to recieve comments from the livestock industry and animal health officials on how best to utilize existing technology for collecting and preserving embryos," he said.

"We also want comments on establishing safeguards against introduction of foreign animal diseases such as foot-and-mouth disease and rinderpest, which do not exist in this country."

Hawkins said embryo transfer is growing in popularity; however, U.S. import regulations deal only with live animals, animal products or semen, with no provisions for importing embryos.

"We want to provide a way for our livestock industry to import embryos and thus benefit from this new technology," he said.

Persons wishing to speak on the issue are requested to preregister with the residing officer at the hearing location between 9 and 10 a.m. on May 15; nonregistrants will be given an opportunity to speak after registered persons have been heard.

UNIPEL® 13-34-10

fertilizer can get your corn crop off to a super start:

It has a high concentration of water-soluble Phosphorus that gets to young seedlings quickly Helps plants establish a good root system – the starting point for top yields Its quick-acting and long-lasting Nitrogen team up to feed the young plants for full yield potential, continually from sprouting to harvest.

This is the Starter Special that corn growers know from good experience It's highly effective as a banded starter. And it's SAFE . . . no chance of ammonia damage to tender, young seedlings when used as a "pop up" and applied directly with the seed at 50 lbs /acre

How can we fit UNIPEL 13-34-10 into your corn fertility program?

Brand name beef *If Frank Perdue can do it, why not the beef industry?*

WASHINGTON, D.C. — "Actually, the idea has been around a long time," says livestock specialist Terry Crawford of the Economic Research Service. Crawford is quoted in a recent issue of the Agriculture Department's FARMLINE magazine. "But the industry needs to overcome some major problems before it can sell brand name beef directly to consumers," he adds.

He says the key stumbling block is the beef industry's lack of central packagers. In the poultry industry, companies like Perdue control production and marketing from the farm to packaging and delivery to the supermarket's distribution center. And they not only put their label on a chicken; they also advertise and create demand for their brands.

Beef, however, is cut and packaged at a retail store, and the store puts its name on the product. There's little incentive for stores to sell packaged, brand name beef. Stores try to create customer loyalty by selling beef under their label. They fear that if all stores carried the same beef brands, consumers would not identify quality beef with a particular store, Crawford explains.

Poultry processors forced stores to carry brand name poultry by running large advertising campaigns that created consumer demand. "Without brand identity on the packaging, large beef processors cannot capture the benefits of a national advertising campaign," says Crawford.

And there's another problem connected with processor packaging of beef. Current store packaging lets in small amounts of oxygen and bacteria, reducing beef's shelf life. Processors can vacuum wrap beef to keep out bacteria, but vacuum-packaged beef is not attractive. "In most vacuum packaging, beef appears bluish red until it's unwrapped. It turns red when oxygen strikes it," Crawford explains. Consumers may not readily accept bluish-red beef because they connect bright red beef with freshness and quality. In poultry, vacuum packaging isn't a problem because the pale pink or yellow meat color is not significantly different between an exposed chicken and one in a vacuum bag.

The beef industry has also considered freezing beef, but that option also has its disadvantages. Many consumers avoid frozen beef because of its unappetizing dark color. Further, some consumers believe that it's not as good as fresh beef. "Consumers may freeze beef they buy fresh, but many have a prejudice against buying it already frozen," Crawford says.

However, one market for brand name beef already exists and may be open for further development. Many restaurants and hotels use some vacuum-packed beef with recognized brand names, such as Montfort of Colorado and Swift. Restaurants and hotels prefer portion-controlled, vacuum-packed beef because it stays fresh and is shipped in large quantities—usually about 40-60 pounds—that are especially convenient for thier needs. Most importantly, consumers don't see its initial bluish color.

Another marketing possibility may be tray-ready beef, according to Crawford. Here, a processor cuts and trims a large section of beef, such as a loin, and then reassembles and vacuum packs it. The package goes to retail stores where employees simply separate the cuts and repackage them for consumers. The meat turns red during repackaging and is put out under the store's label.

Retailers like this system because they can differentiate their product while taking advantage of central, less skilled, and often less costly meat cutters.

But this is still a long way from the poultry industry's brand names. "Unless consumers are willing to judge meat on something other than bright red color," Crawford says, "I don't expect to soon see brand name fresh beef as a major force in stores."

NY Bull Test Sale scheduled for May 3

ITHACA, N.Y. — Spring for the beef cattle producer means not only caring for this year's calf crop but also time to plan ahead for next year's calves.

Sponsors of the New York Bull Test Sale are encouraging both commercial and seedstock producers to give careful consideration to the 40 to 50 graduates of "The Class of '85" in the Bull Test Sale when considering the purchase of a new bull and planning for 1986.

The Bull Test Sale, scheduled for May 3 at the Livestock Pavilion on the Cornell campus, will be gavaled to a start at 7 p.m by auctioneer John Spiker. The Sale will feature those yearling bulls that have successfully completed the 140-day performance test at Cornell and have met strict certification standards for the sale. These standards include frame and type scores, index within the respective breed for rate of gain and weight per day of age, as well as breeding and structural soundness.

The beef breeds represented in the sale will be Angus, Charolais, Polled Hereford, Red Angus, Shorthorn and Simmental.

Sale catalogs and information may be obtained from William Greene, 130 Morrison Hall, Cornell University, Ithaca, N.Y. 14853.

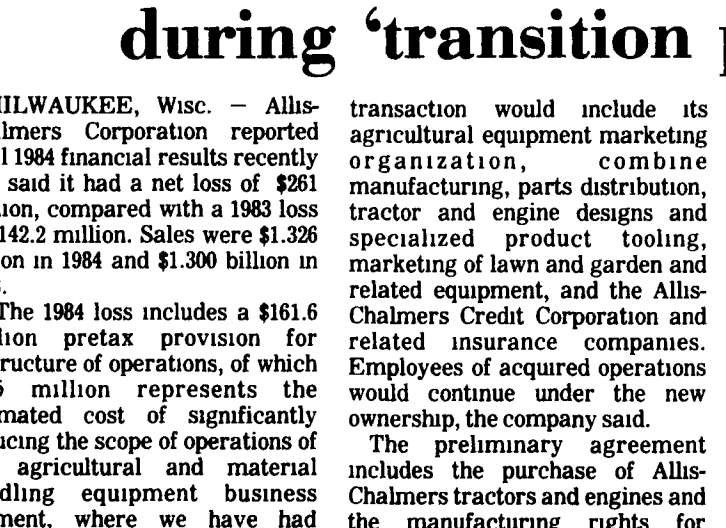
BUSINESS NEWS...



The 1,000 rpm forage blower matches speed and volume with today's largest harvesting equipment.

Henke's new forage blower fills silos faster

COLUMBUS, Nebr. – Henke Machine, Inc. introduces a 1000 RPM forage blower capable of matching speed and volume with today's largest harvesting equipment, according to Dale Parsons, marketing manager, Henke Machine.

"The forage blower, with a tip speed of 120 mph, can move up to 160 tons of corn silage per hour, or up to 90 tons of haylage per hour depending upon moisture content and length of cut," says Parsons.

"The all-bolted fan assembly makes for easier adjustment or repalcement. The full 1000 rpm direct drive requires less torque. More horsepower can be used with the forage blower without straining the drive line." says Parsons.

"Four leveling adjustable stands supply stability for a smooth running blower. For an extra margin of safety, heavy bolts are used in the P.T.O. For easy access, the low profile, heavy duty frame extends out from the blower," says Parsons.

More information on the Model 1140 Forage Blower or other equipment in the Henke product line is available from Henke Machine, Inc., P.O. Box 1006, Columbus, NE 68601.

Hershey Foods supports new Ag Center

Richard Hann (right) presented a $10,000 pledge from the Hershey Foods Corporation to the Dauphin County Agricultural and Natural Resources Center fund raising campaign. Dauphin County Commissioner Jack Minnich (center) and Russel Cassel, chairman of the Dauphin County Conservation District, accepted the pledge on behalf of the "Ag Center Fund."

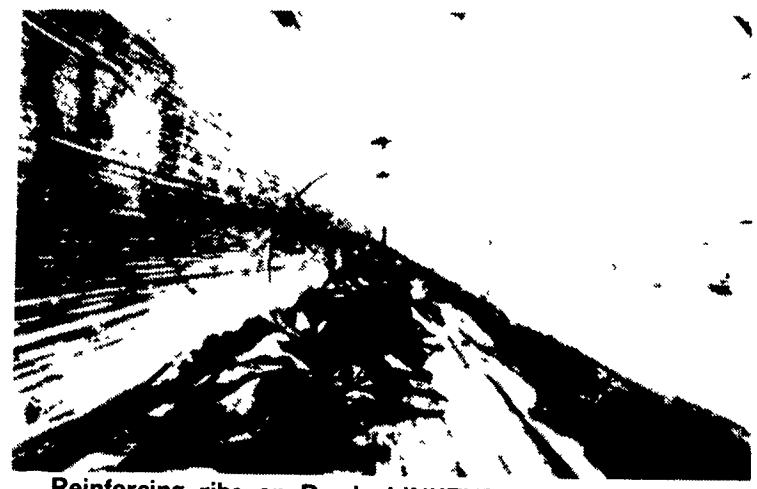
One-half of the center's $500,000 construction cost has been committed by the Dauphin County Commissioners, with the balance to be obtained through a two to three-year fund-raising campaign.

The Ag Center is slated to be the hub of ag and natural resource activities in the county.

Dow's ag film resists tearing

MIDLAND, Mich. – The Dow Chemical Company has introduced an innovative advance in agricultural films, developed to help overcome the problems of tearing or "zippering." Called LINKTUF film, the new self-reinforced design features a crisscrossed mesh pattern of ribs which effectively stops tears or punctures from spreading.

The LINKTUF films have a nominal thickness of 3/4-mil. and are available in black, clear, and white. The mesh or "net" concentrates extra plastic and extra strength in a pattern of diamond shaped ribs, while permitting lighter gauge material within the diamonds.



Reinforcing ribs on Dow's LINKTUF ag film keep tears confined to small area.

The result, compared with conventional plastic ag films, is a combination of reduced weight and superior tear resistance; 25% to 50% lighter with up to seven times the tear resistance. In practice, this means that a hole in the material between the ribs won't, under normal exposure to the elements, extend beyond the diamond shaped rib structure surrounding the hole.

The films lend themselves to a wide range of agricultural uses including mulching, growing tunnels (row covers), weed control, fumigant seals and windbreaks.

For mulching operations, the ribbed LINKTUF films are compatible with mechanical mulch laying equipment as well as with automatic transplanters. And, being comparatively lighter weight than conventional films, even manual laying is easier and faster.

As with conventional films, the LINKTUF film can be laid either before or after planting and allows a neat, clean punch through by transplanter equipment. With plants that are already bedded, the LINKTUF film is laid and holes burned over each plant.

At the end of the growing season, the film can be readily removed even when it has been anchored by soil on either side. This is because the film retains its tear resistance after prolonged exposure to ultraviolet radiation so that it won't disintegrate under the strain of removal.

LINKTUF film is laid on hoops in the same way as conventional films. Some growers prefer to cut progressively larger holes in the tunnels as the season goes on; the idea being to maintain closer control over daytime tunnel temperatures. Because of its mesh design, vent holes cut in the LINKTUF film stay intact. The ribbed film is also well suited for larger tunnel designs that span more than one planting row.

For detailed information about LINKTUF agricultural films, contact Dow Chemical U.S.A., Inquiry Services/LINKTUF, P.O. Box 1206, Midland, MI 48674-9969

Allis-Chalmers loses $261 million during 'transition period'

MILWAUKEE, Wisc. – Allis-Chalmers Corporation reported final 1984 financial results recently and said it had a net loss of $261 million, compared with a 1983 loss of $142.2 million. Sales were $1.326 billion in 1984 and $1.300 billion in 1983.

"The 1984 loss includes a $161.6 million pretax provision for restructure of operations, of which $155 million represents the estimated cost of significantly reducing the scope of operations of our agricultural and material handling equipment business segment, where we have had continuing heavy losses," said Wendell F. Bueche, president and chief executive officer. There was no restructure provision in 1983.

"On March 28," Bueche said, "we recommend a preliminary agreement with a subsidiary of Klockner-Humboldt-Deutz AG of West Germany to purchase our agricultural equipment business, including the Allis-Chalmers Credit Corporation. The transaction as presently contemplated would include on closing a cash payment from KHD of approximately $107 million. In addition, the agreement provides that prior to closing, Allis-Chalmers will withdraw $23 million from the Allis-Chalmers Credit Corporation. Allis-Chalmers also would have an opportunity to participate in future profits of that new business."

Allis-Chalmers said that the transaction would include its agricultural equipment marketing organization, combine manufacturing, parts distribution, tractor and engine designs and specialized product tooling, marketing of lawn and garden and related equipment, and the Allis-Chalmers Credit Corporation and related insurance companies. Employees of acquired operations would continue under the new ownership, the company said.

The preliminary agreement includes the purchase of Allis-Chalmers tractors and engines and the manufacturing rights for related service parts. Allis-Chalmers said that its tractor and engine manufacturing operations at West Allis, Wisconsin, and Harvey, Illinois, respectively, are not included in the transaction. The company said further that it anticipates that the tractor plant would be phased out by the end of 1985 and the engine plant by mid-1986.

The company reaffirmed that tractor and combine production shutdowns are continuing through April and that production startup is subject to market conditions.

"With regard to 1984 results of operations, the predominant adverse factor was a pretax loss of $237 million in the agricultural and material handling equipment area," Bueche said.

"On the other hand, our process equipment business earned a modest pretax profit of $9 million," he noted. Sales of process equipment accounted for 57 percent of 1984 sales, agricultural equipment 34 percent and material handling equipment 9 percent, Bueche added.

Bueche reported that "incoming orders for process equipment increased 13 percent in 1984, and in March of 1985 the company received one of the largest orders in its history. An order valued at more than $260 million was awarded to a consortium led by Allis-Chalmers to supply 20 hydraulic turbines for the Yacyreta hydroelectric project in South America, of which our company's share is more than half the dollar value."

"Allis-Chalmers is in a period of transition to an agricultural and material handling equipment segment resized to market conditions and a process equipment segment with leading technologies and substantial market shares," Bueche said. "Our resizing and rationalization program has included major cost reductions, reduced capacity, asset sales, outsourcing and reduced employment. This program has been and is difficult. But, we are determined to be a lean, cost-effective and profitable enterprise serving our customers over the long term. With a prompt implementation of a recapitalization plan, we are confident that our transition will be successful," Bueche concluded.

Nu Pulse to offer 'Rotaflo' rotary dairy platforms

MADISON, Wisc. – Rotaflo Dairy Systems, of Hamilton, New Zealand, and Nu Pulse America, Inc., have established a marketing agreement which spokesmen claim will give dairy farmers a new outlook on rotary dairy platforms. Plans call for Nu Pulse to handle the U.S. marketing of the highly successful New Zealand-based Rotaflo.

The joint announcement was made at Nu Pulse's headquarters in Madison, WI, by Nu Pulse president, Barry Gasciogne, and by Jack Graham, the civil and structural engineer and inventor of the Rotaflo dairy system.

"We understand that rotaries have gotten a bad name, to be honest," admits Graham. "But the traditional problems of steelwork corrosion, along with the roller and bearing wear, are virtually eliminated. The Rotaflo system is just a simple concrete platform floating in a water reservoir, so there's not much that can wear out over the first forty years."

The floatation principle is that the power to move a large floating object is very small in comparison to moving that same object on wheels. Water is the ever-lasting low-friction bearing. The displacement principle involved is that the platform floats more or less at the same height whether unloaded or loaded with cows, because the water is displaced up the sides of the platform.

The arrangement will allow farmers ordering a Rotaflo rotary dairy platform through Nu Pulse to specify Nu Pulse or any other reputable brand of milking equipment.

The announcement was made in conjunction with the installation of the first Rotaflo rotary dairy platform in the U.S. on the Jacobs Farm in Calumet County, Wisconsin. This first Rotaflo features Nu Pulse milking equipment for the 150-cow herd.

The tank is completely earthed, helping to eliminate stray voltage, a problem currently facing many dairymen. For more information contact Nu Pulse America, Inc., 908 Stewart St., Madison, Wisc., 53713, phone: 608-274-2722.

New Bell Oats Crimper is portable

TIIFFIN, Ohio – C.S. Bell Company, Tiffin, Ohio, has announced the introduction of a new Oats Crimper. Oats, corn and other grains can be quickly and conveniently crimped or cracked with this new model. This unique device, which incorporates a cast iron and steel design, greatly reduces feed costs and increases the feed volume and digestibility of an animal's diet.

Machine output is ten bushels per hour under normal conditions. The size of the Crimper make it ideal as a portable unit or for a permanent installation. The machine contains heavy coil springs which are adjustable to a coarse setting when cracking corn for other livestock, such as sheep, goats, some calves and poultry. Power requirements are as little as a 1/3 hp electric motor.

Overall dimensions are 13" x 16" x 15". Optional accessories such as a stand, belt guard, motor bracket and drive pulley with V-belt are available at extra cost.

For more information contact The C.S. Bell Company, P.O. Box 291, Tiffin, OH 44883 or call (419) 448-0791.

C.S. Bell's Oats Crimper

Union Carbide gives $40,000 to ag research foundation

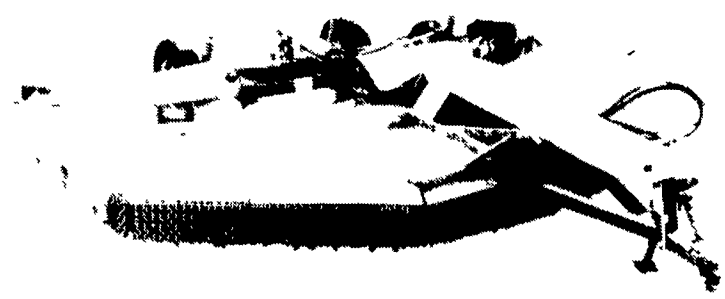
ATLANTA, GA – Union Carbide Agricultural Products Company, Inc. has pledged $40,000 to the Foundation for Agronomic Research (FAR).

Union Carbide Agricultural Products Company has its technical and business center in Research Triangle Park, North Carolina. The company, which markets several agricultural products, including plant growth regulators, herbicides and insecticides, will contribute $10,000 this year and $30,000 over the next three years.

FAR is a tax-exempt organization which sponsors agronomic research efforts in the U.S., Canada and other countries. It is affiliated with the Potash & Phosphate Institute (PPI) with headquarters in Atlanta, Georgia, and now supports more than 50 research projects.

Other organizations currently participating with FAR include: Agrico Chemical Company; BCM, Inc.; Cansulex Limited; Chemical Enterprises, Inc.; Chevron Chemical Company; C-I-L Inc.; Cominco American Incorporated; Conserv, Inc.; Dow Chemical U.S.A.; Duval Corporation; Estech, Inc.; Far West Fertilizer Association; Freeport Minerals Company; Frit Industries, Inc.; Goodpasture, Inc.; International Minerals & Chemical Corporation; Kalium Chemicals--PPG Industries, Inc.; Mississippi Chemical Corporation; Poole Chemical Co., Inc.; Potash Company of America; Potash Corporation of Saskatchewan; Terra Chemicals International, Inc.; Texasgulf Inc.; and The Sulphur Institute.

Woods' Orchard Mower



Woods' new Model 312 is a heavy-duty mower that cuts a 12-½' swath in one pass. Designed for use with tractors rated from 40 to 75 hp., the Model 312 mows and sheds prunings simultaneously and is perfect for groves on 18' to 20' row spacing.

Complete information and specifications on the Model 312 are available from Woods, Division of Hesston Corporation, Oregon, Illinois 61061.

Ag-Chem's Tru-Spread coordinates ground speed, application rate

JACKSON, Minn. — Ag-Chem Equipment Co., Inc. introduces the new Ag-Chem Tru-Spread for dry fertilizer and chemical application. The Tru-Spread features a hydro-mechanical ground speed coordination system that provides instant metering response to application speed changes.

This system is six seconds ahead of pneumatic type delivery — eliminates lag time between metering and broadcasting, and maintains a constant lbs./acre application rate as the applicator accelerates or decelerates in the field. The full hydraulic booms release the specified amount of dry product every 6 inches across the 50-foot boom.

At the edges of the field the operator can shut one boom down for instant ½-width spread capability with no change in application rate. The booms have only 3 basic moving parts, and all critical components are stainless steel to resist corrosion. The metered feed screw and housing are hinged to swing open for easy access cleaning.

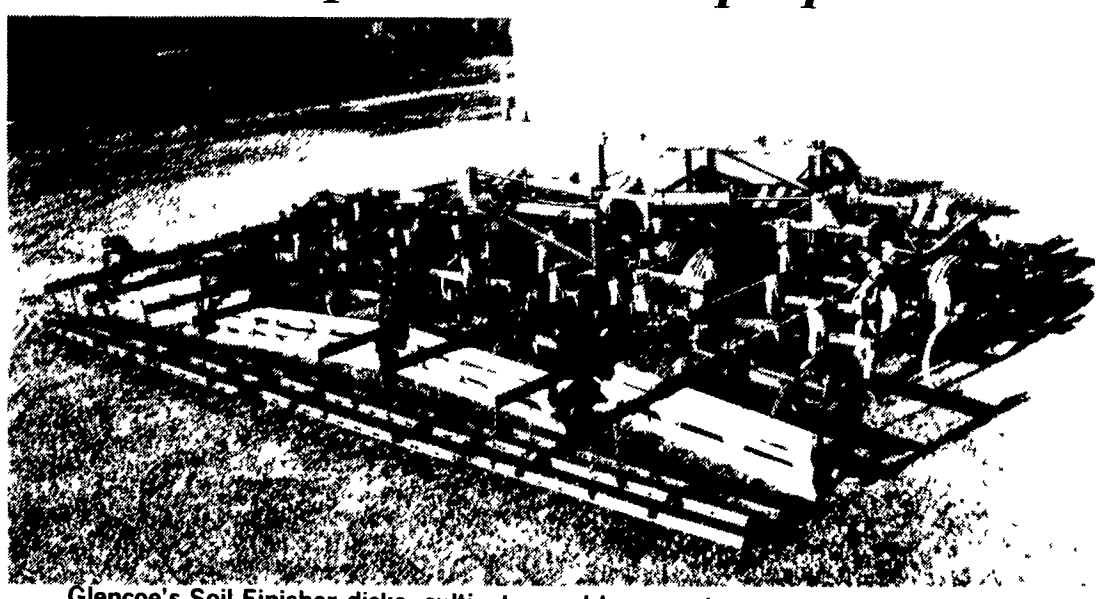
The Tru-Spread inverted pyramid dry box holds up to 260 cubic feet (strick capacity) of dry product, and measures 8 feet across for easy access loading A window at the front of the hopper allows the operator to monitor the spreader box contents from the applicator's cab. All spreading controls mount in-cab.

Optional equipment includes a foam marking system, and ground operated roll-up tarps to protect dry fertilizer and chemicals from wind and rain.

More information is available from Ag-Chem Equipment Co., Inc , Industrial Park, Jackson, Minnesota 56143, phone 507/847-2690

Tru-Spread provides uniform application of dry fertilizer and chemicals.

Glencoe speeds seedbed preparation



Glencoe's Soil Finisher disks, cultivates and harrows in one field operation. The implement trims the cost and time of field preparation and chemical incorporation by reducing the number of passes across the field.

A new Rolling Reel attachment shatters clods and mixes the soil for improved incorporation while leveling the seedbed.

No-till discussed at Chester Co. meeting

COCHRANVILLE — The do's and don'ts of no-till planting were given by J. Omar Stoltzfus of Stoltzfus Farm Service, Oxford, at a recent meeting held by Stoltzfus Farm Supply, Cochranville. Keith Zanzinger, Chester County Extension agent spoke on safe use of pesticides and the Crops Management Association Jenny Russell, Lewisville, chairperson of the Chester County Conservation District gave an update on the Chesapeake Bay program.

"The meeting was held to let users of the White Seed-Boss no-till corn planter become familiar with good no-till planting practices," according to John Stoltzfus. The planter is being made available for rental through a cooperative program between the County Conservation District, Stoltzfus Farm Supply and the White Equipment Company. It allows farmers to try out no-till planting of corn and soybeans.

"Be prepared to change. Change methods, applications, and materials as conditions change," Stoltzfus told the farmers. "Farmers can use all the help they can get. A Penn State Agronomy Guide will provide valuable help," he added.

Stoltzfus suggested soil tests as a part of a successful program. "A pH of 6 to 6.4 seems to be satisfactory when no-tilling. A farmer should remember that the soil report is only an average for the deficiencies and plant needs."

Russell expressed the appreciation of the Conservation District directors to Stoltzfus Farm Service for making available the rental planter. "John and Melvin Stoltzfus have made it possible for a farmer to try a few acres of no-till corn or soybean planting.

"No-till is not for every field nor for every farmer," Russell continued. "Evidence indicates, however, that no-till can reduce soil erosion that causes damage to neighboring property and causes the streams to run chocolate colored. The Chesapeake Bay study alleges that sediment from agriculture in Pennsylvania has considerable impact on the Bay. We must protect our soils to protect our water."

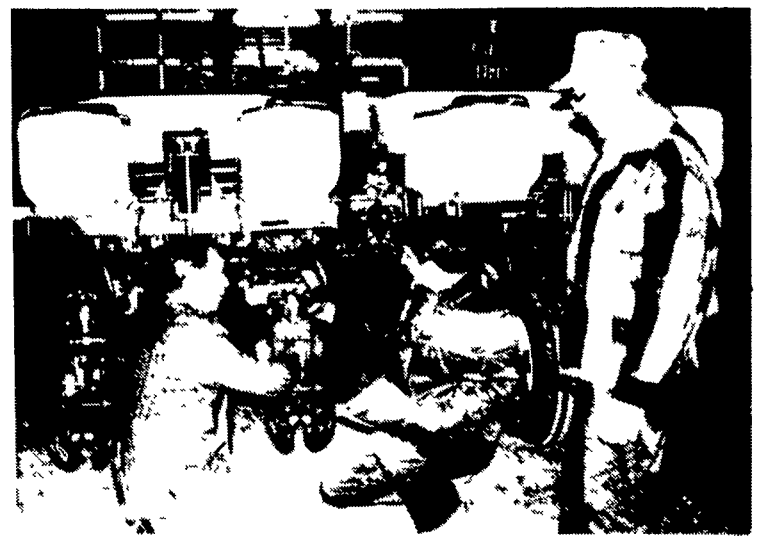
She said that guidelines are to be adopted that will result in cost-sharing for nutrient management practices for a few farmers in the Bay Watershed. Part of the funds alloted to Chester County have been used for the initiation of a Crops Management Association. No-till demonstration projects are being established by the Oxford Vo-Ag department and Kerry Huffman, Vo-Ag teacher.

"With no-till, we are seeing an increase in insect damage," Keith Zanzinger said. "It is important to get into your fields–cruise your fields. Watch for cutworms. They don't seem to be a problem in the first year of corn. The problems seem to pop up in the second year The best pesticide applications will look bad with poor applications," he noted.

Omar Stoltzfus recommended rye as a winter cover crop. "It provides a good mulch for no-till. It conserves moisture and reduces soil erosion. However, a farmer must know its limitations," he warned.

"Rye should be no more than knee-high–15-16 inches–when no-till corn is planted. If growth is more than this, it can keep the soil cool, may prevent good seed contact when planting and tends to draw moisture out of the soil. It may be wise to consult with your seed supplier to obtain rye seed that is compatable with the no-till program," he said.

"Learn about weeds," Stoltzfus emphasized. "There is an expanding list of weeds to deal with



John Stoltzfus (left) discusses the operation of a no-till planter with John Boxler, Landenberg, and Charles Harris of Cochranville.

The herbicide program needs to be tailored to the weeds present

"A split application of herbicides may be more effective in controlling weeds," Stoltzfus suggested. "Make the first application in early to middle April. Make the second application about the middle of May to catch the late emerging weeds. Two lighter applications may overcome any unfavorable weather conditions that existed at the time of a single application.

"The key to control of weeds in soybeans is preventative maintenance," Stoltzfus continued. "Control the weeds in the corn the year before to more effectively control weeds in soybeans."

He also encouraged farmers to cruise their soybeans to control Johnson grass. "When patches of Johnson grass are spotted and sprayed at the right time, it can be controlled."

"Split your applications of fertilizer to prevent run-off from heavy rain," Stoltzfus suggested. "Apply the nutrients when the plant can best use it. This is especially true of nitrogen. With a rainy season, nitrogen will leach or volitolize. No-till planting may require 20-30 pounds more nitrogen because of these losses. Consider the banding of fertilizer rather than broadcasting.

"You are a part of the production job. With good fertility and no weed control, you will grow weeds With low fertility, good weed control, insect control and cooperating weather, you will have a crop," Stoltzfus concluded.

A Silent Disaster is Occurring in Lancaster County and other Chesapeake Bay watershed areas:

EXCESS SOIL EROSION A PREDECESSOR OF FAMINE

Before dismissing this as mere ad "hype", consider these startling facts. Norman Berg, former head of USDA Soil Conservation Service has stated, "It is an urgent situation when one third of our really good cropland (World Watch Institute says 44%) is suffering net soil loss, with some soils eroding at twice, or three or even ten times the tolerable limit (or renewal rate of 5 ton per acre per year). **In Lancaster County, the loss exceeds 9 ton per acre a year!**
Because of the urgency of the situation, the National Ag Technology Association is sponsoring a free, public 2 day Bio Ag Seminar:

PROSPERITY, PROFITS AND PERMANENCE IN AGRICULTURE

Fri., May 3, 10 AM to 9 PM, Sat, May 4, 1985 9 AM to 5 PM
Farm & Home Center, Lancaster, Pa. Off Rt. 72 Below Rt. 30.

Several very important breakthroughs to meet these age old threats Drought, soil erosion & consequent famine will be announced. They pertain to soil particle physics, permitting much greater water insoak and retention thereby reducing draught damage, fertilizer runoff water pollution, and excessive erosion. Other topics include: High input costs, reducing chemical dependence without production loss, animal feeding without antibiotics, animal disease loss, safe manure handling and personal health and safety. Energy conservation.

Friday 10:00 AM: George Wolff, Things we have learned from Chesapeake Bay decline
11:00 AM: Exhibitors presentations
1:30 P.M.: Gerry Brunetti, Rock dusts and animal biotherapy VS toxic technology
2:30 P.M.: Jody Tohme, Natural fertilizers for todays needs.
3:30 P.M.: Question speakers, visit exhibits.
4:00 P.M.: Organic Crop Improvement Assoc. Meeting.
7:00 P.M.: Tom Harding, Farm marketing for profit; the growing demand for high biological value food.

Sat., May 4
9:00 A.M.: Soil Conservation Representatives remarks, 2 counties.
10:30 A.M.: John Albright, The electromagnetic spectrum and it's effect of animals and people.
1:30 P.M.: Leonard Redzon, 15 years experience using processed bituminous coal as soil amendment and feed additive.
2:30 P.M.: Practical water pollution remedies.
3:30 P.M.: Dr. John Whittaker, What has gone wrong with the immunity system of our animals.

Tapes of any 2 speakers $5. Transcript of entire meeting $2 PP. includes exhibitor information.
Exhibitor space available. Contact: Natural Ag Tech. Assoc., P.O. Box 1214, Lebanon, PA. 17042 Ph. 717-273-2408

High Priority Issues That Can Help Save The Family Farm & The Bay!
How well are you caring for the most important "machine" on the farm... your own body? A free vascular test will be available on Sat. using latest doppler technology.

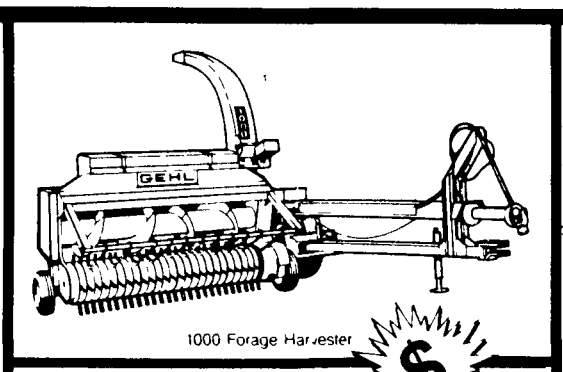
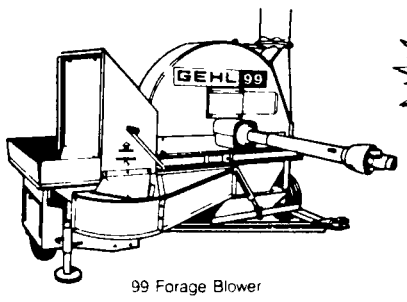
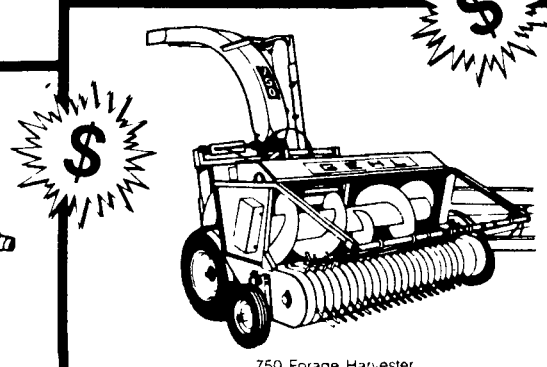
1250 Forage Harvester



1000 Forage Harvester



99 Forage Blower



750 Forage Harvester

Double cash bonus

up to $1,000 on a new Gehl!

What's better than owning a new Gehl?
Answer: Owning a new Gehl AND getting a double cash payoff!

Now you can do both. Select a new Gehl forage harvester of your choice (Models 1250, 1000, 750) or a new Gehl 99 forage blower Make your purchase between February 1, 1985 and June 30, 1985, and Gehl will give you the cash bonus shown below.

Gehl 1250 Forage Harvester· $500 bonus
Gehl 1000 Forage Harvester· $350 bonus
Gehl 750 Forage Harvester. $250 bonus
Gehl 99 Forage Blower· $100 bonus

You can deduct the amount of the bonus from the final dealer price Gehl will match the amount of your bonus with a cash certificate you can apply to the purchase of one of these new models

- [ ] Round Baler 1460/1860
- [ ] Mower Conditioner 1090/2130/2160//2230/2262
- [ ] Disc Mower Conditioner 1080/2330/2350
- [ ] Mix-All Grinder Mixer 100/135
- [ ] Skid Loader 3310/3410/3510/3610/4510/4610
- [ ] Forage Box 640/650/960
- [ ] Flail Chopper 7200

Your second purchase must be made between February 1, 1985 and December 15, 1985, in order to redeem the cash certificate

Take advantage of this double bonus payoff offer And get that equipment you've been needing Talk to your Gehl dealer right away

You can't buy better equipment anywhere. Make us prove it with a demonstration.

Carrot spray OK'd by EPA

NEWARK, DE – The Environmental Protection Agency (EPA) has granted the Delaware Department of Agriculture a specific exemption allowing use of fenvalerate to control carrot weevil on carrots.

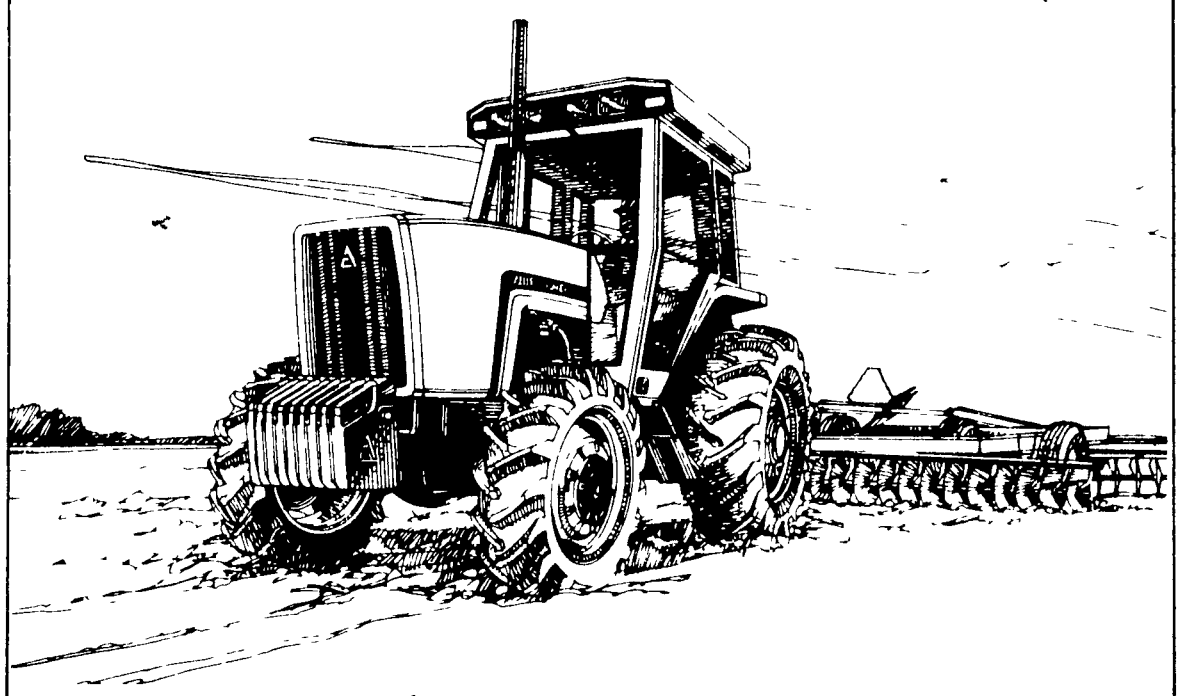
According to H. Grier Stayton, Pesticide Compliance Manager with the Delaware Department of Agriculture, the product Pydrin 2.4EC may be used under certain conditions in Delaware until September 30.

A maximum of 1,000 acres of carrots may be treated. A maximum rate of 0.2 lb. a.i./acre per application may be used and a seven-day pre-harvest interval will be observed.

Farmers needing more information on this special exemption should contact Grier Stayton at the Delaware Department of Agriculture, 800-282-8685, or 736-4811

ALLIS-CHALMERS 6070 TRACTOR

New show of row-crop power... plus Peace of Mind.



Great new addition to the Allis-Chalmers family The new 6070 packs 70 PTO hp* for great all-around working ability plus the 3-Year/3000-Hour Peace-of-Mind Warranty on engine and power train

- Proven Allis-Chalmers diesel engine offers excellent combination of torque rise and fuel economy
- Synchronized 12-speed transmission lets you shift on-the-roll through all forward speeds
- Optional front-wheel-drive delivers excellent traction and reduces compaction, while it saves even more on fuel
- Big, comfortable cab keeps you working easily all day

There's much more to see Stop in now and arrange for a demo

*Manufacturer s maximum observed PTO hp at rated engine speed

Planning Your Hay and Haylage Harvest

When you plan how to harvest, store and feed your hay crop forages, you need to keep the total farm picture in mind. You have many alternatives. Which one is best will vary from farm to farm.

When you are trying to decide which methods are best for you, you need to consider:

1. Harvesting, storage and feeding losses – both physical and nutritional.

2. Quality. This includes nutrient content, palatability, digestibility and how well it has been preserved.

3. Equipment and facilities. What kind do you presently have and is it adequate? What is the cost of upgrading or expanding what you already have, and can the cost be justified? Are reliable custom operators available when you need them? Remember, timeliness of harvest is very crucial to quality.

4. Labor efficiency – harvesting and feeding.

Aim To

When harvesting and storing our hay crops we should aim to:

1. Cut the crop at proper maturity Depending upon your particular farm situation, you may have to compromise between high protein and digestible fiber, and between early maturity and the vigor and longevity of the stand.

In order to obtain highest yields of high-quality feeds while maintaining a productive stand, forage crops should be cut at the maturities shown in Table 1

TABLE 1

Crop	Maturity
New alfalfa seeding	
first cutting	' bloom
Established alfalfa stands	
first cutting	Full bud
Sept Oct cuttings	45 days after last cut
other cuttings	35 days after last cut
stressed stands	¼ bloom
Perennial grasses	
first cutting	Heads emerging from boot
later cuttings	6 7 weeks after last cut
Red Clover	
first cutting	¼ ½ bloom
later cutting	¼ bloom
Grass legume mix	Use legume schedule
Rye	Late boot
Other small grains	Early head emergence
Sorghum sudan hybrid	3 5 feet

Under cool growing conditions, is is generally advantageous to harvest the crop at a slightly later maturity to give it more time to accumulate plant nutrients.

Learn to set priorities at hay making time, and keep a close watch on long range weather forecasts. Cut the hay at the beginning of a period of predicted good weather – even if it means letting the corn planter set idle. Remember, it takes more good weather to make hay than to plant corn, and good weather can be a very scarce commodity. Once the hay is off, you can plant corn while you're also growing your second cutting of hay.

2. Get the crop off the field soon after cutting to minimize losses from plant respiration, and from exposure to sun and rain. These losses can be as much as 15-20% or more of the available dry matter. Conditioning, ensiling, and the use of preservatives and chemical drying agents can help reduce these losses.

3. Minimize harvesting and storage losses. They can amount to as much as 15-30% of the harvested dry matter. Research trials have shown that dry matter losses in hay crop forages ensiled in tower, non-sealed silos will vary an average of 10 to 29%. In these trials the extremes were 7 and 56%!

Dry matter losses in bagged large bale silage averaged 4 to 10%. Whether the hay was baled at 35 or 60% moisture of whether it was stored in individual bags or stacked under plastic didn't seem to make much difference.

Rake hay while it still has some moisture and let it finish drying in a fluffy windrow. Then, harvest the hay before it gets too dry.

4 Aim to achieve a consistent, predictable, good fast fermentation of ensiled feeds. This requires sufficient fermentable energy, either in the crop or from an additive, proper moisture, a good pack and the presence of the right organisms.

The use of preservatives and additives can help improve the consistency, predictability and rapidity of the ensiling process, especially when conditions are less than ideal for normal fermentation. Unfortunately, you never know when conditions were ideal until after the product has been ensiled; then, it could be too late.

Because results vary considerably from trial to trial, it is difficult to predict what benefits you can expect from preservatives and additives under your specific situation. Greatest results can be expected with hay crop forages – they don't contain as much fermentable carbohydrates – and with crops that are ensiled under less than ideal conditions: too dry, too wet, too long, poor pack, slow fill and leaky structures. Because of these variables, you might look upon their use as insurance. Some years it might be hard to prove their benefits, but in years when "things" aren't quite right, using preservatives or additives may help prevent you from having a silo full of bad feed, and that could help prevent a herd from going into a costly slump.

5. Another objective is to prevent excessive heating. This reduces the risk of barn fires, reduces the loss of feed energy and dry matter and helps to prevent heat damaged protein. The ideas discussed previously will help you accomplish this.

6. Length of cut and proper moisture is also important for getting a good pack and for efficient digestion. Consider the entire ration as you try to decide what is right for you. Here again, you might have to compromise between what is best for packing, and what is best for the cow. Remember that you need enough effective fiber in the total ration and ration that is not too wet and heavy for good rumen fermentation.

7. Aim also to provide yourself the flexibility of being able to manage the feeding of the hay crop forages you have in storage. Will you have access to the kind and quality of forage you need, when you need it, for the specific groups of animals you'll be feeding? This is very important for sustaining good levels of efficient production!

Ideally, your facilities should provide you the opportunity to store feeds separately by kind and quality, and to prevent you from having to feed hot, uncured ensiled feeds.

Chemicals and Plastics

Many farmers have been utilizing plastic bags for storage. They can provide farmers the flexibility that need to store extra tonnage, or feeds that are not of the right quality to put into a silo. They can also provide temporary storage for enabling farmers to feed cured feed during silo filling time.

Some farmers have been successful in making large round bale haylage and preserving the bales in individual bags. This process can be labor intensive and the bags are not cheap. But, it enables farmers to enjoy the benefits of haylage without the cost of harvesting and storage equipment and facilities. The challenge is to make a tight bale and keep the bag air tight. Bale at the same moisture you'd be ensiling for haylage – about 40-55%.

Ammonia has been injected into some bales. It has greatest benefit when used on lower quality grasses. In addition to being an excellent preservative, it also improves the protein (NPN) levels of the crop and increases the digestibility of the fiber.

Large haylage bales are heavy and cumbersome. Because of their tightness, they feed differently than large hay bales. Researchers have found that cattle can consume haylage easier if the bale is placed on an incline. Plans for an inclined rack are available from the Penn State Extension Service.

Another new aid in the farmer's arsenal of weapons is chemical drying agents. They are sprayed on the crop as it is being cut. They can reduce drying time about one day. They are most effective on legumes that have been conditioned and allowed to dry in the swath.

Maryland sponsors Ag Day

COLLEGE PARK, MD – How will Maryland farmers adapt to major changes in technology and the economy?

University of Maryland students and faculty hope to provide some answers today at Ag Day '85, an annual, student-sponsored event which will showcase some possible new directions for Maryland agriculture. It also gives visitors a glimpse of current agricultural conditions.

"Ag Day is a chance for people from all walks of life to get together and see what agriculture is doing at the University of Maryland and throughout the state," says Hillary Poore, president of the Agriculture Student Council.

One of its better features, Poore says, is that Ag Day gives visitors a free taste of farm life. In addition, it is a chance to see the changes taking place in the lifestyles of the state's food producers.

Individual departments and student clubs from within the College of Agriculture are filling the area around the university's barns with their exhibits, say Ag Council represntatives. In addition, different farm groups and agri-businesses will display their products and talk about Maryland agriculture.

This year's program includes special exhibits showing current and future uses of advanced technology in the state's agricultural industry, Poore says. She says Maryland students recognize both positive and negative issues in the industry, and they want to be a part of future changes.

Computers, robots, and descriptions of continuing agricultural research are part of the look into the future. But tradition is still an important part of Maryland agriculture and Ag Day.

"The fact that it's lasted so long tells me that Ag Day is providing a meaningful experience for the students," says Dr. Donald A. Hegwood, dean of the university's College of Agriculture.

Ag Day is like a window to the college, Hegwood says. The public can look to see what's going on, and taxpayers get an idea where some of their money for education is going

THE DIESEL LAWN MOWER.

Kubota has a whole new way to cut the grass. It's the first diesel lawn and garden tractor in the country.

Kubota's G-Series lawn and garden tractors come with water-cooled 2- or 3-cylinder diesel engines. They're built to outlast ordinary gas mowers by several seasons.

There are four G-Series models, from 10 to 14 horsepower. They all have live front PTO shaft drive to the mid-mount mower. You can choose a hydrostatic transmission. And you can choose a variety of implements including a snowblower, tiller or front blade.

So don't let the grass grow under your feet. See the G-Series soon.

So take the first step and see these Kubotas soon.

"Here's why I sell Bicep"

Bicep does a better job of controlling broadleaf weeds and grasses in corn and sorghum than most tank mixes In field after field, year after year, I've watched them all perform And I've had my customers come back, for Bicep

Here's why I like to recommend BICEP:

- Weed and grass control that you don't get with other products or tank mixes
- The convenience of handling just one product
- And economics is the clincher

It's pretty interesting When my customers start to discuss weed control in corn or sorghum Bicep usually comes out on top And for good reasons

Bicep trademark of CIBA GEIGY

Foraging Around

By Dr. John E. Baylor
Director of Market Development
Beachley-Hardy Seed Company

Within the next 2 to 4 weeks alfalfa growers throughout the Northeast will be harvesting that big first cutting of 1985. Based on longtime averages for a 3-cut harvest system that first crop represents about 40 percent of the total annual production. In a 4-cut management system it ususally represents 30 percent or more of the season's crop. In either case it represents a big crop that you can't afford to lose to bad weather.

Thus, a question on the minds of many farmers is "How can I manage that first cutting to minimize losses?"

Certain Losses Inevitable

Some losses in either silage or hay making are unavoidable. For example, when the alfalfa plant is cut it continues to respire. Thus, respiration losses are inevitable, regardless of how the crop is handled, as long as the plant cells are alive. And in many cases this may represent a sizable loss, possibly up to 8-10 percent of the original dry matter in the crop. This loss is usually included as a harvest or storage loss.

Estimated total losses for alfalfa harvested and stored as either silage or hay are about as follows:

	Field & Harvest Losses %	Storage Losses %	Total Losses %
Direct Cut Silage	4 - 5	15 - 20	19 - 25
Wilted Silage (60-70% H_2O)	5 - 7	10 - 11	15 - 18
Low Moisture Silage (45-60% H_2O)	7 - 8	8 - 10	15 - 18
Barn-dried Hay	12 - 18	5 - 7	17 - 25
Field Cured Hay	20 - 25	5 - 7	25 - 30+

Thus, regardless of how you handle your first cutting you can expect some losses. But based on the best data available these losses will be less and your total seasonal yields higher if you store that first cut in the form of wilted or low moisture silage.

Top producers in the Pennsylvania Alfalfa Grower's Program seem to agree. For example, of the top 50 growers over a 5 year period 47 stored one or more cuttings, including the first harvest, in the form of hay crop silage. Nineteen stored all cuttings as hay crop silage while only 3 were in an all hay program

Silage Making Practices

How can you consistently make top quality hay crop silage? There's no magic formula. But following these rules should help you keep losses to a minimum:

1. Start with a crop of high quality.
2. Harvest at the proper stage of maturity - full bud to very early bloom.
3. Field dry to 65% moisture or less to produce either a wilted or low-moisture silage, or if you do direct cut, use a feed additive such as corn and cob meal.
4. Chop relatively fine. Recent studies suggest a theoretical cut of ½" and keep the knives and shear bar sharp. This particular size seems to result in more effective fiber for rumination than the very fine cut.
5. Provide a tight silo to exclude air and water.
6. Used covered wagons to prevent excessive leaf loss in the field. Alfalfa leaves make expensive mulch.
7. Fill silo rapidly and pack thoroughly. Distribute evenly in silo.
8. Use a suitable seal to exclude air.
9. If you're storing silage in a conventional upright or horizontal silo leave the silage undisturbed until ready to use the feed.

During the past several years a number of microbial products containing lactic acid-producing organisms (bacteria) have been put on the market. Several of these appear to offer some potential for reducing ensilage losses of dry m atter and especially protein. Acidity of the silage often appears to be increased and general silage quality improved. If you do include one of these products in your program be sure to follow the supplier's directions for use. And don't expect to see dramatic improvement in the quality of your silage.

Hay Making Helpers

While silage appears the way to go for first cutting, for many producers silage simply does not fit into their program. What can these growers do to preserve quality in their hay crop?

As with silage, start with a quality product. And quality is most closely related to the maturity of the plants at the time of harvest.

Bad weather can result in both excessive dry matter losses and losses in feeding quality. Under ideal conditions total losses may exceed 20 percent. But these losses can be doubled if the crop is rained on. But remember, early-cut hay somewhat damaged by rain is still likely to be much higher in total feed value than the same crop cut late and free of weather damage. Losses from weather damage can be reduced by: (1) using hay making equipment that reduces field curing time, and (2) understanding and using existing weather aids.

Hay Preservatives and Drying Agents

The use of organic acid preservatives such as propionic acid or mixtures of propionic and acetic acid, when properly applied, can also help. The rules to follow when using these products include (1) don't bale hay at a moisture greater than 30 percent, (2) be sure to have your equipment properly calibrated and use the correct amount of preservative depending on hay moisture and (3) apply the product uniformly throughout the hay mass.

Hay drying agents such as potassium or sodium carbonate are the newest aids to hit the market. Applied to the alfalfa stems at the time of mowing these materials attach the cuticle layer on the stems causing stems to dry at about the drying rate of the leaves. Results on a heavy first cutting have been less than spectacular. But research at Michigan, Maryland and New Hampshire all agree that these products when properly applied show real promise for second and third cuttings.

Bradford plans tractor course

TOWANDA — A tractor certification program will be held in May at the Bradford County Extension Office, 701 South Fourth Street.

If a youth 14 or 15 years of age plans to work on a farm this summer or if a farmer plans to hire a person of this age, they may become certified by completing this course.

There will be four evening sessions starting at 7 p.m. on May 8, 10, 15 and 17 and a morning session starting at 9 a.m. Saturday, May 18th during which a driving test will be given.

Youth 13 years of age will be accepted but will not receive their certification until their fourteenth birthday.

Contact the Extension Office for more details, (265-2896). Registration should be made by April 30 either by calling or writing Al Homan, at the Extension Office.

There is a charge of $3 to cover the cost of study materials.

State's potato stocks up

HARRISBURG – Total stocks of potatoes stored in Pennsylvania on April 1, were 940,000 cwt., four percent more than a year ago, according to the Pennsylvania Crop and Livestock Reporting Service. Of this amount, 475,000 cwt., 51 percent of total stocks, were stored in processors' facilities.

Stocks are defined as the quantity remaining in storage for all purposes and uses, including seed, shrinkage and waste and other losses that occur after the date of each report. Stocks may also include potatoes produced in other states. Sales of fall potatoes for all purposes generally account for about 90 percent of the total fall production. Shrinkage and loss and home use account* for the remaining 10 percent.

April 1 potato stocks totaled an estimated 85.4 million cwt., for the 15 states in the stocks program. This is up five percent from a year ago but five percent below April 1, 1983. The storage total accounted for 28 percent of fall potato production compared with 29 percent a year ago.

Sign up now for Egg Quality School

ANNAPOLIS, Md. – Deadline for enrollment in the Eastern Shell Egg Quality School to be held at the Holiday Inn Convention Center in Annapolis, Md., is May 15.

Scheduled for June 9 to 12, the school is designed for the serious-minded person who is interested in learning as much as possible about egg quality in a short time period.

Classes will include five to six student with individualized instruction provided. The teaching staff includes university scientists, federal egg inspectors and leading industry persons.

Tuition and meals are $235, not including lodging. For further information contact Southern United Egg Producers, Suite 580, 3951 Snapfinger Parkway, Decatur, GA 30035.

ROBBED AGAIN?

Reduce shrinkage and energy loss with Beacon Silage Pre-Serv.*

Beacon Pre-Serv has a consistent formula of organic acids — natural aids to silage conversion — that encourage bacteria already present in the silage to produce excellent low heat fermentation of forages, so you get more **hay crop silage** for feeding

University tests of Pre-Serv treated silage storage in a bunker silo achieve: 8.64% more dry matter, 9.3% more energy, and 6.3% more protein.

So don't be robbed of digestible nutrients — be rewarded with more milk from your cows! Use highly effective Beacon Pre-Serv . liquid or dry It's another way to Bank on Beacon

Brockett's Ag Advice

By John E. Brockett
Farm Management Agent
Lewistown Extension Office

Final plans for planting

It is that time of year again Fishing season has started, I uncovered my strawberries, and a few of my plum trees are starting to look white. You will soon be making hay and planting corn and you'll be so busy that you won't have time to do anything except get up and go to bed.

Before you get into that busiest of busy seasons, make sure that you have removed as many of the glitches and snafus as you can. You know - replace the worn chains, rusty nails that are taking the place of cotter keys, and frayed belts

Change the oil that has gone thru the winter, tighten bolts, grease wherever your machinery needs greasing, and sharpen mower teeth

Repaired and properly maintained equipment is usually safer than poorly maintained equipment because it is less apt to break down at a critical time. Breakdowns cause delays - delays result in pressure - pressure from being behind results in chance-taking - chance-taking means increasing the risk of someone being hurt or busting up machinery. We are going to lose a lot of farmers over the next few years but hopefully not thru accidents.

THE FINANCIAL PROBLEM

No one really knows the extent of the farm financial problem in America. Unfortunately a number of people including some ag economists and some powerful politicians don't think it is very big. I guess that as one economist said "it depends on the definition one puts on trouble."

The most serious part of the problem is the potential ripple effect One failed farmer goes out of business owing a lot of bills to various ag businesses who in turn owe their own suppliers.

Some of the businesses have a cash reserve, but many don't. The only way they can recoup from the unpaid bills is to charge their other customers more

This extra charge can then put another farmer into trouble, etc, etc. It also combines with lower prices for farm products to give all farmers less money to spend. Each dollar in reduction of farmers spendable money reduces the spendable income of a rural community by 5 to 7 dollars.

In my area about 10 percent of all farmers are either in or very nearly in such serious trouble that they stand very little chance of surviving as any more than welfare farms

They owe more than they own, debt payments exceed 40% of current cash income, overhead costs eat up 45% or more of cash income, unpaid bills exceed 20% of income, costs of production exceed the best price their product has ever brought and records are virtually non existent.

Many of them are quite adept at surviving and may beat the odds.

It is the next 15 to 20 percent that I worry about. Most people who talk about financially distressed farmers do not consider this group as financially distressed.

These farmers are usually heavily in debt (some may have liabilities in excess of 60% of assets), but have managed to keep bills paid by making some great sacrifices. They are often apt to be young, able to manage fairly well, and unafraid of work.

Their main problem is that they started farming at the wrong time for their management ability. Many of this group can survive and some can even propser if they can become "fast learners."

One of the most important lessons they will have to learn is "how to properly spend money". The responsibility is equally divided between husband and wife. If either one refuses or is unable to learn how to make sound spending decisions for both the business and the family, the entire operation will be jeopardized.

There is a second group of farmers who many people would not consider to be financially distressed but who are potentially in trouble unless things change drastically. These are the farmers who have to capitalize 5 to 10 percent of their operating expense every year.

Some of these are basically good operators who got a little sloppy on either personal or business spending. They forgot that no one can spend someone else's money without paying for it.

If those who are in this group will recognize themselves early (like right now) and are willing to sacrifice some of the hard won gains they had in prior years, survival is fairly certain. If they refuse to recognize the problem, survival is less certain and will hinge on factors outside of their sphere of influence.

Medfly emergency declared

WASHINGTON – Secretary of Agriculture John R. Block declared that an emergency exists in Florida because of an outbreak of Mediterranean fruit flies that threaten the fruit and vegetable growing industries of this country. His declaration authorizes the use of federal funds and personnel to combat the flies.

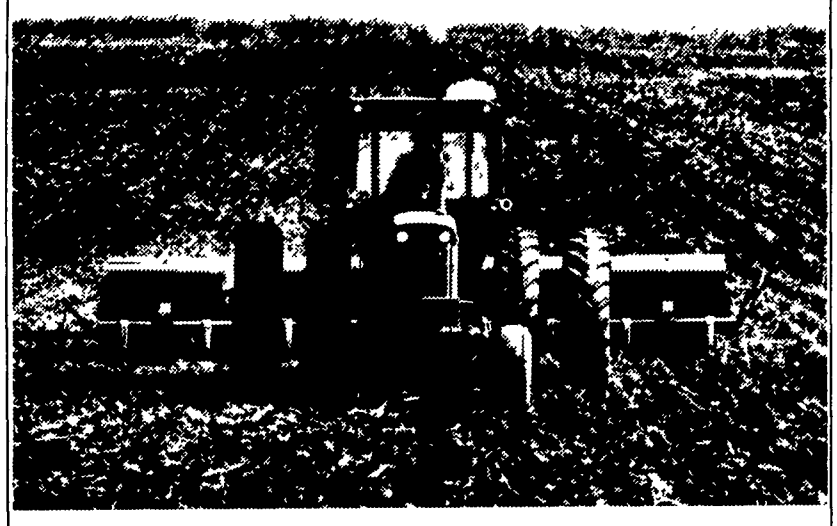
"The Mediterranean fruit fly is one of the most destructive insect pests known," Block said. "This declaration will enable us to commit USDA resources to help Florida plant protection officials eradicate this pest and prevent it from spreading to other parts of the United States."

A single unmated female Medfly was trapped north of Miami on Feb. 25. On April 9, two additional flies were trapped within three miles of the first find, indicating the likihood of a reproducing population.

The Medfly can attack more than 200 kinds of fruits and vegetables. It lays its eggs in the fruit, and when they hatch the young feed on the pulp, spoiling the fruit for human consumption.

Florida's last Medfly infestation – in Miami – was declared eradicated last November. The cost of that campaign was about $1.1 million – shared by the state and federal governments. This is the seventh Medfly infestation in Florida since 1929.

If the engine quits, two-way radio could pay for itself today.



Lose just one day during the planting season and it could make all the difference between a good crop and a poor one

That's why you should be equipped with a Johnson FM two-way radio

With two way radio if your engine quits you can simply call for help Chances are a mechanic can get to you and get you going again while there's still some daylight left

But without two way radio you'd just have to start walking

There are a lot of other ways Johnson FM radio can save you time and money Why not let us show you how you can lease or own a complete two way system for as little as 75¢ a day

Planting the 80 millionth tree seedling on Glatfelter lands are (left) vice president and general manager C.F. Glatfelder, DER Secretary Nicholas DeBenedictis, Glatfelter president T.C. Norris and board chairman P.H. Glatfelter III.

Glatfelter plants 80 millionth

SPRING GROVE - April 17 marked a milestone for the Glatfelter Pulp Wood Company of Spring Grove, with the planting of their 80 millionth tree seedling.

The Glatfelter Company, a manufacturer of printing and specialty papers for the book publishing and commercial printing trade, consumes more than 300,000 cords of wood a year as its principle raw material.

In order to assure an adequate supply of wood, the company has been involved for many years in an intensive effort to promote good forestry practices in the four-state area of Delaware, Maryland, Pennsylvania and Virginia both on Company timberland and lands owned by private individuals

From the start of its tree planting program more than 60 years ago, over 50 million seedlings have been planted on Glatfelter land. An additional 30 million tree seedlings have been planted on private lands as the result of a program whereby the company provides seedlings to private landowners on a matching basis. These 80 million seedlings have resulted in the establishment of over 100,000 acres of forest.

In addition to growing wood fiber for the Glatfelter mill, the thousands of acres of new forest that resulted from these plantings have provided protection against soil erosion and habitat for many species of song birds and wildlife as well as stabilizing stream flow.

Eliminate **Fencing Problems** WITH **ARC** SOLAR FENCING

NUMBER 1 CHOICE OF NEW FENCING BY AMERICAN FARM & RANCH OWNERS

"The Arc 12 Solar system allows us to safely run our stallions next to the mares eliminating time and labor on try backs
Harold S. Warder, Quality Quarter Horses, Oskaloosa, Iowa

- Eliminates fence sagging
- No staples or wire clips
- Adjustable enclosed spring assembly for each wire
- Optional site rails™
- Optional Arc 110 Volt multi wire unit
- Installed by trained dealers
- Fully guaranteed by warranty

The ARC 12 Fence is a new concept in livestock fencing. Using free energy from the sun, the solar powered solid state unit keeps a powerful 12 volt battery charged for effective shocking. Special non-conductive white plastic posts are attractive and extremely durable, capable of being bent 45° and returning to their original position. Using smooth 12½ gauge high tensile wire eliminates injuries from barbed wire.

HOMESTEAD HEREFORDS & ROSE ANGUS JOINT PRODUCTION SALE

Glen Aubrey, N.Y. (Broome Co.)

SATURDAY, MAY 4, 1985
1:00 P.M.

Sale to be held at the Rose Angus Farm — 1 mile off Rt. 26 10 miles north of Endicott & 7 miles south of Whitney Point. Use Exit 8 off I-81 to Whitney Point to Rt. 26 south. Turn at Farm sign on Rt. #26.

50 — REG. HEREFORD & REG. ANGUS CATTLE — 50

Reg. Angus & Reg. Herefords in the following stages - some selling w/calves by their sides; some bagging; some bred for fall; some just for beef; and some open heifers. Some good young Bulls. **Blood & T.B. Tested and Eligible for immediate interstate shipment day of sale.** Rose Angus bloodlines go back to Eileenmere line, Forsythe of Wye. They have always bought Top Gaining Bulls for herd sires (Sons of Milestone & PS Power Play). Homestead Herefords have always bred & bought good Hereford foundation stock. They have a son of Kiyiwana New Trend (Superior Sire) and have many good daughters and sons of him.

Both farms are known for quality cattle. Cattle selling here for the breeder, person just wanting some beef animals, slaughter buyer - something here for everyone.

Also selling Frey Bros Head Gate.

Proven performance with High Octane® Hog Chow.®

brand rations

The nation's leading high-energy hog feed.

More than ten years ago, Purina® introduced the first high-energy feed for hogs. And extensive research has kept High Octane® far ahead of the competition.

Today, High Octane is still the nation's leading high-performance feed. And the proof is in the performance. On-farm trial results show High Octane beats the competition time and time again.

Whatever your feeding needs, stop by and get proof of what High Octane can do for you.
